

Quest® On Demand Recovery

Release Notes

July 18, 2024

On Demand Recovery allows you to backup and restore Microsoft Entra ID and Microsoft® 365 objects with their properties. These objects can be selected in a backup and then restored to Microsoft Entra ID or Microsoft 365 without affecting other objects or attributes. Using the granular restore, objects that were inadvertently deleted or modified can be recovered in a few minutes.

Key features of On Demand Recovery

- **Back up Microsoft Entra ID and Microsoft 365 users, groups, contacts, service principals, conditional access policies, and device information**
On Demand Recovery automatically backs up your directory on a regular basis.
- **Granular, selective restore of Microsoft Entra ID and Microsoft 365 users, groups, service principals, conditional access policies, devices, inactive mailboxes for permanently deleted users**
Users, groups, service principals, and devices can be selected in a backup and then restored to Microsoft Entra ID or Microsoft 365 without affecting other objects or attributes.
- **Backup and restore Microsoft Entra B2C users and groups**
On Demand Recovery supports Microsoft Entra B2C tenants.
- **Restore users or Microsoft 365 groups from the Recycle Bin**
Restore users and Microsoft 365 groups that were inadvertently moved to the Recycle Bin.
- **Cloud solution: backup snapshots are stored in the cloud**
On Demand Recovery does not require to install or maintain any additional software.
- **Comparison reporting**
This feature lets you view differences between the selected backup and live Microsoft Entra ID or Microsoft 365 and revert unwanted changes.
- **Integration with Recovery Manager for Active Directory**
On Demand Recovery can be integrated with Recovery Manager for Active Directory 9.0 or higher to restore on-premises objects that were synchronized with cloud by Microsoft Entra Connect.

These release notes provide information about the On Demand Recovery release.

Resolved issues

Resolved issue	Issue ID (Jira)	Issue ID (ADO)
Backup settings did not display correctly in the "Create backup" dialog due to a problem with the empty 'created' field.	RMAZ-1428	ADO-348169

Known issues

The following is a list of issues, including those attributed to third-party products, known to exist at the time of this deployment.

General known issues

Known issue	Issue ID (Jira)	Issue ID (ADO)
If you restore two groups which are members of the third group which was deleted, the third group can be duplicated after the restore operation. This issue is applied only to non-Office Groups which support nesting. Workaround: To avoid this issue, the user needs either to restore groups one by one (order is not important) or restore all of them at once.	RMAZ-18	ADO-226239
On Demand Recovery does not restore Distribution List members and will display the error "Status: 400, Code: Request_BadRequest. Details: Unable to update the specified properties for objects that have originated within an external service."	RMAZ-174	ADO-348192
If two users perform the unpack operation simultaneously with the selected "Clear objects" option in the same On Demand organization, one of the processed backups will not be unpacked (or will be partly unpacked). Workaround: Do not select the "Clear	RMAZ-270	ADO-225214

Known issue	Issue ID (Jira)	Issue ID (ADO)
objects" option. Also, the restore operation may fail if the user is trying to unpack the backup that is currently processed by another user.		
Old backups (backups that were created before you remove the tenant) are not shown in the On Demand Recovery user interface if the same tenant was removed and then added again. If you need to unpack, restore or delete old backups, please contact Quest Support.	RMAZ-273	ADO-352537
Backup task does not check the Admin consent status, but if the Admin consent is not granted for the tenant, the following error occurs: "The identity of the calling application could not be established."	RMAZ-315	ADO-352542
On Demand Recovery does not show the proxyAddresses attribute in the Differences view.	RMAZ-338	ADO-352544
The restore operation from the Differences view may fail if you run Refresh before the restore operation is completed.	RMAZ-352	ADO-352545
An incorrect (empty) object count may be displayed in the "details pane" of the Restore from Diff task.	RMAZ-354	ADO-352546
If you enable Azure Multi-Factor Authentication (MFA), you should regrant Admin Consent for the On Demand Recovery module. Otherwise, you will get the following error during the restore operation: "Failed to refresh access token. StatusCode: 400. ErrorCode: interaction_required. Due to a configuration change made by your administrator, or because you moved to a new location, you must use multi-factor authentication to access".	RMAZ-405	ADO-352553
On Demand Recovery does not support backup and restore of Microsoft Entra tenants created in Azure Germany, or U.S. Government.	RMAZ-566	ADO-352561
If a user does not have the service account for the tenant, On Demand Recovery cannot restore permanently deleted service principals provisioned from Azure Gallery. Workarounds: <ol style="list-style-type: none"> 1. Install the corresponding application from Azure Gallery once again to re-create the service principal object. 2. Install SSL certificates for the application. 3. Configure single sign-on (SSO) options for the service principal (if any). 4. After that, On Demand Recovery will be able to apply properties from the backup. 	RMAZ-690	ADO-352565
On Demand Recovery does not restore MFA authentication methods for a hard deleted user if the mobile application was assigned to this user. NOTE: If any of the following Voice Call/SMS/Office Phone was set up as an authentication method for a user, On Demand Recovery will restore all MFA data for this user.	RMAZ-777	ADO-352568
If you restore a permanently deleted user with the enabled Self-	RMAZ-798	ADO-352570

Known issue	Issue ID (Jira)	Issue ID (ADO)
Service Password Reset option, Multi-Factor Authentication methods will be displayed as not verified after restore.		
On Demand Recovery does not support MFA enabled accounts for backup creation. To set the account password to never expire, use the following PowerShell command: <code>Set-MsolUser -UserPrincipalName <name of the account> -PasswordNeverExpires \$true</code> For more details, refer this article https://support.office.com/en-us/article/set-an-individual-user-s-password-to-never-expire-f493e3af-e1d8-4668-9211-230c245a0466	RMAZ-779	ADO-352569
A tenant verification failed message appears when user adds tenant to On Demand Recovery (Core only).	N/A	ADO-264595
On Demand Recovery does not support backups dated before October 2019.	N/A	ADO-394268
Unable to restore "Default Policy" (aka SAML Attributes & Claims) - Not supported by Microsoft.	N/A	ADO-471685
Unable to restore all other policy types - only support Conditional Access Policies and Named Locations with new Graph API.	N/A	ADO-473450
Unable to update mail-enabled group attributes.	N/A	ADO-475481
Back up and restore of multifactor authentication settings and data required to connect inactive mailboxes to a restored user is temporarily not supported. Interface (API) was deprecated and needs to be replaced with new methods.	N/A	ADO-503476

Hybrid only known issues

Known issue	Issue ID (Jira)	Issue ID (ADO)
Granular restore of object membership from the Differences view is not supported. Workaround: Go to the Objects view, find the group that you want to restore and select the member attribute in the attribute list to restore links.	RMAZ-252	ADO-225173
Cannot download hybrid credentials with the Error 404 "Not found" may occur. This issue occurs if you try to get credentials right after the registration - it takes about one minute to create the Relay credentials.	RMAZ-311	ADO-352541
If the same on-premises object is selected in different unpacked backups on the Objects view, On Demand Recovery will perform the hybrid restore of the object on the first selected backup date.	RMAZ-355	ADO-352547
If multiple objects are selected for restore and there is Directory Synchronization Service Account among them, the restore operation will fail for all objects with the error "Failed on-premise restore. Error: Value cannot be null".	RMAZ-358	ADO-352548
Hybrid restore (from Objects or Differences view) uses attribute values from the on-premises backup. So, these values may be different from the corresponding values shown in the Differences or Objects view.	RMAZ-373	ADO-352551

Known issue	Issue ID (Jira)	Issue ID (ADO)
Restore of the usageLocation cloud attribute does not work for the "Exchange Hybrid" scenario.	RMAZ-457	ADO-352554
A restore of a hybrid cloud user that was permanently deleted may fail, if Microsoft Entra Connect cannot synchronize the newly created user from the on-premises Active Directory to the cloud. Workaround: Force Microsoft Entra Connect initial synchronization to fix this issue, then restart the restore operation.	RMAZ-485	ADO-352559
Cannot restore cloud attributes for a permanently deleted user in hybrid scenario after the user was recreated by Microsoft Entra Connect. The following error will arise: "Another object with the same value for property userPrincipalName already exists "	RMAZ-720	ADO-352566
On Demand Recovery cannot restore the onPremisesDistinguishedName property for permanently deleted users in hybrid scenario. In this case you will get the following error message: "Property 'onPremisesDistinguishedName' is read-only and cannot be set" error.	RMAZ-721	ADO-352567
Hybrid restore may fail with the following error: "The ChannelDispatcher at 'sb://backupaad-rmaz-hybrid-us.servicebus.windows.net/org-f555beae-38fa-4d0a-b502-08c4b93b01da' with contract(s) 'HybridRestoreServiceContract' is unable to open its IChannelListener". Workaround: Restart the Recovery Manager Hybrid Connect service.	RMAZ-907	ADO-352573
Import-Module ADSync command may not work correctly on the Microsoft Entra Connect host. Workarounds: <ul style="list-style-type: none"> Make sure that <i>Import-Module</i> is available globally on the Microsoft Entra Connect host. -OR- Copy the AADSync.psm1 file manually from the Recovery Manager Portal machine to the PowerShell default folder on the Microsoft Entra Connect host. 	RMAZ-931	ADO-352574

Quest Migration and Management Platform known issues

Known issue	Issue ID
You may see a "white screen" instead of spinning preloader when starting On Demand Recovery.	QMMP-74
The "Select all" option does not work properly in the "Select attributes" dialog that opens when you click Browse in the Restore Objects dialog. If you select the "Select all" check box, all attributes will be selected, but will not be restored.	QMMP-130
Invalid sorting of data by 'Task Name' and 'Object Name' fields in the Events view.	QMMP-142
Resizing issue: Shows gray overlay on small displays when the side bar was initially in the expanded state.	QMMP-159
Scrolling hangs if there are more than 10000 objects in a list. Workaround: Use sorting or filtering option to narrow your search scope.	QMMP-177, QMMP-182
The timelines on the Events and Backups show incorrect results if you select an interval in the	QMMP-184

timeline and then click any date range link on the left side of the screen.	
If you work with Internet Explorer 11, dialogs launched from the Differences and Dashboard screens may show controls from the lower layer. Workaround: Resize the browser window.	QMMP-201
Details panel on the Objects view shows tasks in a random order.	QMMP-221
On the Dashboard view, if you click on any specific status in the objects widget, you will be redirected to the Objects view with this status as a filter. Then, if you go back to Dashboard and click on the widget title (total number of objects), you will be redirected to Objects with the previous status filter.	QMMP-228

Incident response management

Quest Operations and Quest Support have procedures in place to monitor the health of the system and ensure any degradation of the service is promptly identified and resolved. On Demand modules rely on Azure and AWS infrastructure and as such is subject to the possible disruption of these services.

You can view the following status pages:

- Quest On Demand: <https://status.quest-on-demand.com/>
- Azure Services: <https://azure.microsoft.com/en-ca/status/>
- AWS Services: <https://status.aws.amazon.com/>

System requirements

On Demand Recovery supports the following browsers:

- Microsoft Internet Explorer 11
- Microsoft Edge
- Google Chrome (latest version)
- Mozilla Firefox (latest version)

Product licensing

On Demand Recovery is a Software as a Service (SaaS) application where application software is hosted in the cloud and made available to users through quest-on-demand.com.

Use of this software is governed by the Software Transaction Agreement found at www.quest.com/legal/sta.aspx and the Data Processing Addendum at www.quest.com/legal/dpa.aspx. This software does not require an activation or license key to operate.

You can sign in to as a Guest user and sample the solutions the product can offer. As a Guest user, you can add your Microsoft Entra tenant and look for problems that can be solved by On Demand Recovery. To sign in as a Guest user, go to quest-on-demand.com and click **Continue as Guest**.

Trial licenses are available. To enable a trial license, you must use a Quest account to sign up for On Demand Recovery. Use one of the following procedures:

- To enable a trial license with an existing Quest account
- To create a Quest account and enable a trial license

To enable a trial license with an existing Quest account

1. Go to <https://www.quest.com/on-demand/>.
2. Scroll down to the module you are interested in and click **Try Online**.
3. On the Free Trial of Recovery page, click **Sign In for your Free Trial**.
4. Fill in your Quest account credentials and click **Sign In**. The Welcome to page opens.
5. In the **Add organization name** field, enter a name for your organization.
6. In the **Select Region** field, select the region where you want your data to reside.
7. Click **Create New Organization**.

You can now add your Microsoft Entra tenant and begin using the module. See the [On Demand Recovery User Guide](#) for more information on working with On Demand Recovery.

To create a Quest account and enable a trial license

1. Go to <https://www.quest.com/on-demand/>.
2. Scroll down to the module you are interested in and click **Try Online**.
To try online, you must create a Quest account and then sign up for On Demand Recovery.
3. Create a Quest account.
 - a. Click **Create a Trial Account**.
 - b. Fill in the fields on the Create Account page. Note that the email and password entered here will be the credentials you use to sign in to On Demand Recovery.
 - c. Click **Create Account**.
The "We've sent you an email" page opens.
4. Sign in to On Demand Recovery.
 - a. Go to your email account and open the email from support.quest.com. Click on the verification link.
The Welcome to page opens.
 - b. In the **Add organization name** field, enter a name for your organization.
 - c. In the **Select Region** field, select the region where you want your data to reside.
