Overview of On Demand

On Demand is a cloud based management platform that provides access to multiple Quest Software tools for Microsoft product management through a unified interface. Cloud based is a term that refers to applications, services or resources made available to users on demand via the Internet. Quest On Demand is a Software as a Service (SaaS) application where application software is hosted in the cloud and made available to users through quest-on-demand.com.

On Demand management is based on the concepts of organizations, modules, and Azure Active Directory (AD) tenants. When you sign up for the On Demand service, you create an organization. The organization can subscribe to modules. Organization administrators can use the tools provided by the modules to perform administrative actions on Azure AD tenants.

Modules

Each management tool is referred to as a module. Currently, the following modules are available:

- Audit
- Group Management
- License Management
- Migration
- Recovery

Global Settings

On Demand Global Settings refers to management tools and configuration settings that apply to all On Demand modules. This includes tenant management tasks and downloading activity trail logs.

Organizations

On Demand administration is based on organizations. When a user signs up for On Demand, an organization is created.

You can add users to an organization. To add a user, click Settings in the navigation panel on the left and then click Permissions.

Azure Active Directory tenants

Microsoft Azure also uses the concept of an organization. An Azure Active Directory (Azure AD) tenant is representative of an organization. It is a dedicated instance of the Azure AD service that an organization receives

and owns when it signs up for a Microsoft cloud service such as Azure, Microsoft Intune, or Office 365. Each Azure AD tenant is distinct and separate from other Azure AD tenants.

A tenant houses the users in a company and the information about them - their passwords, user profile data, permissions, and so on. It also contains groups, applications, and other information pertaining to an organization and its security. For more information see this [Microsoft help page](#).

Signing up for On Demand

On Demand is a Software as a Service (SaaS) application. SaaS is a software licensing and delivery model in which application software is licensed on a subscription basis. The On Demand software is hosted in the cloud by Quest Software and made available to users through the internet. This section contains information regarding signing up for the On Demand service.

Organizations and regions	This section provides an overview of organizations and regions. You can configure organizations and regions after you sign up.
Multi-factor Authentication	Information on how to enable multi-factor authentication.
On Demand trials and subscriptions	You must start a trial or purchase a subscription to begin using On Demand services.
Signing up and creating an organization	A task flow of the sign up process with links to step by step procedures.

Organizations and regions

On Demand management is based on the concepts of organizations. When you sign up for the On Demand service, you create an organization and you become the organization administrator. The organization can subscribe to modules. Organization administrators can use the tools provided by the modules to perform administrative actions on Azure AD tenants. You can add additional organization administrators and module administrators that have access to specific modules.

For most On Demand use cases, a customer creates a single organization. Multiple administrators and multiple tenants can be added to the organization.

CAUTION: Adding a tenant to multiple organizations.

Adding the same tenant to multiple organizations can result in conflicting application of policies and settings. When using multiple organizations to manage a tenant, the organization administrators must coordinate their management activities.

A Microsoft Azure region is a set of datacenters deployed within a geographic area. Selecting the correct region for your organization enables you to achieve higher performance and supports your requirements and preferences regarding data location. Specifying the region for your organization determines the geographical region where your data is stored. For more information, see [Azure regions](#).

During sign up, you can choose the region where your On Demand data will be hosted. The following regions are currently supported:

- Australia
- Canada
- Europe
- United Kingdom
- United State

For more information, see [Geographic regions](#).

Multi-factor Authentication

Multi-factor authentication (MFA) increases the security of the sign in process. With MFA, a user is granted access only after presenting two or more pieces of evidence (or factors) to an authentication mechanism.

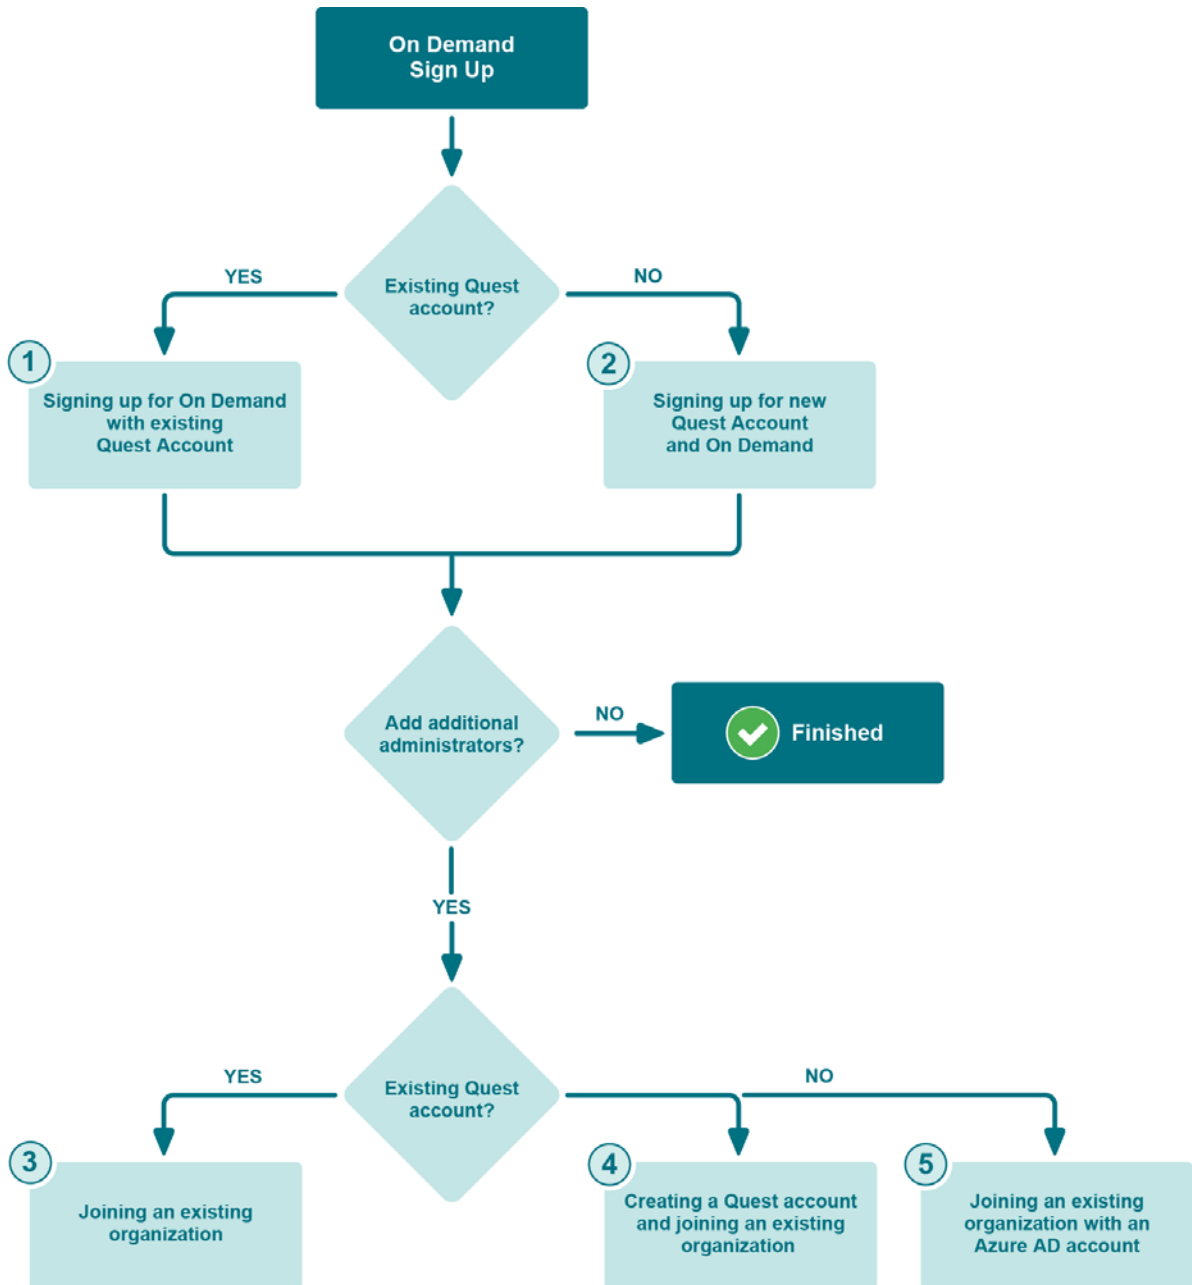

Microsoft accounts can be MFA-enabled. To enable multi-factor authentication (MFA) when signing in to OnDemand, select **Sign in with Microsoft** on the Sign In page and login with your Microsoft MFA-enabled account.

On Demand trials and subscriptions

Once you have signed in to and created an organization, you have the option to begin a trial or purchase a subscription for modules. In the side navigation panel, click Services to open a page with module information and Learn More links that take you to the appropriate Quest web sites.

Signing up and creating an organization

The flow chart below shows the sign up process.

Signing in to On Demand with your existing Quest account

1

Signing up for a new Quest account and signing in to On Demand

2

Trying On Demand as a Guest User

3

Adding users to an organization

4

Signing in to On Demand with your existing Quest account

You may already have a Quest account if you currently use other Quest products. Use this procedure to sign in to with your Quest account and create a new On Demand organization.

i | **NOTE:** To enable multi-factor authentication (MFA) when signing in to OnDemand, select **Sign in with Microsoft** on the Sign In page and login with your Microsoft MFA-enabled account.

To sign in to On Demand using your Quest account:

- 1 Go to the web page quest-on-demand.com.
The "Welcome to On Demand" page opens.
- 2 Under **Already have an account**, click **Sign In**.
The "Sign in" page opens.
- 3 Enter your Quest account credentials.
- 4 Click **Sign In**
A page opens that states, "We are unable to locate any organizations for your account". Click the link **Click here**.
The "Subscribe" page opens.
- 5 Complete the required fields. Use your Quest credentials for the email and password.
- 6 Click **Subscribe**.
The Welcome to On Demand page opens.
- 7 In the **Add organization** name field, enter a name for your On Demand organization.
- 8 In the **Select Region** field, select the region where you want your data to reside.
- 9 Click **Create New Organization**.

You are signed in to your organization. You are an On Demand administrator for the organization.

Signing up for a new Quest account and signing in to On Demand

Prerequisites

To perform this procedure, you must have a valid email account where you can receive a verification email from support.quest.com.

i | **NOTE:** To enable multi-factor authentication (MFA) when signing in to OnDemand, select **Sign in with Microsoft** on the Sign In page and login with your Microsoft MFA-enabled account.

Use this procedure to create a Quest account and create a new On Demand organization.

To sign up for a new Quest account:

- 1 Go to the web page quest-on-demand.com.
The "Welcome to On Demand" page opens.
- 2 Under **Create a Quest account** click **Sign Up**.
The "Create a Account" page opens.
- 3 Enter your credentials for your new Quest account.
Note that the email and password entered here will be the credentials you use to sign in to On Demand.

- 4 Click the check box to agree to Quest's privacy policy and terms of use.
- 5 Click **Sign Up**.
The "We've sent you an email" page opens.
- 6 Go to your email account and open the email from `support.quest.com`.
- 7 Click on the **Verify email address** link.
The "Welcome to On Demand" page opens.
- 8 In the **Add organization name** field, enter a name for your On Demand organization.
- 9 In the **Select Region** field, select the region where you want your data to reside.
- 10 Click **Create Organization**.

You are signed in to your organization. You are an On Demand administrator for the organization.

Trying On Demand as a Guest User

You can try On Demand by signing in with an email address and scanning your environment. This process provides a dashboard view based on your data.

When you sign in as a guest user, a Quest account is associated with your email address and an On Demand organization is created for you.

Prerequisites

In order to scan your environment and provide a dashboard view based on your data, you must add a tenant. Admin consent is required to add a tenant to On Demand. Since only an Azure Global administrator can grant admin consent, you must be able to provide Azure Global administrator credentials for the tenant you are adding.

To sign in as a guest user

- 1 Go to the web page quest-on-demand.com.
The "Welcome to On Demand" page opens.
- 2 Under **Explore On Demand** click **Continue as Guest**.
The Guest User Demo Dashboard opens.
- 3 In the top right of the screen, click **Scan My Environment** and follow the steps to add your Azure AD tenant.

Managing organizations and regions

On Demand management is based on the concept of organizations. An organization can subscribe to modules. Organization administrators can use the tools provided by the modules to perform administrative actions on Azure AD tenants.

When a user signs up for On Demand, an organization is created and the user becomes an administrator for the organization. For most On Demand use cases, a customer creates a single organization. Multiple administrators and multiple tenants can be added to the organization. See [Signing up for On Demand](#).

Use the links below for more information on managing organizations and regions.

- [Geographic regions](#)
- [Multiple organizations](#)
- [Displaying the current organization and region](#)
- [Creating a new organization](#)
- [Switching organizations](#)
- [Renaming organizations](#)
- [Displaying the organization ID](#)

i | **NOTE:** To delete an organization, contact [Technical Support](#).

Geographic regions

A Microsoft Azure region is a set of data centers deployed within a geographic area. Selecting the correct region for your On Demand organization enables you to achieve higher performance and supports your requirements and preferences regarding data location. Specifying the region for your organization determines the geographical region where your data is stored. For more information, see [Azure regions](#).

During sign up, you can choose the region where your On Demand data will be hosted. The following regions are currently supported:

- United States
- Europe
- United Kingdom
- Canada
- Australia

Regional availability of modules

Microsoft continues to deploy services across Azure regions. However, at this time, not all services are available in all regions. As a result, not all On Demand modules are available in all regions. The table below lists current module availability by region. When you create an organization in a region, only the available module tiles are displayed on your home page.

Region	Available Modules
U.S.	<ul style="list-style-type: none"> • Audit • Group Management • License Management • Migration • Recovery
Europe	<ul style="list-style-type: none"> • Audit • Group Management • License Management • Migration • Recovery
U.K.	<ul style="list-style-type: none"> • Audit • Group Management • License Management • Migration • Recovery
Canada	<ul style="list-style-type: none"> • Audit • Group Management • License Management • Migration • Recovery
Australia	<ul style="list-style-type: none"> • Audit • Group Management • License Management • Migration

Multiple organizations

Some customers may want to create multiple organizations. For example:

- A managed service provider (MSP) can create an organization for each client.
- A global company can create separate organizations for employees by geographic region.

When you sign up for On Demand, you are prompted to name your organization. Users with multiple organizations associated with their email address are prompted to select an organization during sign in.

! CAUTION: Adding a tenant to multiple organizations.

Adding the same tenant to multiple organizations can result in conflicting application of policies and settings. When using multiple organizations to manage a tenant, the organization administrators must coordinate their management activities.

Displaying the current organization and region

You can display the organization you are currently signed in to and its region by clicking on your email address in the top menu bar. The menu displays:

- **Region Name**
- **Organization Name**

Creating a new organization

As an On Demand user, there may be no organizations associated with your account. This can happen if you have been removed from all organizations. In this case, after you sign in, the Welcome to On Demand page opens where you can create a new organization. Follow the steps below to create an organization.

If you are currently signed in to , you can create a new organization by clicking your email address in the menu bar at the top of the page and selecting **Create New Organization**. Follow the steps below to create an organization.

i | **TIP:** On the Create New Organization page, if you decide not to create a new organization, click on your browser back button to return to and your original organization.

i | **NOTE:** To delete an organization, contact [Technical Support](#).

To create a new organization:

- 1 Enter an organization name.
- 2 Select a region.
- 3 Click **Create New Organization**.

Switching organizations

If you have multiple organizations associated with your email address, you are prompted to select an organization when you sign in. Once you are signed in, you can switch to another organization.

To switch to another organization:

- 1 In the top menu bar, on the right hand side, click on your user email address.
- 2 Select **Switch Organization**.
The Multiple Organizations Found page opens.
- 3 Click on the organization you want to switch to.
- 4 Click **Select Organization**.

Renaming organizations

You can rename the organization you are currently signed in to.

Prerequisites

You must be an On Demand organization administrator to rename an organization.

To rename an organization:

- 1 Sign in to the organization that you want to change.

- 2 In the top menu bar, on the right hand side, click on your user email address.
- 3 Click **Organization Name**.
The Manage Organization page opens.
- 4 In the **Set organization name** field, enter the new name.
- 5 Click **Update**.
You are returned to On Demand home page.

Displaying the organization ID

Each organization has a unique organization ID. This ID may be required by technical support to troubleshoot issues. The **Organization ID** is displayed on the Manage Organizations page.

To display the organization ID:

- 1 In the top menu bar, on the right hand side, click on your user email address.
- 2 Click **Organization Name**.
The Manage Organization page opens.
- 3 Click the browser back arrow to return to the Home page.

Adding users to an organization

Once you have created an organization, you can add additional users and determine what tasks each user can perform.

For a list of access control procedures, see the task flow [Adding a user and assigning a role](#).

Users and roles

When you add a user to an organization, you also assign one or more roles. The role assignment determines what permission level a user has and ultimately, what tasks the user can perform. Assigning roles and setting user permissions is referred to as access control.

Access control is a process by which users are granted access and certain privileges to systems, resources, or information. In On Demand, you can grant authenticated users access to specific resources based on your company policies and the permission level assigned to the user.

On Demand comes configured with a number of default roles. The default role permissions settings cannot be changed, but you can create custom roles with specific permission settings to align with your company policies. You can assign multiple roles to each user in order to combine permission sets.

NOTE: Every user must be assigned to at least one role. You cannot remove all roles from a user.

Default roles and their permission settings are described below.

The On Demand access control interface is comprised of two pages.

- For information specific to configuring roles, see [Access Control: Roles](#)
- For information specific to managing users, see [Access Control: Users](#)

Default roles

On Demand is configured with default roles that cannot be edited or deleted. You can duplicate default roles to create custom roles. The default roles are listed below.

On Demand administrator

On Demand administrators have full access to global settings and all modules. The user who signed up for On Demand and created the organization is automatically assigned the On Demand Administrator role.

Module administrator

Module administrators only have access to the specific module where they have been added as an administrator. Module administrators do not have access to global settings or tenants.

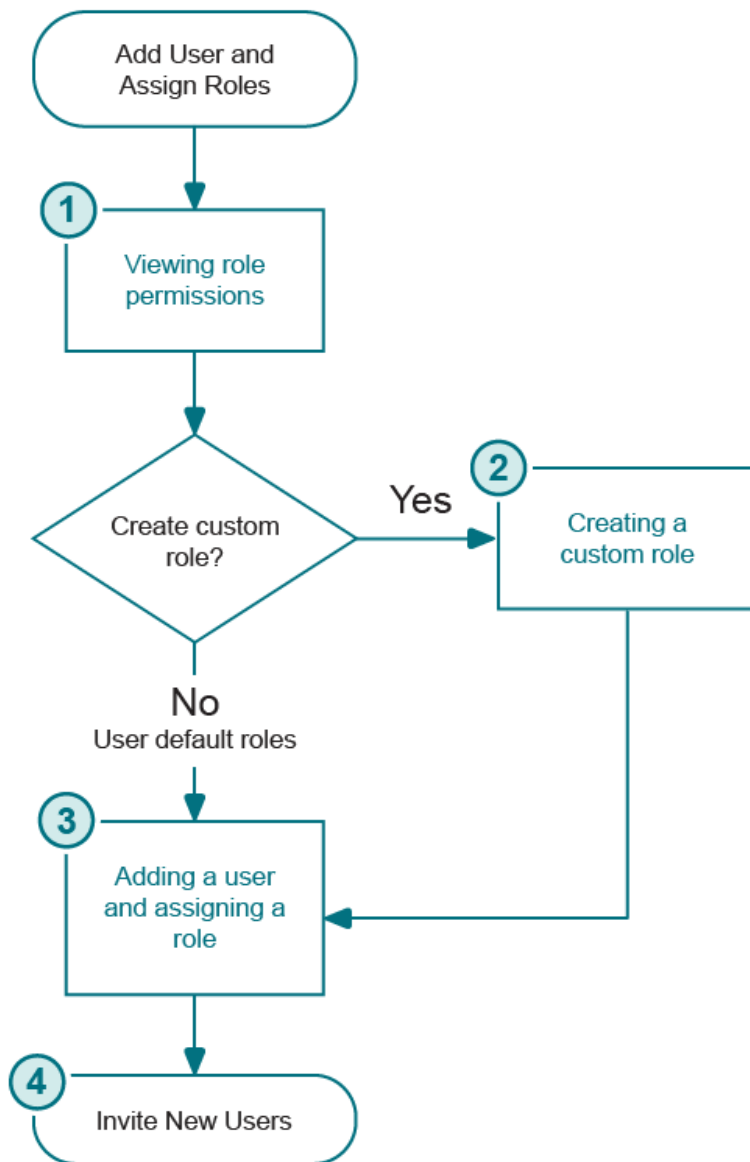

Default role permissions

Role	Permissions
On Demand Administrator (also has all module permissions)	<ul style="list-style-type: none">• Can rename the organization• Can read access control roles• Can create, delete, and assign access control roles• Can add and remove tenants• Can read Activity Trail Specific services can be selected for this permission.
Recovery Administrator	<ul style="list-style-type: none">• Can manage backup settings• Can download hybrid credentials• Can run backup manually• Can unpack backups• Can run difference Report• Can restore from objects• Can restore from differences• Can read backup history• Can read unpacked objects• Can read differences• Can read task history• Can read events• Can read restore attributes• Can read UI projects• Can read UI collections• Can manage events• Can manage project settings
Audit Administrator	Can configure auditing and manage searches Specific services can be selected for this permission.
Group Management Administrator	<ul style="list-style-type: none">• Can configure and manage group management• Can approve ,reject, or cancel a request
Migration Administrator	Can configure and run migrations
License Management Administrator	Can read licenses

Adding a user and assigning a role

The flow chart below shows the process for adding users and assigning a role. The first step is to view the default role permissions settings. If required, you can create custom roles with specific permission settings to align with your company policies.

Once you have added a user, you must invite the user to sign in to the organization.

Viewing role permissions

1

Creating a custom role

2

Adding a user to your organization and assigning a role

3

Inviting new users

4

Access Control: Roles

Each access control role has a specific set of permissions that determines what tasks a user assigned to the role can perform. Your On Demand organization comes configured with a number of default roles. The default role permissions settings cannot be changed, but you can create custom roles with specific permission settings to align with your company policies.

i | **NOTE:** To manage access control roles, you must have the permission "Can create, delete, and assign access control roles".

Perform the following tasks from the access control Roles page:

- [Viewing role permissions](#)
- [Creating a custom role](#)
- [Editing a custom role](#)
- [Adding a user to a role](#)
- [Deleting a custom role](#)

Viewing role permissions

Use the Roles page to view the list of roles defined for your organization. You can also view the users assigned to each role.

To view roles and permissions:

- 1 In the side navigation panel, expand the **Access Control** item and select **Roles**.
- 2 Click on a role name to open a read only page that displays the **Role Permissions**. The panel on the right is a list of users assigned to the role.
- 3 To add users to the role, see [Access Control: Users](#).

Creating a custom role

You can create roles with a custom set of permissions. Default roles cannot be edited. You must create a custom role to enable editing.

To create a role:

- 1 In the side navigation panel, expand the **Access Control** item and select **Roles**.
- 2 At the top right of the Roles page, click **Create Role**.
Note that you can define a role based on an existing role. In the **Roles** list, click on the **Action** menu for a role and select **Duplicate**.
- 3 On the Create Role page, enter a **Role Name** and **Description**.
- 4 Under **Role Permissions**, select the check boxes for the permissions you want to assign to the role. Some role permissions are partitioned into services. If available, you can configure access to a service using the **Selected Services** field.
- 5 At the top right of the page, click **Create Role**.
You are returned to the Roles page and there is a prompt to **Assign Users**.
- 6 To add a user to the role, click **Assign Users**.
- 7 In the **Add User to <custom_role>** field, enter the email address of the user you want to add.

- 8 Click **Add User**.
Note that if the user is not currently a member, they are added to the organization.

Editing a custom role

Note that you cannot edit a default role. You can duplicate a default role and edit it to create a custom role.

To edit a role:

- 1 In the side navigation panel, expand the **Access Control** item and select **Roles**.
- 2 In the **Roles** list, click on the **Action** menu for a role and select **Edit**.
- 3 On the Edit Role page, you can edit:
 - Name**
 - Description**
 - Role Permissions.**
Some role permissions are partitioned into services. If available, you can configure access to a service using the **Selected Services** field.
- 4 Click **Save**.
You are returned to the Roles page and there is a prompt to **Assign Users**.
- 5 To add a user to the role, click **Assign Users**.
- 6 In the **Add User to <custom_role>** field, enter the email address of the user you want to add.
- 7 Click **Add User**.
Note that if the user is not currently a member, they are added to the organization.

Adding a user to a role

i | **NOTE: Email notification**
When a user is added to a role, the user receives an email informing them of the action.

To add a user to a role:

- 1 In the side navigation panel, expand the **Access Control** item and select **Roles**.
- 2 In the **Roles** list, click on the **Action** menu for a role and select **Assign Users**.
The Assign Role page opens.
- 3 In the **Add a user to this role** field, enter the email address of the user you want to add.
The user name must use the email address format <local_part>@<domain>.
- 4 Click **Add User**.
The user is assigned to the role and has the permission set defined by the role.

Deleting a custom role

You cannot delete a default role.

Before deleting a role, you must remove all users from the role and either assign them a new role or remove them from the organization.

To delete a role:

- 1 In the side navigation panel, expand the **Access Control** item and select **Roles**.

- 2 In the **Roles** list, click on the **Action** menu for a role and select **Delete**.
- 3 In the confirmation window, click **Delete**.
You are returned to the Roles page.

Access Control: Users

Organization user credentials are based on email addresses. To log in to On Demand using the email address, the user must create a On Demand account with the email address. To create an On Demand account, see [Signing up and creating an organization](#).

Perform the following tasks on the access control Users page:

- [Adding a user to your organization and assigning a role](#)
- [Editing user roles](#)
- [Removing a user from the organization](#)

Once you have added a user, inform them that they have been added to an organization and specify the email address or Azure AD account used. Direct the new users to sign in to the organization using the procedures under [Inviting new users](#).

Adding a user to your organization and assigning a role

On Demand is configured with default roles. To create a custom role, see [Access Control: Roles](#).

i | **NOTE: Email notification**
When a user is added to a role, the user receives an email informing them of the action.

To add a user:

- 1 In the side navigation panel, expand the **Access Control** item and select **Users**.
- 2 In the **User Name** field, enter the email address of the user you want to add.
The user name must use the email address format <local_part>@<domain>.
- 3 In the **Assigned Role** field, enter the role name. An auto-complete list offers suggestions based on your input.
You must select a role to enable the **Add** button.
- 4 Click **Add**.

Editing user roles

On Demand is configured with default roles. To create a custom role, see [Access Control: Roles](#).

i | **NOTE: Email notification**
When a user is added to a role, the user receives an email informing them of the action.

To assign a new role:

- 1 In the side navigation panel, expand the **Access Control** item and select **Users**.
- 2 In the list of users, locate the user you want to edit in the **User Name** column.
- 3 On the right side of the **Role** field for the user, click the edit icon to make the **Role** field editable.

- 4 Click inside the editable **Role** field and begin typing the name of the role you want to add. An auto-complete list offers suggestions based on your input.
- 5 Enter the role name you want to add. An auto-complete list offers suggestions based on your input.
- 6 Select the role from the list.
- 7 Add additional roles or remove assigned roles as required.
- 8 Click the check mark to confirm the role assignment.

Removing a user from the organization

i | **NOTE: Email notification**

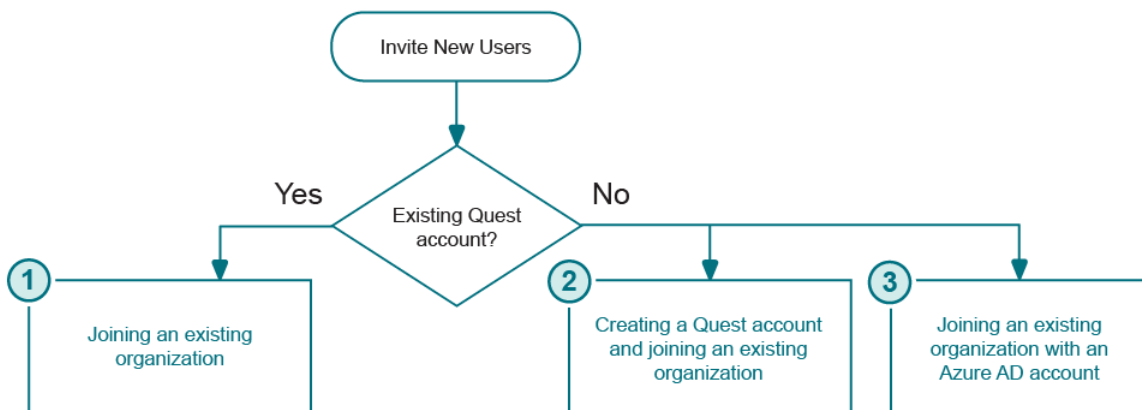

When a user is removed from the organization, they receive an email informing them that they no longer have access to the organization.

To remove a user:

- 1 In the side navigation panel, expand the **Access Control** item and select **Users**.
- 2 In the list of users, locate the user you want to delete in the User **Name** column.
- 3 In the **Action** field for the user, click the delete icon.
- 4 In the confirmation window, click **Remove**.

Inviting new users

Once you have added a user, inform them that they have been added to an organization and specify the email address or Azure AD account used. Direct the new users to the following procedures to sign in to the organization.

Creating a Quest account and joining an existing On Demand organization

1

2

3

Creating a Quest account and joining an existing On Demand organization

This procedure is for new On Demand users. You do not need to create a Quest account to join an existing On Demand organization. However, creating a Quest account allows you to access On Demand resources such as the support site.

If do not want to create a Quest account or you already have an On Demand account and an administrator has added you to their organization, see [Joining an existing On Demand organization](#).

Prerequisites

- You must have a valid email account where you can receive a verification email from `support.quest.com`.
- An administrator for the organization must have added you to the organization.

To join an organization:

- 1 Go to the web page quest-on-demand.com and under **Create a Quest account** click **Sign Up**. The "Create a Quest Account" page opens.
- 2 Enter your credentials for your new account.
Note that the email and password entered here will be the credentials you use to sign in to On Demand.
- 3 Click the check box to agree to Quest's privacy policy and terms of use.
- 4 Click **Sign Up**. The "We've sent you an email" page opens.
- 5 Go to your email account and open the email from `support.quest.com`.
- 6 Click on the **Verify email address** link.
- 7 The On Demand home page opens. You are signed in to the organization that your were added to.

Joining an existing On Demand organization

This procedure is for users that want to join an existing organization.

Prerequisites

- An administrator for the organization must have added you to the organization.

i | **NOTE:** An administrator can add you to an organization by specifying your Azure AD account. See [Joining an existing On Demand organization with an Azure AD account](#).

- If multiple On Demand organizations are associated with your email account, you must know the name of the organization you want to sign in to. After sign in, the "Select Organization" page is displayed where you must select the organization that you want to sign in to.

To join an organization:

- 1 Go to the web page quest-on-demand.com.
The "Welcome to On Demand" page opens.
- 2 Under **Already have an account**, click **Sign In**.
The "Sign in" page opens.
- 3 Enter your email account credentials.
- 4 Click **Sign In**.
 - If only one organization is associated with your email account, the On Demand home page opens. You are signed in to the organization that you were added to.
 - If there are multiple organizations associated with your email account, the "Multiple Organizations Found" page opens with a list of organizations. Click the organization you want to sign in to and then click **Select Organization**.

Joining an existing On Demand organization with an Azure AD account

You can use your Azure AD account to join an existing On Demand organization. Using your Azure AD account is referred to as federated identity management.

Federated identity management can increase security and lower risk by enabling an organization to identify and authenticate a user once, and then use that identity information across multiple systems, including external partner websites such as On Demand.

Prerequisites

- An administrator for the organization must have added you to the organization.
- If multiple On Demand organizations are associated with your email account, you must know the name of the organization you want to sign in to. After sign in, the "Select Organization" page is displayed where you must select the organization that you want to sign in to.

To join an organization with an Azure AD account:

- 1 Go to the web page quest-on-demand.com.
The "Welcome to On Demand" page opens.
- 2 Under **Already have an account**, click **Sign In**.
The "Sign in" page opens.
- 3 At the bottom of the page, click **Sign in with Microsoft**.
 - If only one organization is associated with your email account, the On Demand home page opens. You are signed in to the organization that you were added to.
 - If there are multiple organizations associated with your email account, the "Multiple Organizations Found" page opens with a list of organizations. Click the organization you want to sign in to and then click **Select Organization**.

Managing tenants

A tenant is a dedicated instance of Azure Active Directory (Azure AD) that your Microsoft organization receives and owns when it signs up for a Microsoft cloud service such as Azure or Office 365. For more information, see this [Microsoft help page](#).

This section contains information on adding and removing tenants.

- [Tenant overview](#)
- [Adding a tenant](#)
- [Managing admin consent](#)
- [Removing a tenant](#)

Tenant overview

The Tenants page provides an overview of all your tenants. It shows the number of users, consent status, and provides access to admin consent for the different On Demand modules.

Number of users in the tenant

On the Tenants page, each tenant tile lists the number of Users in the tenant. The user count is divided into **Cloud only** and **Hybrid** users. Hybrid users are Microsoft identities that can access both on-premises and cloud based resources.

Azure AD tenant

A tenant houses the users in a company and the information about them. You must add a tenant in order to manage the tenant properties using an On Demand module.

Applications used to manage Azure AD tenant properties must participate in the consent flow provided by Azure AD. This means an Azure Global Administrator must provide admin consent when adding a tenant to On Demand. Admin consent is granted on behalf of the Microsoft Azure organization.

B2C tenants

In addition to the standard Azure AD tenant, you can also add an Azure AD B2C tenant. On the Tenant page, Azure AD B2C tenants can be distinguished by the following icon next to the tenant name:

For more information on B2C tenants, see this [Microsoft help page](#).

Azure Global administrator

The Azure Global Administrator role is the top level administrator role and has access to all features. By default, the person who signs up for an Azure subscription is assigned the Global Administrator role for the tenant. Additional users can be assigned to the Global administrator role.

In On Demand, once you select Add tenant, you are redirected to the Microsoft tenant administration login page where you must log in with the Global Administrator credentials for the tenant. Then, you are redirected to a page that lists the permissions that will be granted. You must click **Accept** and provide admin consent for the On Demand application. Once the Global Administrator adds a tenant to On Demand, an application record is created in the tenant indicating that admin consent has been provided.

i | **NOTE:** Global Admin credentials are only required to grant admin consent for the minimal list of permissions required by On Demand. Global Admin credentials are not stored, share, or used for any other purpose.

Admin consent permission levels

For security, when you first add a tenant, only the minimum permission settings are granted. Some modules require additional permissions. Once a tenant has been added to On Demand, you can grant additional permissions on the [Admin consent status](#) page.

Adding a tenant

When you add a tenant, you must have Global Administrator credentials in Microsoft Azure since part of the process of adding a tenant is done in the Microsoft Azure portal.

Prerequisites

Admin consent is required to add a tenant to On Demand. Since only an Azure Global Administrator can grant admin consent, you must be able to provide Azure Global administrator credentials for the tenant you are adding.

To add a tenant

- 1 Log in to On Demand using the credentials you used to sign up for On Demand.
- 2 In the navigation panel on the left, click **Tenants**.
- 3 On the Tenants page, click **Add tenant**.
You are redirected to the Microsoft login page.
- 4 Enter your Azure AD Global Administrator credentials and click **Next**.
A page opens with the list of permissions that you are granting.
- 5 Click **Accept**.
The On Demand Tenants page is displayed.
- 6 On the Tenants page, at the bottom of the tile for the newly added tenant, click **EDIT CONSENTS**.
The Admin Consent status page opens.
- 7 If the minimum permission settings granted when the tenant was added are sufficient for a module, the Status for the module is **Uses Base**. If the module requires additional permissions, the **Status** is **Not Granted**.
If you need to have additional permissions for a module, click **Grant Consent**. You are redirected to the Microsoft login page.

- 8 Enter the Azure AD Global Administrator credentials and click **Next**.
A page opens with the list of permissions settings you are granting.
- 9 Click **Accept**.
The On Demand Tenants page is displayed.

Managing admin consent

- [Admin consent status](#)
- [Granting consent](#)
- [Revoking admin consent](#)

Admin consent status

To open the Admin Consent status page, click **Tenants** in the navigation page and click **EDIT CONSENTS** on the tenant tile.

On the Admin Consent status page, you can view the module admin consent status for each tenant you have added. The process of approving the use of an application for the whole Microsoft Azure AD organization by the Microsoft Global administrator is referred to as admin consent. A Microsoft Global administrator must provide admin consent when adding a tenant to On Demand.

When a tenant is first added, On Demand requests base admin consent permissions. Some modules can function using the base permission set while other require a higher level of admin consent permissions.

To edit admin consent

- 1 Click **Tenants** in the navigation panel on the left.
- 2 At the bottom of a tenant tile, click **EDIT CONSENTS**.

The Admin Consent edit page for the tenant opens.

The **Status** information on the tenant tile indicates if admin consent has been granted for a module. If the current status is **Not Granted**, you can enable a module for this tenant by clicking **Grant Consent** in the **Actions** column.

i | **NOTE:** If additional admin consent permission is required to perform specific tasks within a module, these items are listed beneath the main admin consent item for the module.

Granting consent

For the following scenarios, click **Grant Consent** in the **Actions** column.

- Admin consent has been revoked in the Azure AD portal, resulting in a status of **Revoked**.
- The admin consent token for the module has expired, resulting in a status of **Token Expired**. This can occur if the Azure Global Administrator account used to grant consent has changed (deleted, role change, password change). Note that a **Token Expired** status is not serious and has a limited impact on On Demand operation.

Prerequisite for Self Service License Reporting access

For the License Management module, to use Self Server License Reporting, you must grant permissions above Base permissions.

Sometimes, when you grant consent for Self Service License Reporting, you might see an error that indicates that the app requires access to a service that your organization has not subscribed to or enabled. This error occurs if

the Microsoft M365 License Manager API, required to gather self-service policy data, is not enabled in the tenant by default. You can resolve the error by enabling the M365 License Manager API in the tenant.

You must grant admin consent per On Demand tenant. For example, if you grant access for MyCompany tenant in organization A, and add the MyCompany tenant to organization B, organization B will still require the access grant.

To enable the M365 License Manager API

- 1 Install the [Azure PowerShell Az](#) module if it is not already installed.
- 2 Run the `Connect-AzAccount` cmdlet to log into your tenant using an account that has Azure AD administrative rights.
- 3 Run the following command:

```
New-AzADServicePrincipal -ApplicationId aeb86249-8ea3-49e2-900b-54cc8e308f85
```

After you complete these steps, you can complete the Grant Consent for Self Service License Reporting without errors.

Revoking admin consent

Completely revoking admin consent removes all permissions granted for the On Demand application. This action is usually performed as part of the process of removing a tenant. Revoking admin consent is a manual process that must be performed in the Microsoft Azure portal.

Revoking admin consent in the Azure Portal

Revoking admin consent removes all permissions granted for the On Demand application.

To revoke admin consent:

- 1 Log in to the Azure Resource Manager with the credentials for the tenant Active Directory.
- 2 Click on the **Azure Active Directory** icon in the left menu.
- 3 In the Active Directory panel, select **Enterprise applications**.
- 4 In the Enterprise applications panel, select **All applications**.
- 5 Select the Quest On Demand application.
The On Demand application Overview displays in the main panel.
- 6 At the top of the main panel, click **Delete**.

Removing a tenant

You can remove a tenant from On Demand. Removing a tenant disables all module functions related to the tenant. Active backups and provisioning actions are canceled.

i | **NOTE:** To restore a tenant and all the associated On Demand configuration, contact [Technical Support](#). Tenant restore is possible for up to 30 days after it has been removed. You must provide the tenant name and your organization ID. See [Displaying the organization ID](#).

To remove a tenant:

- 1 Click **Tenants** in the navigation panel on the left.
- 2 On the tenant tile for the tenant you want to remove, click **Remove**.

Once you add a tenant to On Demand, an application record is created in your tenant indicating that you have agreed to admin consent. When you remove a tenant from On Demand, this record is not removed and admin consent access remains. You must log in to Azure and manage access to the application.

On Demand Home page

The Home page contains the following components.

Masthead	The masthead displays your current user ID and provides information about your organization.
Side navigation panel	The side navigation panel is always available as you move through the On Demand site.
Dashboard	In addition to a tile for each module, the Dashboard displays statistics and operational data for your tenant.

Masthead

The masthead displays the On Demand name on the left and on the right side shows the following:

- Your user ID with a drop down menu arrow.
- An information icon (i) that opens the On Demand information window.
- A status icon and a message that indicates the system status for the modules in your organization. You can expand the status to view the individual modules that might be affected. You can click the **Status Overview** link to view the On Demand Status page.
 - If all your modules (such as Auditing, License Management, and Recovery) are operational, the icon is green and displays **All Systems Operational**. If you click the status text, you can see the individual modules with green icons indicating systems are operational.
 - If one or more modules has a status of degraded performance or partial outage, the icon is yellow and displays **Partial System Outage**. When you click the status text, yellow icons appear beside the affected modules.
 - If one or more modules has a status of major outage the icon is red and the text link displays **Major Service Outage** in red. When you click the status text, red icons appear beside the affected modules .

You can click the **Status Overview** link to display details about outages, past incidents, and all planned maintenance in the near future in the [On Demand Status page](#).

If there is scheduled maintenance planned that will include system downtime, a blue banner is displayed at the top of the masthead that includes information about the scheduled outage. You can click **Read more** to view the maintenance details on the [On Demand Status page](#).

Masthead drop-down menu

Clicking anywhere on your user ID opens the drop-down menu to perform the following tasks:

- View your current **Region Name** and **Organization Name**.
- Perform organization management [Managing organizations and regions](#).
- Configure your user settings by clicking My Account.

- **Use of Cookies:** You can enable or disable the use of a cookie for session monitoring. The initial state of this setting is determined by your response to the cookie notice when you join an organization. Note that this setting is by region. If you join an organization in a different region, you receive the cookie notice again.
- **Sign Out** from your current session. Note that you are automatically logged out after 30 minutes of inactivity.

Information window

The On Demand information window contains the following tabs:

- **About:** Version numbers and copyright information.
- **Third Party:** The list of third party components used in the product. This information is also contained in the Release Notes.
- **Contact:** Information on how to contact [Technical Support](#).

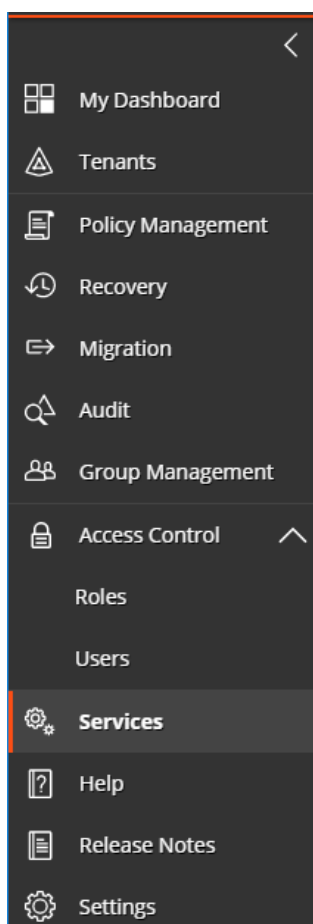

On Demand Status page

When expand the system status on the masthead and click the **Status Overview** link, you can view the On Demand Status page. The page provides detailed information about outages, past incidents, and planned maintenance. If there are partial outages or degraded performance for some modules, you can view an expanded list that indicates which geographic locations are affected.

If a blue banner displays at the top of the masthead, you can click **Read more** to see the scheduled maintenance list in the On Demand Status page. The list provides the date for each scheduled maintenance activity and indicates whether downtime is expected during the maintenance activity.

You have the option to subscribe to updates through email notifications whenever Quest On Demand creates, updates or resolves an incident.

Side navigation panel

Minimize the panel

Click on the arrow at the top to minimize the side navigation panel.

My Dashboard

Click to return to the Home page.

Tenants

Opens the Tenants page. For information, see [Managing tenants](#).

Module links

Use the module links to quickly open a module page.

Access Control

Manage users and their assigned roles. See [Adding users to an organization](#).

Services

Provides information on all available modules and provides a link to the Quest product page for the module.

Help and Release Notes

Help opens a User Guide

Release Notes opens a document with information on the currently deployed software version and technical support information.

When you are on the On Demand Home page, the Global Settings documents open. When you are on a module page, these links open the documentation for the module.

Settings

Activity trail

Agents

Notifications

Subscriptions

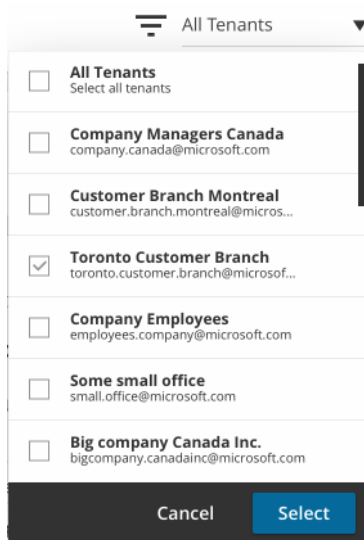

Dashboard

The dashboard contains the following components:

- [Tenant filter](#)
- [Tenant summary](#)
- [Needs your attention!](#)
- [Module tiles](#)

Tenant filter

Located in the top right of the dashboard, the tenant filter determines what data is displayed on the dashboard. You can choose to display all tenants, a subset, or a single tenant.

Tenant summary

The tenant summary indicates which tenants are currently selected and provides a summary of licenses, users and groups in the selected tenant.

Tenant	Office 365 Licences		Users		Groups	
All Tenants Selected	Assigned	Unassigned	Cloud only	Hybrid	Cloud only	Hybrid
SHOW DETAILS	1,234	150	1,200	3,100	200	300

Needs your attention!

The Needs your attention! tile displays a summary of alerts and cautions from all of the modules you are currently subscribed to. It also displays information on the status of your subscription or trial if it is close to expiry.

Needs your attention!

	Group modifications by Admin	21	VIEW
	Failed backups	5	VIEW
	Groups without owners	4,568	ASSIGN
	Something to warn you about	2	VIEW
	Something strange happened	3	VIEW

Module tiles

If you have a subscription to a module, the module tile displays status information for your tenant.

Recovery

PROTECTION STATUS

 4 of your 6 tenants are protected.

PROTECTED TENANTS	Last backup
Quest Managers	1 hour ago
Quest Employees	31 minutes ago
Some small company	2 days ago

[VIEW ALL](#)

Settings

- [Activity trail](#)
- [Agents](#)
- [Notifications](#)
- [Subscriptions](#)

Activity trail

An activity trail is a set of records that provide documentary evidence of the sequence of activities that have affected a specific operation, procedure, or event at any time. The recorded information includes date and time, user name, and a description of the event.

On Demand retains the complete activity trail history for an organization. You can specify the start and end dates for an activity trail log download.

The following activity trail logs are available:

Global Settings: Records the information for:

- adding and removing tenant events
- granting of admin consent for a tenant
- assigning and unassigning a user to be an On Demand Administrator
- notification events

Recovery: Records information about backup enable and disable events.

Downloading activity trail logs

To download activity trail logs

- 1 In the side navigation panel, click **Settings**.
- 2 In the main panel, under Modules, select **Global Settings** or a select a specific module.
By default, the date fields are configured to download logs from the last seven days.
- 3 To change the start or end dates, click on the date fields and select a date from the calendar window.
- 4 Click **Download**.

A zip file using the comma-separated values format (.csv) file is downloaded.

Agents

A local agent is required to query and perform management actions on on-premise Active Directory objects. Agents run as a service on a machine in the local network. The machine must have sufficient privileges to perform the actions required. You must install the agent on the local machine.

Currently, agents are installed and configured for the Group Management module. For information on using agents, see the On Demand Group Management User Guide.

Notifications

An On Demand notification is an email sent to one or more recipients following an event. For example, after a backup failure event, specified recipients receive a notification email.

Configuring notification recipients

To add notification recipients for an event:

- 1 In the side navigation panel, click **Settings**.
- 2 In the main panel, click Notifications in the menu bar.
- 3 Under **Modules**, select a module type and then, an event type.
- 4 In the **Set the recipients** text box, enter the email address for a recipient and click **Add**. The recipient is listed below the text box.
- 5 Repeat step 4 to add more recipients.
- 6 Click **Save**.
The next time the event occurs, all the listed recipients receive a notification email.

Subscriptions

This section contains the following topics.

Subscription details	The Subscriptions page contains the details of your current subscriptions.
Managing subscriptions	On Demand subscriptions are associated with an email address. To activate a subscription, the email address of the subscription owner must be added to the Subscription Owner list.
Subscription expiry	To prevent loss of data, subscription expiry takes place in stages.

Subscription details

Click the module name to get information on product subscription details and pricing as well as links to Quest sales support.

Table 1. Subscription field descriptions

Field	Value	Description
Modules	Module name	The module name. Modules may offer separate licenses for specific features.
Features	Feature name	A feature is the smallest subscription unit. Features can be bundled into Standard, Professional, and Advanced offerings.
Subscription Type	Standard, Professional, or Advanced	The organization has purchased a subscription to features offered by this module. The specific subscription type depends on the number of features purchased.
	Trial	The organization has subscribed to a trial license. Module features may be limited. Note: When moving from Trial to Paid, the user associated with the paid subscription must be an organization administrator. See Subscription Owner when Moving from a Trial to a Paid subscription .
	Technical Preview	The organization has subscribed to a technical preview license. Module features may be limited.
	Not subscribed	The organization is not subscribed to this module.
Expiry Date	mm/dd/yyyy	The date on which the subscription will expire. See Subscription expiry.
Rate Plan	Prepaid	A set number of licenses have been purchased.
	Overage	The organization is billed for licenses as they are consumed.
Licenses	####	The number of licenses purchased (∞ if the Rate Plan is Overage).
Used	####	The number of licenses currently consumed.

Managing subscriptions

On Demand subscriptions are associated with an email address that was used to purchase the subscription. All valid email address formats are supported. The email address does not need to be associated with a Quest account. In order to activate a subscription, the email address of the subscription owner must be added to the **Subscription Owners** list on the **Settings > Subscriptions > Shared Subscriptions** page. A subscription owner can share subscriptions with multiple organizations.

Adding a subscription owner to the **Subscription Owners** list does not add the user to the organization. A subscription owner does not have sign in capability or any other permission settings. To add a user to an organization, see [Adding users to an organization](#).

Sharing a subscription

To share a subscription with the organization, request permission from the subscription owner to add their email address to the **Subscription Owners** list. If the request is accepted, all subscriptions associated with the email address are assigned to the organization. A subscription owner can share subscriptions with multiple organizations.

Note that a **Subscription sharing** status of **Active** indicates that the user has consented to share subscriptions. It does not indicate that a valid subscription is associated with the email address.

- 1 In the side navigation panel, click **Settings**.
- 2 On the Settings page, click **Subscriptions** in the top menu.
- 3 At the top right, click Shared Subscriptions.

- 4 On the Shared Subscriptions page, enter the email address of the subscription owner and click **Request**. The email address is added to the **Subscription Owners** lists with a **Subscription sharing** status of **Pending**.
- 5 The subscription owner receives an email with a request to share the subscriptions associated with the email address.
If the subscription owner accepts the request, the Subscription sharing status changes to **Active** and any subscriptions associated with the email address are added to the Subscriptions page.
- 6 If **Subscription sharing** remains in the **Pending** state, you can choose to select **Cancel Request** from the **Action** menu.

Stop using a subscription

You can stop subscription sharing by removing the subscription owner's email address from the **Subscription Owners** list.

- 1 In the side navigation panel, click **Settings**.
- 2 On the Settings page, click **Subscriptions** in the top menu.
- 3 At the top left, click **Shared Subscriptions**.
- 4 In the **Subscription Owners** list, locate the email address of the subscription owner that will no longer share subscriptions with the organization.
- 5 In the **Action** column for the subscription, select **Stop Using Subscription**.
- 6 The confirmation window lists the subscriptions that will be removed from the organization. Click **Stop Using Subscription**. The subscription owner receives an email informing them that the subscription is no longer assigned to the organization. All subscriptions associated with the email address are removed from the Subscriptions page.

Subscription Owner when Moving from a Trial to a Paid subscription

The user that signed up for a trial subscription is automatically an administrator for the organization. If a different user email address is used for purchasing a paid subscription, this user address must be added to the **Subscription Owners** list before the subscription status displays as **Paid**.

If you need assistance determining the email address used to purchase the subscription or, if you want to change the address associated with the subscription, contact [Technical Support](#).

Subscription expiry

To prevent loss of data, subscription expiry takes place in stages.

Stage 1: Your subscription expires in X days

Thirty days prior to expiry, the On Demand organization administrator receives an email notification. From this time on, the module tile on the On Demand home page displays the number of days before the subscription expires.

Stage 2: Subscription expired. Access denied.

Once the subscription expires, members of the organization can no longer access the On Demand module. The configuration settings have been preserved and module services continue for the next 30 days.

Stage 3: Subscription expired. Service disabled.

After 30 days, module services are no longer operational for the tenants in the organization. Data is preserved for 30 days and then, it is permanently deleted.

Stage 4: Subscription expired. Data deleted.

Your data has been deleted and cannot be restored.

Documentation roadmap

Global settings

On Demand global settings refers to management tools and configuration settings that apply to all On Demand modules. This includes tenant management tasks and downloading activity trail logs.

Modules

Each management tool is referred to as a module. Currently, the following modules are available:

- [Audit](#)
- [Group Management](#)
- [License Management](#)
- [Migration](#)
- [Recovery](#)

Documentation

For each module, and the global settings, there is a Release Notes document and a User Guide.

- The Release Notes contains a release history and details of new features, resolved issues, and known issues.
- User Guides contain descriptions and procedures for the management tasks you can perform with each module

Use the links below to navigate to the content you require.

User Guides

- [Global Settings](#)
- [Audit](#)
- [Group Management](#)
- [License Management](#)
- [Migration](#)
- [Recovery](#)

Release Notes

- [Product Support - Migration](#)
- [Product Support - Recovery](#)

Information and discussion: Quest community forums

Visit the [On Demand community forum](#) to read current information or to post a forum topic.

About us

Quest provides software solutions for the rapidly-changing world of enterprise IT. We help simplify the challenges caused by data explosion, cloud expansion, hybrid data centers, security threats, and regulatory requirements. We are a global provider to 130,000 companies across 100 countries, including 95% of the Fortune 500 and 90% of the Global 1000. Since 1987, we have built a portfolio of solutions that now includes database management, data protection, identity and access management, Microsoft platform management, and unified endpoint management. With Quest, organizations spend less time on IT administration and more time on business innovation. For more information, visit www.quest.com.

Technical support resources

Technical support is available to Quest customers with a valid maintenance contract and customers who have trial versions. You can access the Quest Support Portal at <https://support.quest.com>.

The Support Portal provides self-help tools you can use to solve problems quickly and independently, 24 hours a day, 365 days a year. The Support Portal enables you to:

- Submit and manage a Service Request.
- View Knowledge Base articles.
- Sign up for product notifications.
- Download software and technical documentation.
- View how-to-videos.
- Engage in community discussions.
- Chat with support engineers online.
- View services to assist you with your product.
