Resolved Issues

The following is a list of issues resolved in this full-build update

Feature	Resolved Issue	Defect ID
User Based Management (Group Policy Templates)	Upgrade issues with ADM group policy elements	DAMS-3136
User Based Management (Office Settings)	Error upgrading to 10.1, from 10.0, when admin used a slcustopt.ini to add the Office 2016 Templates setting	DAMS-3151
DA Manager	Replication Failed: preparation error occurred: Access to the path"\\<DomainName>\.....' is denied"	DAMS-3170
DA Client	Fixed issue with logoff events not being executed as expected when the loopback group policy setting is enabled.	DAMS-3206
DA Manager	DA is giving ASP.net errors with ONRM that causes DA Console to crash	DAMS-3253
DA Manager	Profile Export path not rebranded to Quest	DAMS-3271
DA Help	Remove-un branded file from help file image	DAMS-3119
DA Client	EA is installed again at every login under certain conditions	DAMS-3330
DA Reporting	Some client licensing reports not reaching the server	DAMS-3315 (duplicate of DAMS-3311)
DA Reporting	SMTP settings do not send unless the SMTP server, username and password are set even if the Exchange server is configured to send without authentication.	DAMS-3308
DA Client	When using Outlook 2016 and DA is configured to use additional mailboxes, those additional mailboxes are added over and over.	DAMS-3187

DA Client	After upgrading from Windows 7 to Windows 10 the USB Port Security component is installed over and over.	DAMS-2420 (duplicate of DAMS-1675)
DA Installer	DAInstaller does not read ONRM settings from DASetupTool during upgrade	DAMS-3478
DA Installer	Remove license error from DA Installer and DA Setup Tool logs	DAMS-3475
DA Manager	ExpertAssist.exe not being replicated	DAMS-3472
DA Manager	Fixed data corruption issue with Shortcut elements after the multi-edit console feature has been used to modify more than a single shortcut element at once.	DAMS-3172
DA Client	Fixed issue with a 3 min logoff delay in some environments where Google File Stream is in-use.	DAMS-3571
DA Installer	Fixed issue with a FIPS validation error being displayed during the installation of Desktop Authority when installing to a FIPS environment with the ONRM (Off-Network Remote Management) feature enabled.	DAMS-3593
DA Manager	Fixed issue with an unexpected business logic error ("Object reference not set to an instance of an object") when attempting to use the Remote Control button within the Remote Management tab.	DAMS-3544
DA Client	Fixed issue where a 16-second delay was being experienced at logon in some environments where clients have no or limited internet connectivity.	DAMS-3323
Expert Assist	Fixed issue using ExpertAssist on computers with multiple screens. On some client operating systems (Windows 8 and later), admins were previously unable to select each screen independently during a remote-control session.	DAMS-2815 (duplicate of DAMS-2011 and DE10842)

Compatibility of This Update

The following is a list of product versions and platforms compatible with this update.

Product Name	Product Version	Platform
Desktop Authority	10.1.0.1016	all

[Back to Top](#)

Installing This Update

1. Download the zip file that contains the full build update.
Warning: Some computers have security settings enabled that block zip files that come from other computers. Right click on the zip file and choose Properties. If blocking is enabled, you will see an "Unblock" button on the bottom right hand corner of the Properties dialog. Press "Unblock" and then press the OK button. Proceed to unzip the file.
2. Close all instances of Desktop Authority Manager
3. As an Administrator, run the executable that was extracted from the zip file.
4. Choose Express Upgrade when prompted.
5. When prompted to back up the database, please do so.
6. Once the installation has finished you will need to launch the Desktop Authority Management Console and go to Server Manager and choose "Upgrade Service" on each server.
7. From the *Replicate changed files* button, choose to "Force an update of the local Desktop Authority folder on clients".
8. From the *Replicate changed files* button, choose to "Replicate all files". **This will trigger the desktops to be upgraded to the new updated build.**

9. NOTE: If you use the USB/PS module, this update will upgrade the driver on the client machines and will require a **reboot** of all workstations that have USB/PS installed.
