

One Identity Starling

Release Notes

5 July 2023

These release notes provide information about the 5 July 2023 One Identity Starling release. For the most recent documents and product information, see [Online product documentation](#).

About this release

One Identity Starling helps to combine products from the One Identity line to create a secure and customizable cloud service. Administrators use the Starling site to create a new organization, register new accounts, add services to their organization, and gain secure access to those services.

Starling 5 July 2023 is a general release.

New features

New features in the 5 July 2023 release of Starling:

- There are no new features for this release. See below for information regarding new features in previous releases.

The following were new features in previous releases of Starling.

24 August 2022 new features

- DNS connectivity requirements now included in the documentation. For more information, see [System requirements](#).

Deprecated features

The following is a list of features that are no longer supported for Starling.

- There were no deprecated features for the 5 July 2023 release. See below for information regarding deprecated features in previous releases.

The following features were deprecated in previous releases of Starling.
