About MessageStats Report Pack for Lotus and IBM Notes 7.6

MessageStats is a Windows-based data collection and reporting application that facilitates the analysis of messaging statistics for a number of messaging environments. With the extensive information that MessageStats gathers, MessageStats provides an extremely flexible web-based reporting engine that allows all interested individuals to view messaging information and to package the information in many different ways. All reports are available by accessing the web site directly, by signing up for automated subscriptions that can be sent to any email address, or through export to a number of supported formats.

The MessageStats Report Pack for Lotus and IBM Notes extends MessageStats by adding the ability to gather configuration and content information for the Lotus or IBM Notes environment. The report pack stores the information in the MessageStats database, to which additional tables are added when you install the report pack. The database provides content for the web-based MessageStats Reports. You can use the report pack as an assessment tool in planning for a Notes to Exchange migration.

MessageStats Report Pack for Lotus and IBM Notes 7.6 is a minor release, with enhanced features and functionality. See [Known issues](#).

Known issues

The following is a list of issues, including those attributed to third-party products, known to exist at the time of release.

Table 1. Gathering known issues

Known issue	Issue ID
Unable to run domain level tasks after deleting all servers from the domain using Database Management. If you have deleted all the Domino server objects in a domain and do not delete the Domino domain for the servers, it still appears in the treeview but all tasks run against the domain will fail. You must also delete the Domino domain using the Database Management.	113943
The Server Storage gathering, which collects the Domino server disk space information, supports only English-based locales. If the Domino server against which the Server Storage gathering is run has a non-English locale, the information is not correctly parsed.	229466
To be able to enumerate the databases on the Domino server, the report pack requires that there be a database catalog (catalog.nsf) available locally on each Domino server.	NA

System requirements

You install the report pack components on servers on which the core MessageStats components are already installed. You must meet the software requirements for MessageStats. See the *MessageStats Release Notes* for the software requirements for the different MessageStats components.

The following table contains any additional requirements for the report pack:

Table 2. System minimum requirements

Requirement	Details
Hard disk space	20 MB of free disk space for the report pack application in addition to the space required for the core MessageStats product. The space requirement varies depending on the size of the database.
MessageStats Server (scheduler service and task processors)	The Notes client must be installed on the server that hosts the MessageStats task processors. NOTE: The Notes client must have been opened at least once and connected to a Domino server before the client can be used in MessageStats. MDAC (Microsoft Data Access Components) 2.7 SP 2 Refresh is required for a distributed installation. MDAC must be installed on the IIS Server and MessageStats console server; however, MDAC is not required for the database components.
Task Execution Server	The Notes client must be installed on each server that hosts the MessageStats task processors. NOTE: The Notes client must have been opened at least once and connected to a Domino server before the client can be used by MessageStats.
MMC Client Console	Microsoft .Net Framework 4.7.2 must be installed on the server that hosts the MessageStats MMC Client Console.
Supported Environment	At least one server running Lotus Domino 6.0, Lotus Domino 8.0, Lotus Domino 8.5, or IBM Domino 9.0 or 9.0.1.
Additional software	MessageStats 7.6

For detailed system requirements and list of rights and permissions necessary for product operation please refer to the *MessageStats Report Pack for Lotus and IBM Notes User Guide*.

Product licensing

This report pack does not require licensing.

Getting started with MessageStats Report Pack for Lotus and IBM Notes 7.6

The release package contains the following products:

- MessageStats Report Pack for Lotus and IBM Notes
- Product documentation, including:
 - *MessageStats Report Pack for Lotus and IBM Notes User Guide*
 - Online Help

Installation Instructions

Refer to *MessageStats Report Pack for Lotus and IBM Notes User Guide* for installation instructions.

Globalization

This section contains information about installing and operating this product in non-English configurations, such as those needed by customers outside of North America. This section does not replace the materials about supported platforms and configurations found elsewhere in the product documentation.

This release is Unicode-enabled and supports any character set. In this release, all product components should be configured to use the same or compatible character encodings and should be installed to use the same locale and regional options. This release is targeted to support operations in the following regions: North America, Western Europe and Latin America, Central and Eastern Europe, Far-East Asia, Japan.

About us

Quest provides software solutions for the rapidly-changing world of enterprise IT. We help simplify the challenges caused by data explosion, cloud expansion, hybrid datacenters, security threats, and regulatory requirements. We are a global provider to 130,000 companies across 100 countries, including 95% of the Fortune 500 and 90% of the Global 1000. Since 1987, we have built a portfolio of solutions that now includes database management, data protection, identity and access management, Microsoft platform management, and unified endpoint management. With Quest, organizations spend less time on IT administration and more time on business innovation. For more information, visit www.quest.com.

Technical support resources

Technical support is available to Quest customers with a valid maintenance contract and customers who have trial versions. You can access the Quest Support Portal at <https://support.quest.com>.

The Support Portal provides self-help tools you can use to solve problems quickly and independently, 24 hours a day, 365 days a year. The Support Portal enables you to:

- Submit and manage a Service Request.
- View Knowledge Base articles.
- Sign up for product notifications.
- Download software and technical documentation.
- View how-to-videos.
- Engage in community discussions.
- Chat with support engineers online.
- View services to assist you with your product.

Third-party contributions

This product contains the following third-party components. For third-party license information, go to <http://www.quest.com/legal/license-agreements.aspx>. Source code for components marked with an asterisk (*) is available at <http://opensource.quest.com>.

Table 3. List of third-party contributions
