Installing This Update

1. Download the zip file that contains the full build update.

Warning: Some computers have security settings enabled that block zip files that come from other computers. Right click on the zip file and choose Properties. If blocking is enabled, you will see an "Unblock" button on the bottom right hand corner of the Properties dialog. Press "Unblock" and then press the OK button. Proceed to unzip the file.

2. As an Administrator, run the executable that was extracted from the zip file.
3. Install the "PAConsole_Pro.msi" on the computer where the console is installed or desired to be installed. This MSI will automatically upgrade over the top of previous installations of the console.
4. If the "Deploy Client" feature is configured to deploy the client to target machines, then this process will automatically trigger the new PAClient.msi to be pushed out to the configured computers.
5. If the "Deploy Client" feature was not used to deploy the client to target machines, then use the desired MSI deployment mechanism to push the "PAClient.msi" included in this update out to target computers

Refer to KACE Privilege Manager v4.3 product documentation for additional information on how to install KACE Privilege Manager.

Determining if This Update Is Installed

To determine if this update is installed:

In the "Programs and Features" applet of the Windows Control Panel, look for "Privilege Manager Console 4.3" in the list of programs. If you find version 4.3.2.48 in the list, this version is already installed.

[Back to Top](#)

Removing This Update

To remove this update:

Refer to KACE Privilege Manager v4.3 product documentation for instructions on how to uninstall KACE Privilege Manager.

Quest provides software solutions for the rapidly-changing world of enterprise IT. We help simplify the challenges caused by data explosion, cloud expansion, hybrid datacenters, security threats, and regulatory requirements. We are a global provider to 130,000 companies across 100 countries, including 95% of the Fortune 500 and 90% of the Global 1000. Since 1987, we have built a portfolio of solutions that now includes database management, data protection, identity and access management, Microsoft platform management, and unified endpoint management. With Quest, organizations spend less time on IT administration and more time on business innovation. For more information, visit www.quest.com.

Technical support resources

Technical support is available to Quest customers with a valid maintenance contract and customers who have trial versions. You can access the Quest Support Portal at <https://support.quest.com>.

The Support Portal provides self-help tools you can use to solve problems quickly and independently, 24 hours a day, 365 days a year. The Support Portal enables you to:

- Submit and manage a Service Request
- View Knowledge Base articles
- Sign up for product notifications
- Download software and technical documentation
- View how-to-videos
- Engage in community discussions
- Chat with support engineers online
- View services to assist you with your product.
