

One Identity Starling Identity Analytics & Risk Intelligence

Release Notes

13 February 2019

These release notes provide information about the 13 February 2019 Starling Identity Analytics & Risk Intelligence release.

About this release

Accessible from the One Identity Starling site (<https://www.cloud.oneidentity.com/>), this service is used for collecting and evaluating entitlement data. This is done by connecting the cloud-based Starling Identity Analytics & Risk Intelligence with your on-premises data source. Once connected, Starling Identity Analytics & Risk Intelligence analyzes the data to quickly and efficiently compare entitlements and users within those data sources. This allows you to determine which of your users are classified as high risk, which of their entitlement classification rules are the cause of this classification, and to resolve any discrepancies between users who require similar permissions.

Starling Identity Analytics & Risk Intelligence 13 February 2019 is a general release.

New features

New features in the 13 February 2019 release of Starling Identity Analytics & Risk Intelligence:

- There are no new features for this release. See below for information regarding new features in previous releases.

See also:

- [Resolved issues](#) on page 4

The following were new features in previous releases of Starling Identity Analytics & Risk Intelligence.

12 September 2018 new features

- New instance configuration options – For Active Directory and Active Roles Server data sources you can now configure which containers to include or exclude during an evaluation.

29 August 2018 new features

- Azure Active Directory data source modules – Can now collect data from Azure Active Directory and a new Highly Privileged Role Members rule is available specifically for this type of data source module. The Account Best Practices – Users and Highly Privileged Group Members rules now include Azure Active Directory configuration options. Future releases will expand the functionality.

15 August 2018 new features

- Account Evaluation Details page enhancement – Improvements were made to how granted targets and affected objects are reported.
- Target Details page enhancements – The Target Details page has been redesigned to focus on granted targets.
- Affected Object page – This new page provides insight into the affected objects for a rule or entitlement.

1 August 2018 new features

- Account Evaluation Details page – The Rule Evaluation Details page has been renamed and redesigned to allow users a better look at how rules and entitlements are assigned to a user.
- Risk Profile page enhancements – This page now includes information on matched entitlements.
- Managing Organization Admins page – Starling organization roles are now managed on a new page.

18 July 2018 new features

- New customization options for rules – Account Best Practices – Computers and Account Best Practices – Users now have additional configuration options.

20 June 2018 new features

- Two new rules added – New entitlement classification rules (Account Best Practices –

Computers and Account Best Practices – Users) are available for evaluating Active Directory and Active Roles Server data sources.

23 May 2018 new features

- General Data Protection Regulation changes – Due to the new GDPR requirements, a GDPR contact is now required for your Starling account. For more information, see the Starling User Guide. Also, please take time to review the [One Identity legal page](#).

9 May 2018 new features

- Compare Entitlements page changes – The Compare Entitlements page now displays the differences between two accounts by default.
- Active Roles 6.9 to 7.x support – See [System requirements](#) for information.
- Dashboard page – A risk trend indicator and new filtering option has been added to the Dashboard page.

25 April 2018 new features

- Help button – A help button () is now available in the title bar of Starling Identity Analytics & Risk Intelligence containing links to the Support portal and documentation.

28 March 2018 new features

- Compare Entitlements page – Performance updates to the Compare Entitlements page.

14 March 2018 new features

- Nested group membership – The Rule Evaluation Details page now displays information regarding nested group membership.

14 March 2018 new features

- Nested group membership – The Rule Evaluation Details page now displays information regarding nested group membership.

28 February 2018 new features

- Licensing page changes – The Licensing page now displays the type of license associated with each data source. Additional changes have also been made to the page.

14 February 2018 new features

- Safeguard data source modules – Starling Identity Analytics & Risk Intelligence can now collect data from Safeguard.

Deprecated features

The following is a list of features that are no longer supported for Starling Identity Analytics & Risk Intelligence.

- There were no deprecated features for the 13 February 2019 release. See below for information regarding deprecated features in previous releases.

The following features were deprecated in previous releases of Starling Identity Analytics & Risk Intelligence.

1 August 2018 deprecated features

- Users page: The Users page was removed as part of changes to how Starling provides insight into accounts and how it assigns organization level permissions.

Resolved issues

The following is a list of issues addressed in this release.

Table 1: General resolved issues

Resolved Issue	Issue ID
The documentation link accessed via the help button is currently leading to a broken page.	102652
Workaround: The following link should be used to access the documentation: https://support-iar.cloud.oneidentity.com/technical-documents/starling-identity-analytics-risk-intelligence/hosted/user-guide/	

The following issues were resolved in previous releases of Starling Identity Analytics & Risk Intelligence.

18 July 2018 resolved issues

Table 2: General resolved issues

Resolved Issue	Issue ID
For Active Directory, the highest number of High Risk Accounts that will be reported is 1500 per group.	30081

20 June 2018 resolved issues

Table 3: General resolved issues

Resolved Issue	Issue ID
When cloning the Highly Privileged Group Members rule, Active Roles filtering criteria appears even when there is no Active Roles data source configured.	30378

25 April 2018 resolved issues

Table 4: General resolved issues

Resolved Issue	Issue ID
Adding and changing the name of a previously removed verifier will instead add the verifier using the original name.	27049

11 April 2018 resolved issues

Table 5: General resolved issues

Resolved Issue	Issue ID
Nested group not showing in rule evaluation details for permission with multiple entitlements.	26959

28 March 2018 resolved issues

Table 6: General resolved issues

Resolved Issue	Issue ID
The following pages are not automatically refreshing after changes are made that impact the displayed data: Risk Profile, Rule Evaluation Details, Licensing, and Target Details.	25682
Verification page errors after removing verifier.	26532

14 March 2018 resolved issues

Table 7: General resolved issues

Resolved Issue	Issue ID
Dashboard shows duplicated dates in the IARI metrics.	23487

28 February 2018 resolved issues

Table 8: General resolved issues

Resolved Issue	Issue ID
For a Safeguard data source module, if the certificate is removed the collector agent will continue collecting data despite the missing certificate.	25632

14 February 2018 resolved issues

Table 9: General resolved issues

Resolved Issue	Issue ID
Multiple Admin Group Members Rules Result in Merging All Entitlements Under All Triggered Rules.	23670
Invalid argument error on Internet Explorer when opening the Rule Details page. No other browsers are impacted.	25012
In some cases a recently invited and verified collaborator that is then assigned the verifier role will appear as pending.	22610

Known issues

The following is a list of issues, including those attributed to third-party products, known to exist at the time of release.

Table 10: General known issues

Known Issue	Issue ID
Safeguard module reports session access when asset has it disabled.	25607

System requirements

Before using the 13 February 2019 Starling Identity Analytics & Risk Intelligence release, ensure that your system meets the following minimum hardware and software requirements.

Browser requirements

Table 11: Browser requirements

Browser	Minimum OS/Platform	Version
Internet Explorer	Windows 7	11
Google Chrome	Windows 10 Android Mac OS X Yosemite	Latest
Mozilla Firefox	Windows 8.1	Latest
Microsoft Edge	Windows 10	Latest
Safari	Mac OS X Yosemite IOS 8	See OS/Platform
Opera	Windows 7 Mac OS X Yosemite	Latest

Collector agent requirements

The Starling Identity Analytics & Risk Intelligence collector agent has some additional hardware and software requirements before it can be downloaded:

Table 12: Starling Identity Analytics & Risk Intelligence Collector Agent requirements

Operating System	Minimum requirements: Windows Server 2008 R2 SP1 x64
Memory	8GB
Server Software	.Net Framework 4.6.1

Data source module requirements

Once a collector agent has been installed you can begin configuring data sources modules. The following table shows the requirements based on the type of data source module you are configuring.

Table 13: Starling Identity Analytics & Risk Intelligence data source module requirements

Type of data source module	Requirements
Active Roles	<p data-bbox="504 376 695 409">ARS 6.9 to 7.x</p> <ul style="list-style-type: none"> <li data-bbox="523 432 1366 533"> <p>IMPORTANT: Although supported, it is strongly recommended that a collector agent not be installed on a machine with an ARS server.</p> <li data-bbox="555 566 1342 701"> <ul style="list-style-type: none"> • At minimum a domain member account with read access delegated to the following three Active Roles nodes is required: Configuration, Managed Units, and Active Directory. <p data-bbox="584 719 1374 913">The Active Directory template All Objects - Read All Properties contains these minimum permissions and can be used. Or you can create a custom template so long as it contains those minimum permissions. See the Active Roles documentation for information on configuring permissions within Active Roles.</p> <li data-bbox="523 947 1374 1122"> <p>NOTE: By default, Distributed COM Users should contain Authenticated Users. However, if this is missing then you will be unable to connect to Active Roles remotely. For more information, see this article on adding MinARSAdmin or the exact account in order to fix this issue.</p> <li data-bbox="555 1155 1382 1379"> <ul style="list-style-type: none"> • If both 6.9 and 7.x ADSI providers are available, the ARS 7.x ADSI provider will take precedence followed by 6.9 unless the ActiveRolesAdsiVersion environment variable (in the collector configuration file) has been edited to indicate either 6.9 or 7.0 (which covers all 7.x versions) as the specific version. No other versions can be used as the ActiveRolesAdsiVersion environment variable. <li data-bbox="555 1402 1366 1536"> <ul style="list-style-type: none"> • If no ADSI providers are installed, 6.9 and 7.2.0 ADSI providers will be installed. If an ADSI provider is detected, the collector agent will attempt to use that ADSI provider without installing additional providers. <li data-bbox="555 1559 1382 1715"> <ul style="list-style-type: none"> • When a collector agent is removed, any ADSI providers that were originally installed by the collector agent will also be removed. Any additional dependencies that were installed will not be removed since they are standard Windows redistributables. <li data-bbox="555 1738 1350 1796"> <ul style="list-style-type: none"> • Should an ARS installation not fully meet the supported version requirements for all detected ARS Administration

Type of data source module	Requirements
Active Directory	<p data-bbox="584 297 1401 394">Services, this will cause a version compatibility problem and the collector agent will be unable to collect from that installation.</p> <ul data-bbox="555 421 1401 683" style="list-style-type: none"> <li data-bbox="555 421 1401 488">• Active Directory credentials are required for configuring the data source module. <li data-bbox="555 501 1401 568">• A global catalog must be available in order to resolve trustees outside of the domain. <li data-bbox="555 582 1401 683">• A global catalog must be resolvable via its DNS name regardless of whether you are connecting directly to it or to a domain controller connected with a global catalog.
Safeguard	<p data-bbox="507 707 911 736">Safeguard 2.1.0.0 (or greater)</p> <ul data-bbox="555 763 1401 1008" style="list-style-type: none"> <li data-bbox="555 763 1401 831">• A Safeguard user with Auditor permissions is required for configuring the data source module. <li data-bbox="555 844 1401 1008">• The machine running the Safeguard data source module must have the proper SSL root certificate authority certificate(s) that are being used by Safeguard. For more information, see <i>SSL Certificates</i> in the <i>One Identity Safeguard Administration Guide</i> (Safeguard documentation).

Product licensing

Use of this software is governed by the Software Transaction Agreement found at <http://www.oneidentity.com/legal/sta.aspx> and the SaaS Addendum at <http://www.oneidentity.com/legal/saas-addendum.aspx>. This software does not require an activation or license key to operate.

New service instructions

The following instructions explain how to add the Starling Identity Analytics & Risk Intelligence service to an existing One Identity Starling Identity Analytics & Risk Intelligence organization.

Adding the Starling Identity Analytics & Risk Intelligence service

1. Sign in to One Identity Starling (<https://www.cloud.oneidentity.com/>).
2. From the home page, locate the Starling Identity Analytics & Risk Intelligence service and click **Trial**.

The service will be added to the My Services section and be available for use for the length of the trial. At any point you can click the **More Information** button associated with the service for purchasing information.

Globalization

This section contains information about installing and operating this product in non-English configurations, such as those needed by customers outside of North America. This section does not replace the materials about supported platforms and configurations found elsewhere in the product documentation.

This release is Unicode-enabled and supports any character set. It supports simultaneous operation with multilingual data. This release is targeted to support operations in the following regions: North America, Western Europe and Latin America, Central and Eastern Europe.

About us

One Identity solutions eliminate the complexities and time-consuming processes often required to govern identities, manage privileged accounts and control access. Our solutions enhance business agility while addressing your IAM challenges with on-premises, cloud and hybrid environments.

Contacting us

For sales or other inquiries, visit <https://www.oneidentity.com/company/contact-us.aspx> or call +1-800-306-9329.

Technical support resources

Technical support is available to One Identity customers with a valid maintenance contract and customers who have trial versions. You can access the Support Portal at <https://support.oneidentity.com/>.

The Support Portal provides self-help tools you can use to solve problems quickly and independently, 24 hours a day, 365 days a year. The Support Portal enables you to:

- Submit and manage a Service Request
- View Knowledge Base articles
- Sign up for product notifications
- Download software and technical documentation
- View how-to videos at www.YouTube.com/OneIdentity
- Engage in community discussions
- Chat with support engineers online
- View services to assist you with your product
