FTP Adapter Configuration

The FTP adapter for StoragePoint allows you to store SharePoint content on an FTP server.

The StoragePoint team strives to keep things as simple as possible for our customers. However, before the FTP Adapter for StoragePoint will function as described in this document, additional configuration may be required.

NOTE: Do not leave connection opened (with your FTP client software) during writing to FTP type endpoint. It may cause "ghost" folder (duplicate folder with the same name) on FTP storage.

This section will provide you details on how to configure a storage endpoint's connection string to utilize the FTP Adapter. Please refer to the StoragePoint Reference Guide for information on managing Storage Endpoints.

On the Application Management page, click *Storage and Backup Endpoints*.

Click *Create New Endpoint* or click the name of an existing storage endpoint that you want to edit.

Click the *Show* link next to the Advanced Adapter Settings to see the additional fields.

FTP Adapter Connection String Parameters

| Setting | Value/Options |
|---|--|
| <p>Name</p> | <p>Enter the unique name of the Storage or Backup Endpoint.</p> |
| <p>Type</p>  <p>See Backup Services Settings in the Reference Guide for more information on how Backup Endpoints are used.</p> | <p><i>Primary</i>– this endpoint will be available for externalization when creating storage profiles.</p> <p><i>Backup</i>– this endpoint will be in the Backup Services dropdown on the profile page.</p> <p>The selection is locked down when saving.</p> |
| <p>Status</p>  | <p><i>Online</i>– Storage Endpoint should be available to associate to a Storage Profile and accept BLOBs. (default)</p> <p><i>Offline (Read Only)</i>– A storage endpoint can be configured, but not made available for externalizing content. The BLOBs already on the endpoint are still read only.</p> |
|  | <p>Select the adapter for the endpoint that is being created.</p> |
| <p>Protocol</p>  | <p>Select Sftp or Ftp.</p> |

| Setting | Value/Options |
|---|--|
| <p>Host</p> <input data-bbox="252 353 975 409" type="text" value="enter a FTP hostname"/> | <p>FTP Host (Server) name. Must be IP address or host name. Required.</p> |
| <p>Port</p> <input data-bbox="252 539 742 595" type="text" value="990"/> | <p>FTP Port. The default is 21 for unencrypted communication and 990 for encrypted. It must be a number in range 1-65535. Default = 21.</p> |
| <p>Use SSL</p> <input data-bbox="252 846 379 902" type="text" value="True"/> | <p>True (default) means encrypted communication (SFTP – implicit FTP over STL) will be established. False means “plain” unencrypted FTP communication will be established. Value is set to True and cannot be edited for Sftp protocol</p> |
| <p>User</p> <input data-bbox="252 1301 975 1357" type="text" value="enter an account username"/> | <p>FTP Account User name. Required.</p> |
| <p>Password</p> <input data-bbox="252 1480 975 1536" type="text" value="enter an account password"/> | <p>FTP Account User name password. Required.</p> |
| <p>Advanced Adapter Settings <i>(Hide)</i></p> <p>Default Remote Dictionary</p> <input data-bbox="252 1715 975 1771" type="text" value="enter an account remote dictionary (optional)"/> | <p>Default remote dictionary for FTP user account (not typically necessary to set). Not allowable for Sftp protocol.</p> |
| <p>Proxy Type</p> <input data-bbox="252 1917 419 1973" type="text" value="None"/> | <ul style="list-style-type: none"> • None (default) • Socks4 • Socks4a • Socks5 |

| Setting | Value/Options |
|---|---|
| <p>Proxy Host</p> <input data-bbox="252 349 975 405" type="text" value="enter proxy host name (optional)"/> | <p>Proxy Host (Server) name. Must be IP address or host name. Required only if Proxy Type is None.</p> |
| <p>Proxy Port</p> <input data-bbox="245 562 735 613" type="text" value="enter proxy number (optional)"/> | <p>Proxy Port. It must be a number in range 1-65535. Required only if Proxy Type is None.</p> |
| <p>Proxy User</p> <input data-bbox="245 779 967 835" type="text" value="enter proxy username (optional)"/> | <p>Proxy Account User name. Required only if Proxy Type is None.</p> |
| <p>Proxy Password</p> <input data-bbox="245 958 963 1014" type="text" value="enter proxy password (optional)"/> | <p>Proxy Account User name password.</p> |
|  | <p>If the endpoint is on a WORM (Write Once, Read Many) device, Unused BLOB Cleanup will ignore this endpoint.</p> |
| <p>Folder Content in BLOB Store</p> <input data-bbox="233 1375 323 1413" type="text" value="Yes"/> <p>Folder Scheme</p> <input data-bbox="233 1464 560 1503" type="text" value="YYYY/MM/DD/HH/MM"/> | <p><i>No</i> – Externalized content BLOBs are not placed in folders.</p> <p><i>Yes</i> – Externalized content BLOBs are placed in folders (default).</p> <p>If <i>Folder Content in BLOB Store</i> is <i>Yes</i> then you can select a date/time folder scheme from the dropdown.</p> <p>YYYY/MM/DD/HH/MM is the default.</p> |

| Setting | Value/Options |
|---|--|
| <div style="border: 1px solid black; padding: 5px; width: fit-content; margin: 0 auto;">Test Storage Settings</div> | <p>The Test Storage Settings button can be used at this point, or after completing the endpoint configuration, to verify that the endpoint is accessible.</p> |
| <p>Compress Content in BLOB Store</p> <div style="border: 1px solid black; padding: 2px; display: inline-block;">No</div> <p><i>Content is compressed using the GZip/Deflate method.</i></p> | <p><i>No</i>– Externalized content BLOBs are not compressed (default).</p> <p><i>Yes</i>– Externalized content BLOBs are compressed.</p> |
| <p>Encryption Method for Content in BLOB Store</p> <div style="border: 1px solid black; padding: 2px; display: inline-block;">None</div> | <p><i>None</i>– Encryption will not be applied to externalized BLOBs (default).</p> <p><i>AES (128 bit)</i>– 128 bit AES encryption will be applied to externalized BLOBs.</p> <p><i>AES (256 bit)</i>– 256 bit AES encryption will be applied to externalized BLOBs.</p> |
| <p>Encryption Key Passphrase</p> <div style="border: 1px solid black; padding: 2px; display: inline-block; width: 150px;"></div> <div style="border: 1px solid black; padding: 2px; margin-left: 10px;">Generate Key</div> <p><i>Enter a passphrase to be used to generate a key or leave blank to generate a random key. The passphrase entered is not saved with the Endpoint.</i></p> | <p>Enter a passphrase to use when generating the encryption key. Using a passphrase will help you re-create the encryption key if necessary. You can generate a random key by leaving the box blank and clicking the <i>Generate Key</i> button. The encryption key passphrase will be hidden.</p> |

| Setting | Value/Options |
|---|--|
| <p>Generate warning notification if:</p> <p><input checked="" type="checkbox"/> <input type="text" value="10"/> or more successive errors are encountered</p> <p><input type="checkbox"/> there is less than <input type="text" value="10"/> <input checked="" type="radio"/> MB <input type="radio"/> % of free space</p> | <p>A warning email can be sent if the endpoint encounters errors.</p> |
| <p>Automatically take endpoint offline if:</p> <p><input checked="" type="checkbox"/> <input type="text" value="25"/> or more successive errors are encountered</p> <p><input type="checkbox"/> there is less than <input type="text" value="1"/> <input checked="" type="radio"/> MB <input type="radio"/> % of free space</p> | <p>An online storage endpoint can be automatically taken offline if it encounters errors. If a storage endpoint is taken offline automatically, BLOBs that were intended to be written to that endpoint will go to the content database.</p> |
| <p>Send Offline Notifications to:</p> <p><input checked="" type="checkbox"/> Use Notification Defaults</p> <p>Additional Contacts</p> <p><input type="text" value="admin@company.com"/></p> <p><i>Provide a semi-colon delimited list of e-mail addresses.</i></p> | <p>Default email addresses for system error and offline notification can be entered. Check the box to include the list of Default Notification Contacts specified on the General Settings page.</p> |

The *Show Connection String* checkbox displays connection string for this adapter. Notice that the connection string parameters are name/value pairs separated by semi-colons.

NOTE: Adapter parameters are not case-sensitive.

NOTE: You should always use a passphrase when generating encryption keys. The passphrase gives you a means of re-creating keys should they become unrecoverable or corrupt. It is very important to remember or record the passphrase outside of Metalogix StoragePoint. Otherwise, encrypted content could become irretrievable in the event of a database failure.

If you choose to externalize content you should test the storage profile settings by clicking the *Test Storage Settings* button. A message under the button will indicate whether or not the test was successful. If the test fails the message will include the error that was the root cause of the failure.

NOTE: When testing access to an endpoint from within Central Administration, the Identity of the Application Pool hosting the Central Administration Site is the one that is being used for the test. If there are different Identities used for other Web Applications in the Farm then those identities will also need access but cannot be tested from within Central Admin itself. See BLOB Store Security and Metalogix StoragePoint Required Privileges in the Metalogix StoragePoint Reference Guide.

Appendix: Troubleshooting

Problem: Receiving errors on storage or retrieval of externalized content.

Wherever possible, StoragePoint surfaces error messages returned by the adapter either directly to the user or within the SharePoint ULS logs. You should refer to your storage platform/provider documentation for resolution to errors logged by the adapter.

About Us

We are more than just a name

We are on a quest to make your information technology work harder for you. That is why we build community-driven software solutions that help you spend less time on IT administration and more time on business innovation. We help you modernize your data center, get you to the cloud quicker and provide the expertise, security and accessibility you need to grow your data-driven business. Combined with Quest's invitation to the global community to be a part of its innovation, and our firm commitment to ensuring customer satisfaction, we continue to deliver solutions that have a real impact on our customers today and leave a legacy we are proud of. We are challenging the status quo by transforming into a new software company. And as your partner, we work tirelessly to make sure your information technology is designed for you and by you. This is our mission, and we are in this together. Welcome to a new Quest. You are invited to Join the Innovation™.

Our brand, our vision. Together.

Our logo reflects our story: innovation, community and support. An important part of this story begins with the letter Q. It is a perfect circle, representing our commitment to technological precision and strength. The space in the Q itself symbolizes our need to add the missing piece — you — to the community, to the new Quest.

Contacting Quest

Technical Support Resources

Technical support is available to Quest customers with a valid maintenance contract and customers who have trial versions. You can access the Quest Support Portal at <https://support.quest.com>

The Support Portal provides self-help tools you can use to solve problems quickly and independently, 24 hours a day, 365 days a year. The Support Portal enables you to:

- Submit and manage a Service Request
- View Knowledge Base articles

- Sign up for product notifications
- Download software and technical documentation
- View how-to-videos
- Engage in community discussions
- Chat with support engineers online
- View services to assist you with your product
