About this release

NetVault Bare Metal Recovery Plug-in *Server* 13.1 is a major release, with enhanced features and functionality. For complete product documentation, visit <https://support.quest.com/technical-documents/>.

Enhancements

The following is a list of enhancements implemented in NetVault Bare Metal Recovery Plug-in *Server* 13.1.

Table 1. General enhancements

Enhancement	Issue ID
Improved the BMR Online for Linux backup and recovery process by adding a snapshot kernel module that lets you perform the recovery for a Linux backup in the same way as you would a Windows-based VSS snapshot.	DNBMR-1221

Resolved issues

The following is a list of issues addressed in this release.

Table 2. General resolved issues

Resolved issue	Issue ID
NetVault Server only backs up the selected partitions when the Disk Raw Mode option is enabled. If only a few partitions are selected with the Disk Raw Mode option enabled, only the selected partitions are backed up.	DNBMR-434 (17712, VOG-173)
Workaround: Select the entire disk for backup before selecting Disk Raw Mode .	
NOTE: If the entire disk is selected but some of the partitions are crossed out and the Disk Raw Mode option is enabled, the entire disk is backed up. You cannot exclude partitions when the Disk Raw Mode option is enabled.	

Known issues

The following is a list of issues, including issues attributed to third-party products, known to exist at the time of release.

Table 3. General known issues

Known issue	Issue ID
Cannot restore Virtual Machine Disk (VMDK) Images concurrently.	DNBMR-523 (17801, VOG-95)
Cannot restore a VMDK Image to a shared network drive.	DNBMR-524 (17802, VOG-96)
The plug-in does not support Plug-in <i>Offline Client</i> for Linux backup and restore jobs that use NetVault SmartDisk as a target.	DNBMR-1015, DNBMR-1096 (28860, 32464)
The plug-in does not support Plug-in <i>Offline Client</i> for Linux backup and restore jobs that use QoreStor or DR as a target.	DNBMR-1218
VMDK restore job to remote ESXi 6.5 fails with error "Failed to clone remote VMDK disk."	DNBMR-1225
NetVault Bare Metal Recovery Plug-in fails to boot the Linux system (UEFI Secure Boot enabled) with the VaultOS ISO displaying the error "/isolinux/voskernel has invalid signature."	DNBMR-1244

System requirements

Before installing NetVault Bare Metal Recovery Plug-in Server 13.1, ensure that your system meets the requirements outlined in the *Quest NetVault Compatibility Guide* available at <https://support.quest.com/technical-documents>.

Upgrade and compatibility

For complete supported-platform information, see the *Quest NetVault Compatibility Guide*.

Product licensing

To obtain the license file for your NetVault Server environment, determine the NetVault Machine ID of your main NetVault Server. Also identify the machine IDs of any clients running application plug-ins, such as Oracle, MySQL, PostgreSQL, SQL Server, and Exchange.

You can use the License Management page to install the product license files.

- [Obtaining a machine ID](#)
- [Installing a license file](#)

Obtaining a machine ID

- 1 Start the NetVault WebUI.
- 2 In the Navigation pane, click **License Management**.
- 3 In the **Clients Details** list, note the machine ID for the applicable Server or Client entry.

Installing a license file

- 1 In the **Navigation** pane, click **License Management**.
- 2 On the **License Management** page, click **Install License**.
Because the NetVault WebUI is tied to a specific NetVault Server and all licenses are installed on the NetVault Server, the program automatically installs the license on the correct machine.
- 3 In the **Choose License File/s** dialog box, click **Select a file**, point to the “.dlv” file that contains the license key, and click **Open**.
- 4 In the dialog box, click **OK** to apply the selected license file.
After the key is applied successfully, a message is displayed.
- 5 To dismiss the message, click **X**.

Upgrade and installation instructions

For upgrade and installation instructions, see the *Quest NetVault Bare Metal Recovery Plug-ins User's Guide*.

Globalization

This section contains information about installing and operating this product in non-English configurations, such as those needed by customers outside of North America. This section does not replace the materials about supported platforms and configurations found elsewhere in the product documentation.

This release supports any single-byte or multi-byte character set. It supports simultaneous operation with multilingual data. This release is targeted to support operations in the following regions: North America, Western Europe and Latin America, Central and Eastern Europe, Far-East Asia, Japan.

The release is localized to the following languages: Chinese (Simplified), French, German, Japanese, Korean.

About us

Quest provides software solutions for the rapidly-changing world of enterprise IT. We help simplify the challenges caused by data explosion, cloud expansion, hybrid datacenters, security threats, and regulatory requirements. We are a global provider to 130,000 companies across 100 countries, including 95% of the Fortune 500 and 90% of the Global 1000. Since 1987, we have built a portfolio of solutions that now includes database management, data protection, identity and access management, Microsoft platform management, and unified endpoint management. With Quest, organizations spend less time on IT administration and more time on business innovation. For more information, visit www.quest.com.

Technical support resources

Technical support is available to Quest customers with a valid maintenance contract and customers who have trial versions. You can access the Quest Support Portal at <https://support.quest.com>.

The Support Portal provides self-help tools you can use to solve problems quickly and independently, 24 hours a day, 365 days a year. The Support Portal enables you to:

- Submit and manage a Service Request.
- View Knowledge Base articles.
- Sign up for product notifications.
- Download software and technical documentation.
- View how-to-videos.
- Engage in community discussions.
- Chat with support engineers online.
- View services to assist you with your product.
