

## The Privileged Appliance and Modules (TPAM) 2.5.921

### Required Installation Instructions

**!!IMPORTANT! WE RECOMMEND PUTTING THE APPLIANCE IN MAINTENANCE MODE AND REBOOTING BEFORE THE PATCH HAS APPLIED.**

This patch will update a 2.5.920 appliance to the latest released version of 2.5.921. The minimum version in order to apply the patch is 2.5.920.

Warning: Since this patch can take several minutes to apply, the failover interval needs to be increased for any failover replicas to prevent them from failing over and not getting upgraded.

**Key: oo1LMW5LUI**

**Option: /genkey**

NOTE: If using TPAM API's a new version of the API must be downloaded and the applications using them updated. In 2.5.921 some there are some output changes that provide additional information. Refer to the TPAM 2.5 Administration Guide under chapters "CLI Commands" and "Application Programming Interface (API)" for more information.

Please refer to the 2.5.921 release notes for additional information and installation instructions.
