What's New in Quest GPOADmin

As a result of ongoing research and development, and in response to customer feedback, the following enhancements have been made in this release of Quest GPOADmin:

- [Synchronization updates](#)
- [Microsoft Intune support](#)
- [Performance enhancements](#)
- [Additional platform support](#)
- [Upgrade enhancements](#)
- [Miscellaneous updates](#)

Synchronization updates

- Synchronization Target Editor configuration options are all now available through menu options, right-click context menus, and the editor's toolbar.
- Ability to see the synchronization progress status and export the data to a .csv file for future reference.
- Failed synchronization:
 - Notification sent when a synchronization fails.
 - Improved error messages on synchronization failure.

Microsoft Intune support

GPOADmin now includes support for Microsoft Intune's configuration profiles. This allows administrators to control the configuration profile settings and assignments through workflows and gain insight to how they are applied through the Settings and Difference report.

i **NOTE:** The Microsoft Graph API used to access Intune policy settings is a beta release which is actively being updated. For this reason, support for Microsoft Intune's configuration profiles is available for preview purposes only. Specifically, the following configuration profiles are not supported in GPOADmin 5.16:

- Custom profiles for the Android device administrator platform.
- Delivery Optimization profiles for Windows 10 and later.
- MX Profile (Zebra only) profiles for the Android device administrator platform.
- VPN profiles for Windows 8.1 and later.
- Wi-Fi import profiles for Windows 8.1 and later.
- Administrative Template profiles for the Windows 10 and later.

Please provide any feedback on this feature to Customer Support.

The following workflow actions are supported:

- Register/ Unregister
- Check In/ Check Out/ Undo Check Out
- Migration Actions
- Modify Security
- Apply Workflow / Approval Workflow order
- Failed Deployment
- Get/ Import
- Roll Back/ Restore/ Delete
- Incorporate Live
- Deploy
- Check Compliance

The following PowerShell commands have also been added to help manage Intune support:

- Get-ConfigurationProfileAssignments
- Add-ConfigurationProfileAssignments
- Remove-ConfigurationProfileAssignments
- Clear-ConfigurationProfileAssignments
- New-IntuneAssignment
- Get-IntuneOptions
- Set-IntuneOptions
- Clear-IntuneOptions

The following right has been added:

- Modify Configuration Profile Assignments right added which grants the user the ability to modify the Assignments on a Configuration Profile.

Performance enhancements

- Removed display delays when selecting objects and performing workflow operations when using an SQL configuration store.
- Improved time to enumerate containers.
- Added /R = Re-migrate items switch to the Configuration Migration utility.

Additional platform support

The following support is required:

- .NET Framework 4.8

Upgrade enhancements

- The following are maintained during an upgrade:
 - Settings in the configuration files
 - A list of migration tables in the "Set Synchronization Targets" dialog.
- Temporary folder contents, including Custom Workflow Actions are included in an upgrade.

Miscellaneous updates

- The dashboard and all associated files have been removed from the product.
- The Utilities folder and all associated files (AD_Resolve_Test.exe and adodb.dll) have been removed from the installation media.
- Difference reports displays the correct information when comparing wireless network policies with the same name.
- Unregister and remove history removes all traces of the GPO history and backups, including the GPOs directory in the backup share location.
- Windows Firewall: ICMP4 settings displays correctly in difference reports.

Quest creates software solutions that make the benefits of new technology real in an increasingly complex IT landscape. From database and systems management, to Active Directory and Office 365 management, and cyber security resilience, Quest helps customers solve their next IT challenge now. Around the globe, more than 130,000 companies and 95% of the Fortune 500 count on Quest to deliver proactive management and monitoring for the next enterprise initiative, find the next solution for complex Microsoft challenges and stay ahead of the next threat. Quest Software. Where next meets now. For more information, visit www.quest.com.

Our brand, our vision. Together.

Our logo reflects our story: innovation, community and support. An important part of this story begins with the letter Q. It is a perfect circle, representing our commitment to technological precision and strength. The space in the Q itself symbolizes our need to add the missing piece—you—to the community, to the new Quest.
