# Introduction

## About This Document

This document discusses data encryption, user authentication, data logging, and other LiteSpeed's security features and describes how to evaluate LiteSpeed's security features in connection with the NIST's recommended federal information security standards promulgated under the Federal Information Security Management Act (FISMA).

## About LiteSpeed

LiteSpeed® for SQL Server®, or LiteSpeed, is a fast and flexible backup and recovery solution that allows database administrators to easily maintain complete control over the backup and recovery process. LiteSpeed's low-impact, high-performance compression and encryption technology helps reduce storage costs and protect data, while maintaining a high level of recoverability.

While providing robust encryption and compression functionality, this cutting-edge database backup solution profoundly reduces the time needed to execute database backups. It supports the use of the FIPS 140-2 compliant encryption algorithms AES and 3DES for encrypting database backup files. LiteSpeed installs extended stored procedures on the SQL Server which it uses during backups and restores.

# Security Features in LiteSpeed

Below follows a set of security features provided by LiteSpeed for SQL Server.

## Data Encryption

A backup of a database will include all sensitive information stored in the original, and it is therefore prudent to offer a level of protection of the backup. LiteSpeed supports concurrent encryption during the creation of database backups and supports the following symmetric key encryption algorithms and key sizes:

Encryption Algorithm	Key Sizes (in bits)	FIPS 140-2 Approved
Microsoft AES	128, 192, 256	Yes
AES	128, 196, 256	No
3DES	168	Yes
RC2	40, 56, 112, 128	No
RC4	128	No

LiteSpeed uses Microsoft's Cryptographic API (CAPI) to provide AES, 3DES, RC2 and RC4 algorithms. The alternative AES encryption algorithm uses the LibTomCrypt library which is not FIPS 140-2 approved but does support the Microsoft Cryptographic Service Providers in Windows 2000.

The customer has the choice of only using FIPS 140-2 approved algorithms. The choice of encryption is specified through the backup wizard in the LiteSpeed UI Console. The user chooses the specific encryption algorithm and the corresponding key size. These parameters can also be included as part of script files.

## Encryption Key

When choosing to enable encryption of backup files, the LiteSpeed user is prompted to enter a password. This password gets converted into a cryptographic key (password based encryption). Since the security of the key

relies upon the password, the user should choose a strong password. The user is prompted to re-enter the password upon restore of an encrypted backup. Neither the key nor password are persisted with the backup file.

## User Authentication

LiteSpeed relies upon SQL Server for user authentication and access control.

## Privileges

During installation, LiteSpeed requires the user to have Administrator rights on the local machine and SYSDBA access on the SQL Server. Only SYSDBA access is required during operation of LiteSpeed.

## Logging

LiteSpeed users can enable the Activity Logging feature causing activity data to be logged to a Local Repository database on each server instance on which Activity Logging is enabled.

## Network Connectivity

LiteSpeed does not require any network connectivity during installation or operation. Backup files can be stored on local disks. Therefore, no network ports are required to be opened for LiteSpeed to work, meaning that the server's firewall settings can remain unchanged.

It is possible to initiate backups from the LiteSpeed UI Console by connecting to a database on a remote machine, assuming that LiteSpeed has been installed on it. When initiating encrypted backups from the console, we recommend that the SQL Server administrator enforces secure communication on the SQL Server, as doing so would prevent sending the encryption password in the clear over the network. The database backup files are created on the machine hosting the SQL Server. LiteSpeed uses tabular data stream packets (TDS) to communicate with the remote SQL Server.

**Note:** TSM backups conducted through LiteSpeed are transferred to and then stored in and/or managed by the Tivoli Storage Manager. The TSM handles the backup file from then on, managing expiration date, storage location, etc. Please refer to the TSM product documentation for further details.

## Integrity of Backup Files

Cyclic Redundancy Checks (CRC) can be used to ensure the integrity of the backup files. CRC is used for detecting corruption during the file copy operation. LiteSpeed uses the Adler-32 checksum algorithm.

# Verification of User Input

The LiteSpeed UI Console validates user input by checking for matching data type (no characters in a numeric only field) and length of inputs, such as to prevent against users attempting to enter malicious commands.

# Configuration Parameters

LiteSpeed's configuration parameters are stored in the LiteSpeedSettings.ini file and are configurable through the LiteSpeed UI Console. Other parameters specific to backup files such as those required during restores are stored in the files themselves.

# Daylight Savings Time Compliance

LiteSpeed will not be affected by the changes introduced by the Daylight Savings Time (DST) Extension (U.S. Energy Policy Act of 2005). It relies upon the Operating System for time management and does not implement any special logic around DST settings. Therefore, if the Operating System is DST compliant then so is LiteSpeed.

# LiteSpeed for SQL Server and FISMA Compliance

The Federal Information Security Management Act (FISMA) was passed by the U.S. Congress and signed by the U.S. President, and is part of the Electronic Government Act of 2002. It requires each federal agency to develop, document, and implement an agency-wide program to provide information security for the information and information system that support the operations and assets of the agency, including those provided or managed by another agency, contractor, or other source. See <http://csrc.nist.gov/groups/SMA/fisma/overview.html> for more information.

A major component of FISMA implementation is the publication by the National Institute of Standards and Technology (NIST), entitled “Recommended Security Controls for Federal Information Systems”, listed as NIST Special Publication 800-53. It lists 17 general security categories against which an information security control program should be evaluated, so as to measure its level of compliance with an agency’s obligations under FISMA. See <http://csrc.nist.gov/publications/nistpubs/800-53-Rev3/sp800-53-rev3-final.pdf> for more information. Under 800-53, these seventeen listed categories define general security control “families” (e.g., “AC”), and that each family in turn contains several subcategories (e.g., “AC-1”, “AC-2”, “AC-3”, etc.) that further detail related aspects of information security and assurance. Consult Appendix F of 800-53 for further information.

The following table describes how LiteSpeed addresses categories listed in NIST 800-53.

Category	Applicable	Description
Access Control (AC)	Yes	LiteSpeed relies upon SQL Server for user authentication and access control.
Awareness and Training (AT)	No	This category does not apply to LiteSpeed as it would be the responsibility of the customer who installs LiteSpeed on its systems to develop and review its own security awareness and training policy.
Audit and Accountability (AU)	Yes	LiteSpeed users can enable the Activity Logging feature causing activity data to be logged to a Local Repository database on each server instance on which Activity Logging is enabled.

Category	Applicable	Description
Certification, Accreditation and Assessments (CA)	No	This category does not apply to LiteSpeed as it would be the responsibility of the customer who installs LiteSpeed on its systems to develop and review its own security assessment, accreditation and certification policy.
Configuration Management (CM)	Yes	LiteSpeed's configuration can be modified through the LiteSpeed UI Console. For more information, see <a href="#">Configuration Parameters</a> on page 7.
Contingency Planning (CP)	No	This category does not apply to LiteSpeed since it is the responsibility of the customer to design and implement their own contingency plans. As defined by NIST (publication 800-34), disruptive events to IT systems include power-outages, fire and equipment damage, and can be caused by natural disasters or terrorist actions.
Identification and Authentication (IA)	Yes	LiteSpeed relies upon SQL Server for authentication and identification of users. Only users with sufficient privileges are able to execute commands within LiteSpeed. For more information, see <a href="#">User Authentication</a> on page 6.
Incident Response (IR)	No	This category does not apply to LiteSpeed since it is the responsibility of the customer who installs LiteSpeed on its systems to develop and review its own incident response policy and procedures.
Maintenance (MA)	Yes	Quest Software monitors developments and newly discovered security flaws in the software components and libraries used by ActiveRoles, and provides product and security patches to its customers when necessary.
Media Protection (MP)	No	This category does not apply to LiteSpeed since it is the responsibility of the customer who installs LiteSpeed on its systems to develop and review its own media protection policy.
Physical and Environmental Protection (PE)	No	This category does not apply to LiteSpeed since it is the responsibility of the customer who installs LiteSpeed on its systems to develop and review its own physical and environmental policy.
Planning (PL)	No	This category does not apply to LiteSpeed since it is the responsibility of the customer who installs LiteSpeed on its systems to develop and review its security planning policy.
Personnel Security (PS)	No	This category does not apply to LiteSpeed since it is the responsibility of the customer who installs LiteSpeed on its systems to enforce its personnel security policies.

Category	Applicable	Description
Risk Assessment (RA)	No	This category does not apply to LiteSpeed since it is the responsibility of the customer who installs LiteSpeed on its systems to develop and review its own risk assessment policy.
System and Services Acquisition (SA)	No	This category does not apply to LiteSpeed since it is the responsibility of the customer who installs LiteSpeed on its systems to develop and review its own system and services acquisition policy.
System and Communications Protection (SC)	Yes	LiteSpeed allows for encryption of the created backup files. The FIPS 140-2 approved AES and 3DES are amongst the supported encryption algorithms. For more information, see <a href="#">Data Encryption</a> on page 5.
System and Information Integrity (SI)	Yes	LiteSpeed permits the user to create an integrity check of the backup files that can later be used to verify the integrity of the files, for example after a file transfer. For more information, see <a href="#">Integrity of Backup Files</a> on page 6.

**Note:** A statement that a particular security category is applicable to LiteSpeed means only that LiteSpeed contains security features that are or may be relevant to some or all aspects of the security category in question. It does not necessarily mean that LiteSpeed fully meets all of the requirements described in that security category, or that the use of LiteSpeed by itself will guarantee compliance with any particular information security standards or control programs. Indeed, the selection, specification, and implementation of security controls in accordance with a customer-specific security program is ultimately dependent upon the manner in which the customer deploys, operates, and maintains all of its network and physical infrastructure, including LiteSpeed. For more information, see [Customer Measures](#) on page 11.

## Customer Measures

The security features of LiteSpeed for SQL Server are only one part of a secure environment. The customer's operational and policy decisions will have a great influence upon the overall level of security achieved. In particular, the customer is responsible for the physical security of the appliance and the security of the network from which the appliance is accessible. Administrators should also change default passwords and replace them by strong passwords.

## We are more than just a name

We are on a quest to make your information technology work harder for you. That is why we build community-driven software solutions that help you spend less time on IT administration and more time on business innovation. We help you modernize your data center, get you to the cloud quicker and provide the expertise, security and accessibility you need to grow your data-driven business. Combined with Quest's invitation to the global community to be a part of its innovation, and our firm commitment to ensuring customer satisfaction, we continue to deliver solutions that have a real impact on our customers today and leave a legacy we are proud of. We are challenging the status quo by transforming into a new software company. And as your partner, we work tirelessly to make sure your information technology is designed for you and by you. This is our mission, and we are in this together. Welcome to a new Quest. You are invited to Join the Innovation™.

## Our brand, our vision. Together.

Our logo reflects our story: innovation, community and support. An important part of this story begins with the letter Q. It is a perfect circle, representing our commitment to technological precision and strength. The space in the Q itself symbolizes our need to add the missing piece – you – to the community, to the new Quest.

## Contacting Quest

For sales or other inquiries, visit [www.quest.com/contact](http://www.quest.com/contact).

## Technical support resources

Technical support is available to Quest customers with a valid maintenance contract and customers who have trial versions. You can access the Quest Support Portal at <https://support.quest.com>.

The Support Portal provides self-help tools you can use to solve problems quickly and independently, 24 hours a day, 365 days a year. The Support Portal enables you to:

- Submit and manage a Service Request
- View Knowledge Base articles
- Sign up for product notifications
- Download software and technical documentation
- View how-to-videos
- Engage in community discussions
- Chat with support engineers online
- View services to assist you with your product

# Third-party contributions

This product contains the following third-party components. For third-party license information, go to <https://www.quest.com/legal/license-agreements.aspx>. Source code for components marked with an asterisk (\*) is available at <https://opensource.quest.com>.

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work

(an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

**Component****License or acknowledgement**

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

(a) You must give any other recipients of the Work or Derivative Works a copy of this License; and

(b) You must cause any modified files to carry prominent notices stating that You changed the files; and

(c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and

(d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any

**Component****License or acknowledgement**

Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

SharpZipLib 0.81.0.1407	<p>The library is released under the GPL with the following exception:</p> <p>Linking this library statically or dynamically with other modules is making a combined work based on this library. Thus, the terms and conditions of the GNU General Public License cover the whole combination.</p> <p>As a special exception, the copyright holders of this library give you permission to link this library with independent modules to produce an executable, regardless of the license terms of these independent modules, and to copy and distribute the resulting executable under terms of your choice, provided that you also meet, for each linked independent module, the terms and conditions of the license of that module. An independent module is a module which is not derived from or based on this library. If you modify this library, you may extend this exception to your version of the library, but you are not obligated to do so. If you do not wish to do so, delete this exception statement from your version.</p> <p>Note The exception is changed to reflect the latest GNU Classpath exception. Older versions of #ziplib did have another exception, but the new one is clearer and it doesn't break compatibility with the old one.</p> <p>Bottom line In plain English this means you can use this library in commercial closed-source applications.</p>
