

One Identity Starling

Release Notes

20 November 2019

These release notes provide information about the 20 November 2019 One Identity Starling release.

About this release

One Identity Starling helps to combine products from the One Identity line to create a secure and customizable cloud service. Administrators use the Starling site to create a new organization, register new accounts, add services to their organization, and gain secure access to those services.

Starling 20 November 2019 is a general release.

New features

New features in the 20 November 2019 release of Starling:

- Starling Identity Analytics & Risk Intelligence new subscriptions unavailable – Starling Identity Analytics & Risk Intelligence is in the process of being removed. New subscriptions are no longer available.

See also:

- [Resolved issues](#)

The following were new features in previous releases of Starling.

6 November 2019 new features

- Access Certification technical preview ending – The technical preview of Access Certification is concluding. New subscriptions are no longer available.

5 June 2019 new features

- European Union data center deployment available – New Starling organizations are now able to select between using the European Union or United States data centers. The European Union data center currently only supports the Starling Connect service.

27 March 2019 new features

- Identity Manager 8.1 – The latest version of Identity Manager is eligible to use the One Identity Hybrid Subscription service.

27 February 2019 new features

- Authentication Services 4.2 – The latest version of Authentication Services is eligible to use the One Identity Hybrid Subscription service.
- One Identity Safeguard for Privileged Sessions 5.10 – The latest version of One Identity Safeguard for Privileged Sessions is eligible to use the One Identity Hybrid Subscription service.
- Starling Governance Access Certification (Technical Preview) – Related to the One Identity Hybrid Subscription, the Starling Governance Access Certification (Technical Preview) service is used for uploading data from One Identity Safeguard for Privileged Passwords (which is connected to Starling using One Identity Hybrid Subscription) in order to run a campaign which allows you to make decisions regarding whether or not the correct permissions are currently in effect. The Starling Governance Access Certification service is only available as a technical preview at this time.

Deprecated features

The following is a list of features that are no longer supported for Starling.

- Starling Identity Analytics & Risk Intelligence new subscriptions unavailable: Starling Identity Analytics & Risk Intelligence is in the process of being removed. New subscriptions are no longer available.

The following features were deprecated in previous releases of Starling.

6 November 2019 deprecated features

- Access Certification new preview subscriptions: You are unable to add a technical preview subscription for Access Certification and information related to the service has also been removed from the Access Summary page.
