### ApexSQL Azure DevOps toolkit - Azure DevOps Server (TFS) / Azure DevOps Services plugin

Release: 2018.10.0146  
Date: March 08, 2019

#### Features:

- Native Azure DevOps Server (TFS) / Azure DevOps Services plugin

- Support for Team Foundation Server (TFS) 2015, TFS 2017, TFS 2018, Azure DevOps Server 2019 RC2, Azure DevOps Services
- Continuous integration:
  - Build a SQL Server database directly from source control and optionally include static data
  - Fill empty tables with synthetic data
  - Integrate trigger-based audit trails and reporting into change sensitive database objects
  - Generate full or differential documentation for the SQL Server database
  - Test SQL Server database using unit tests
  - Enforce database best practices by reviewing, detecting and fixing issues
  - Create a clean database package for easy deployment
  - Publish package to a designated NuGet feed
- Continuous delivery:
  - Compare SQL Server database schemas and create a script for schema synchronization
  - Compare SQL Server static data and create a script for data synchronization
  - Push schema and data changes to a target database
- Archive all output files in a central folder
- Automatically create rollback scripts
- Flexible pipelines
