About Migration Manager Statistics

Migration Manager provides administrators with statistics information that helps in migration process planning and monitoring. The statistics information is gathered by Migration Manager Statistics, a Web-based tool that presents statistics information in a convenient, easy-to-view format and displays it in a Web browser and the Migration Manager console (for Exchange migration only).

Migration Manager Statistics gathers information for the following three components of Migration Manager:

- Directory Migration
- Resource Processing
- Exchange Migration

i **IMPORTANT:** The Migration Manager Statistics tool does not collect statistics information related to Migration Agent for Exchange operations. Statistics data for synchronization jobs that migrate to the Microsoft Office 365 target, Microsoft Exchange 2013 target and Native Move job is gathered and can be viewed in the Migration Manager console.

Migration Manager Statistics is installed as an optional Migration Manager component using a separate setup program. For more information about installing Migration Manager Statistics, refer to the *Migration Manager Installation Guide*. The Statistics Portal server system requirements are described in the [Statistics Portal Server](#) topic of the *System Requirements and Access Rights* document.

The Exchange migration statistics data is collected by the Statistics Collection Agent, which connects to all agents, retrieves data from their local databases, and puts the consolidated data into the SQL database. The directory migration statistics data is stored in the Active Directory Application Mode (ADAM) partition. Migration Manager Statistics connects both to the SQL database and ADAM partition and retrieves all the required information.

Configuration

To configure Migration Manager Statistics, take the following steps:

1. Install Migration Manager Statistics on a server running Internet Information Server (IIS).
2. In Migration Manager console, click **File | Open Project**.
3. On the statistics configuration tab, select or type the Migration Manager Statistics URL (by default, **http://server/migration**) and other options.

Alternatively you can go to URL **http://server/Migration/Administration** and configure the same options in web browser. In this case you will not be able to view Migration Manager for Exchange statistics from the Migration Manager console.

Viewing Statistics

The Migration Manager Statistics interface is similar to the Migration Manager console, which simplifies report search and viewing. To view the information on a particular directory synchronization job, Exchange synchronization job, or resource processing task, select the corresponding node in the management tree.

! CAUTION: To see statistical information on a particular directory synchronization job, Exchange synchronization job, or resource processing task, the user must be delegated at least the Reader role at the Migration Project, Directory Migration, or domain pair node whether or not a delegated migration task has been created for that user.

For more information on the Migration Manager delegation model, refer to the *Delegating Migration Tasks* section of the *Migration Manager for Active Directory User Guide*.

The right pane displays statistics information. The information displayed depends on the node selected in the management tree, the filter settings, and the columns selected.

Each report can be filtered, sorted, and grouped to suit your migration tracking needs. Specifically, for each report you can do the following:

- Create a filter by clicking the **Filter** tab and selecting or specifying the necessary values for the filter.
- Select columns to be displayed in the report by clicking the **Columns** tab and moving the column names from the **Available columns** field to the **Selected columns** field or back again.
- Add reports to your Internet Explorer Favorites folder by clicking the **Add to Favorites** button.
- Export a report to a comma-separated file that you can open in Excel or another tool by clicking **Export to csv**.
- Get a printer-friendly version by clicking **Print**.
- Customize a report view by applying a filter to an original report, choosing the columns that should be displayed in the report table, and then saving the customized report view by clicking the **Save View** button. The saved view can be viewed later by selecting the **Saved Views** node in a separate pane in the management tree.
- Customize the number of records per page by selecting the **View Settings** tab and specifying the desired number of records. Note that this setting is applied to all reports.
- Sort the report data by clicking a column header name.
- Group the report by the data type you select from the **Group by** list. (This functionality is not available for all reports.)
- View a supplied customized view of the report by selecting it from the **Preset view** list. (This functionality is not available for all reports.)
- View Migration Manager Statistics online help by clicking the **Help** tab in the top right corner.

For more information on the reports provided by Migration Manager Statistics, refer to the Migration Manager Statistics help.

We are more than just a name

We are on a quest to make your information technology work harder for you. That is why we build community-driven software solutions that help you spend less time on IT administration and more time on business innovation. We help you modernize your data center, get you to the cloud quicker and provide the expertise, security and accessibility you need to grow your data-driven business. Combined with Quest's invitation to the global community to be a part of its innovation, and our firm commitment to ensuring customer satisfaction, we continue to deliver solutions that have a real impact on our customers today and leave a legacy we are proud of. We are challenging the status quo by transforming into a new software company. And as your partner, we work tirelessly to make sure your information technology is designed for you and by you. This is our mission, and we are in this together. Welcome to a new Quest. You are invited to Join the Innovation™.

Our brand, our vision. Together.

Our logo reflects our story: innovation, community and support. An important part of this story begins with the letter Q. It is a perfect circle, representing our commitment to technological precision and strength. The space in the Q itself symbolizes our need to add the missing piece — you — to the community, to the new Quest.

Contacting Quest

For sales or other inquiries, visit <https://www.quest.com/company/contact-us.aspx> or call +1-949-754-8000.

Technical support resources

Technical support is available to Quest customers with a valid maintenance contract and customers who have trial versions. You can access the Quest Support Portal at <https://support.quest.com>.

The Support Portal provides self-help tools you can use to solve problems quickly and independently, 24 hours a day, 365 days a year. The Support Portal enables you to:

- Submit and manage a Service Request
- View Knowledge Base articles
- Sign up for product notifications
- Download software and technical documentation
- View how-to-videos
- Engage in community discussions
- Chat with support engineers online
- View services to assist you with your product
