

One Identity Cloud Access Manager 8.1.2 HF3

Hotfix

January 2018

This hotfix includes the changes listed in the following sections. One Identity Cloud Access Manager may generate additional hotfixes for future releases of the product.

- IMPORTANT:** This hotfix for One Identity Cloud Access Manager may receive additional testing. If you are not severely affected by the issues this hotfix addresses, it is recommended that you wait for the next release of One Identity Cloud Access Manager as it will include this hotfix.

About this hotfix

This hotfix addresses a number of security issues, plus additional updates. This hotfix is a complete rebuild and repackaging of the One Identity Cloud Access Manager application.

Installing this hotfix

Before upgrading to this hotfix, please ensure that you have a current backup of the existing installation. The hotfix may be applied as an upgrade to an existing Cloud Access Manager installation by running the appropriate executable on the host system(s) and following the wizard instructions.

For full backup, installation, restore and configuration information, refer to the *Cloud Access Manager Installation Guide* and the *Cloud Access Manager Configuration Guide*.

Verifying successful completion

To determine if this hotfix is installed

1. Navigate to the **Control Panel** on the server where Cloud Access Manager is installed.
2. Navigate to **Programs and Features**.
3. The version for Cloud Access Manager should now read 8.1.2.8374.

Removing this hotfix

To make it possible to restore Cloud Access Manager to an earlier version, before applying the hotfix you must backup your existing deployment. Restore this backup to roll back the hotfix.

For full details of the backup and restore procedures, refer to the *Cloud Access Manager Installation Guide*.
