What's new in One Identity Manager Data Governance Edition 8.0

As a result of ongoing research and development, and in response to customer feedback, the following enhancements have been added to Data Governance Edition version 8.0:

- Windows Server 2016 support
- Web portal enhancement, including the new **Access Analysis** view, which provides a graphical representation of who has access to a governed resource based on organizational structure.
- New **Rescan** task on the Managed Host view, which forces a rescan of all agents associated with a managed host.
- One Identity branding.

For a list of resolved issues, see the *One Identity Manager Data Governance Edition Release Notes*.

What's new in 8.0.1

Data Governance Edition 8.0.1 is a minor release that provides SharePoint scalability and performance improvements.

- Data Governance Edition now allows you to deploy multiple agent services to manage a SharePoint farm. By dividing your managed SharePoint resources across multiple agent services on your SharePoint server, you should experience faster scanning and reduced downtime when running reports.

For a list of resolved issues, see the *One Identity Manager Data Governance Edition Release Notes*.

What's new in 8.0.2

Data Governance Edition 8.0.2 is a service pack release that provides compatibility with One Identity Manager 8.0.2. It also contains the following:

- NetApp ONTAP 9 support: Data Governance agents can now scan NetApp ONTAP 9 (up to version 9.3) devices.
- SharePoint 2016 support: Data Governance Edition now supports the scanning of SharePoint 2016.
- The initial 8.0.2 release of Data Governance Edition does not support the scanning of folders hosted on cloud providers. This feature is under review for consideration in a future release.

NOTE: Data Governance Edition hotfix 8.0.2.31 or later includes support for scanning of folders hosted on cloud providers, such as SharePoint Online and OneDrive for Business.

For a list of resolved issues, see the *One Identity Manager Data Governance Edition Release Notes*.

One Identity solutions eliminate the complexities and time-consuming processes often required to govern identities, manage privileged accounts and control access. Our solutions enhance business agility while addressing your IAM challenges with on-premises, cloud and hybrid environments.

Technical support resources

Technical support is available to One Identity customers with a valid maintenance contract and customers who have trial versions. You can access the Support Portal at <https://support.oneidentity.com/>.

The Support Portal provides self-help tools you can use to solve problems quickly and independently, 24 hours a day, 365 days a year. The Support Portal enables you to:

- Submit and manage a Service Request
- View Knowledge Base articles
- Sign up for product notifications
- Download software and technical documentation
- View how-to videos at www.YouTube.com/OneIdentity
- Engage in community discussions
- Chat with support engineers online
- View services to assist you with your product
