

One Identity Active Roles Language Pack 7.2

Release Notes

March 2018

These release notes provide information about the One Identity Active Roles Language Pack release.

About this release

This Language Pack provides product localization for Active Roles 7.2. Install this Language Pack on computers running the Active Roles Web Interface, MMC Interface (Console), Administration Service, Synchronization Service, or Management Tools. The Language Pack makes it possible to change the user interface language in the Web Interface, and causes the Active Roles Console, Administration Service, Synchronization Service, and Configuration Center to choose the user interface language appropriate to the system locale.

Resolved issues

The following is a list of issues addressed in this release.

Table 1: General resolved issues

Resolved Issue	Issue ID
In Active Roles Synchronization Service, with Language pack installed, when German language is selected, selecting the month from the scheduled page displays an error.	763636

Known issues

The following is a list of issues known to exist at the time of release.

Table 2: Known issues

Known Issue	Issue ID
In Active Roles Web interface with Language pack installed, after changing the language to any language other than English, in the customization form of Builtin Workflow, the add entry operation to create new Entry to add to this form does not get completed successfully and an error is displayed.	626632
In Active Roles Web Interface with Language pack installed, when Spanish language is selected, clicking the Help or Help Topics option does not display the required help content but displays an error.	627846
In Active Roles in-place upgrade from 7.x versions, the upgrade wizards have few strings that are not localized to German.	757027
For Active Roles Web interface in non-English languages, error message for Azure license report page without Azure configuration is not displayed in the respective languages.	759034
For Active Roles Web interface in non-English languages, error message displayed for Azure users without Azure Exchange License assigned to them is not correct.	759775
In Active Roles Synchronization Service, the strings for One Identity Manager connector are not translated to German.	761976
In Active Roles installed on a German system, the mapping dialog text message displayed is truncated.	762346
In Active Roles installed on a German system, under Sync History Usage Statics the column headers are displayed in English.	762425
In Active Roles Web interface for Spanish language, the Home page text and splitter controls are not aligned properly.	762428
When installing Active Roles Language pack, the link in the EULA text for the EULA agreement in the One Identity site in is not working.	762344
For Active Roles MMC console in non-English languages, some of the texts have visual anomalies associated with them. Some portions of the text are truncated.	628846
In Active Roles Synchronization Service for German language, for some connectors the strings are not translated to German.	627326
In Active Roles for non-English languages, some of the supported language Strings are not translated correctly to the respective languages. The semantic meaning of some of the strings in Azure related components is not retained in	625176

Known Issue	Issue ID
the translated strings. There is inconsistency of certain links in the Active Roles Web interface.	
In Active Roles Synchronization Service for non-English languages, Event Viewer Messages are not translated to German.	628235
In Active Roles Synchronization Service for German languages, the strings in About box and other connectors are not localized to German.	759366
For Active Roles MMC console in German language, some strings are displayed in English instead of German.	627844

- i **NOTE:** Active Roles Public hotfix to be released by end of March, 2018 addresses some of the known issues listed in the [Known Issue](#) table. The hotfix will address the issues described in Knowledge Article SOL247276 available at <https://support.oneidentity.com/kb/SOL247276>.

System requirements

Before installing Active Roles Language Pack 7.2, ensure that your system meets the following minimum hardware and software requirements.

This Language Pack requires Active Roles version 7.2. You can install this Language Pack on a computer running version 7.2 of the Active Roles Web Interface, MMC Interface (Console), Administration Service, Synchronization Service, or Management Tools. The computer must meet the system requirements specific to the respective Active Roles component—Web Interface, MMC Interface, Administration Service, Synchronization Service, or Management Tools—listed in the Active Roles 7.2 Release Notes.

- i **NOTE:** To reflect the language packs changes, after installing Active Roles Language Pack, you must restart the Administration Service and IISRESET for the Web Interface .

Product licensing

This product does not require licensing.

Getting Started with Active Roles Language Pack 7.2

The following sections provide information on the Active Roles Language pack contents and installation.

Contents of the release package

The Active Roles Language Pack release package contains the following product items:

- Active Roles Language Pack 7.2 installer for 64-bit (x64) systems
- Release Notes (this document)

Installation Instructions

Use the following steps to install the Active Roles Language Pack:

1. In the Language Pack release package, on a 64-bit (x64) system, select the x64 folder.
2. From the folder you selected in Step 1, run **ActiveRolesLanguagePack.msi**.
3. Follow the instructions in the Setup wizard.

This Language Pack provides language support for the following components of Active Roles:

- Web Interface
- Administration Service and ADSI Provider
- Synchronization Service
- MMC Interface (Console)
- Configuration Center

After you have installed this Language Pack on a given computer, the behavior of the Active Roles components on that computer changes as follows:

- Users who connect to the Web Interface running on that computer have the option to choose a user interface language other than English.
- The language of the Administration Service, ADSI Provider, and Synchronization Service matches the Windows display language. On a German-language system, the

language-dependent items of the Administration Service and Synchronization Service, such as operation reports, error messages, as well as the Synchronization Service console menus and dialogs, are in German.

- The language of the MMC Interface (Console) matches the Windows display language. On a German-language system, the Console menus, dialogs, and error messages are in German.
- The language of the Configuration Center matches the Windows display language. On a German-language system, the Configuration Center menus, dialogs, and error messages are in German.

Registry Values

The following registry values determine the language for the Administration Service, MMC Interface (Console), Synchronization Service, and Configuration Center:

- Administration Service: *HKLM\SOFTWARE\One Identity\Active Roles\Configuration\Service\Language*
- MMC Interface: *HKLM\SOFTWARE\One Identity\Active Roles\Configuration\Console\Language*
- Synchronization Service: *HKLM\SOFTWARE\One Identity\Active Roles\Configuration\SyncService\Language*
- Configuration Center: *HKLM\SOFTWARE\One Identity\Active Roles\7.2\ConfigCenter\Language*

The Language value has the format *<language code>-<country/region code>* where *<language code>* is an ISO 639 language code and *<country/region code>* is an ISO 3166 subculture code. Examples are de-DE for German in Germany and en-US for English in U.S. By setting the Language value to de-DE you can switch to the German language. The Administration Service and Synchronization Service must be restarted, and the Console and Configuration Center must be re-opened for your changes to the Language value to take effect.

Globalization

This section contains information about installing and operating this product in non-English configurations, such as those needed by customers outside of North America. This section does not replace the materials about supported platforms and configurations found elsewhere in the product documentation.

This release is Unicode-enabled and supports any character set. It supports simultaneous operation with multilingual data. This release is targeted to support operations in the following regions: North America, Western Europe and Latin America, Central and Eastern Europe, Far-East Asia, Japan.

Active Roles Language Pack 7.2 provides product localization in the following languages:

- Chinese (Simplified)
- Chinese (Traditional)
- Czech
- Danish
- Dutch
- French
- German
- Italian
- Japanese
- Korean
- Polish
- Portuguese (Brazil)
- Portuguese (Portugal)
- Russian
- Spanish
- Swedish

The components localized include the Active Roles Web Interface, MMC Interface (Console), Administration Service, Synchronization Service, and Configuration Center.

This release has the following limitations:

- Help files and documentation for the localized product is available in English only and not in the localized languages.
- Only the Web Interface supports multiple languages at a time; the other components are limited to a single language at a time (SLAAT).
- As the Administration Service supports a single language at a time (SLAAT), the Web Interface has a limitation that errors, messages and reports returned from the Administration Service are SLAAT.
- Language support for the MMC Interface (Console), Administration Service, Synchronization Service, and Configuration Center is limited to the English and German languages.

Contacting us

For sales or other inquiries, visit <https://www.oneidentity.com/company/contact-us.aspx> or call +1-800-306-9329.

Technical support resources

Technical support is available to One Identity customers with a valid maintenance contract and customers who have trial versions. You can access the Support Portal at <https://support.oneidentity.com/>.

The Support Portal provides self-help tools you can use to solve problems quickly and independently, 24 hours a day, 365 days a year. The Support Portal enables you to:

- Submit and manage a Service Request
- View Knowledge Base articles
- Sign up for product notifications
- Download software and technical documentation
- View how-to-videos
- Engage in community discussions
- Chat with support engineers online
- View services to assist you with your product
