Report subscriptions in the One Identity Manager

One Identity Manager provides several reports that present information about objects and their relations to other objects in the One Identity Manager database. For example, there are reports about employees and their user accounts, company structures, resources, and system entitlements, attestation, and compliance rule violations integrated into One Identity Manager. Identification, analysis, and summaries of relevant data are supported with the help of these reports.

Web Portal users request subscribable reports and configure their own personal report subscriptions. The reports are delivered to Web Portal users by email as specified in a personally configured schedule.

**NOTE:** Prerequisite for the using report subscriptions in One Identity Manager is the installation of the Report Subscription Module. For more information about installing, see the *One Identity Manager Installation Guide*.

The One Identity Manager components for report subscriptions are available when the QER | RPS configuration parameter is set.

- In the Designer, check if the configuration parameter is set. Otherwise, set the configuration parameter and compile the database.
  
  **NOTE:** If you disable the configuration parameter at a later date, model components and scripts that are not longer required, are disabled. SQL procedures and triggers are still carried out. For more information about the behavior of preprocessor relevant configuration parameters and conditional compiling, see the *One Identity Manager Configuration Guide*.

- Other configuration parameters are installed when the module is installed. Check the configuration parameters and modify them as necessary to suit your requirements.

Report overview

The following components work together to create reports and make them available.

**Figure 1: Connection between reports, subscribable reports, and report subscriptions**

![Diagram showing the connection between reports, subscribable reports, and report subscriptions]

**Reports in the Report Editor**

Create and edit reports in the Report Editor. Predefined reports are supplied with the One Identity Manager by default. You can also send reports to specified email addresses using scheduled subscriptions. You can create reports for the current state or over a specified period (change history). You can set up several subscribable reports for each report. You can also view reports using One Identity Manager administration tools, for example, the Manager.

**Subscribable reports in the Manager**

Set up and edit subscribable reports in the Manager. When you set up a subscribable report, enter the underlying report, either a default report or a custom report created with the Report Editor. Assign subscribable reports to employees through company organizations or the IT Shop. Web Portal users can request subscribable reports and configure their own personal report subscriptions.

**Report subscriptions in the Web Portal**

Web Portal users request subscribable reports and configure their own personal report subscriptions. When Web Portal users set up a subscribable report, they enter the
underlying report. The reports are delivered to Web Portal users by email as specified in a personally configured schedule.

The report subscriptions and schedules are shown in the Manager where any technical problems can be solved.

Providing subscribable reports for Web Portal users

In the default installation there are predefined reports available, which users can subscribe to in the Web Portal. You can also create new reports or make copies of predefined reports to modify.

To provide Web Portal users with a subscribable report

1. Create the report with the Report Editor.
   For more information about creating scripts, see the One Identity Manager Configuration Guide.

2. Prepare a subscribable report in the Manager.
   a. Create a subscribable report.
   b. Assign the subscribable report to employees in the Manager.
      - Assign the subscribable report to IT Shop shelves so that Web Portal users can request subscribable reports.
      - Assign subscribable reports to company structures or directly to individual employees. Web Portal users can set up their personal report subscriptions without requesting a subscribable report first.

3. Web Portal users request subscribable reports and configure their own personal report subscriptions.
   For more information, see the One Identity Manager Web Designer Web Portal User Guide.

Creating and editing subscribable reports

In the default installation there are predefined reports available to which Web Portal users can subscribe. You can also create new reports or make copies of predefined reports to modify. All the reports available to Web Portal users for subscription are those you have set up in the Report Editor. You can set up several subscribable reports with different parameters for each report.

Detailed information about this topic

- Basic data for subscribable reports on page 11
- Creating and editing subscribable reports on page 21
- Creating simple reports on page 23
- Report parameters on page 25
- Assigning subscribable reports to employees on page 32

Basic data for subscribable reports

The following basic data is relevant to providing subscribable reports in One Identity Manager.

- Configuration parameter
  
  Use configuration parameters to configure the behavior of the system's basic settings. One Identity Manager provides default settings for different configuration parameters. Check the configuration parameters and modify them as necessary to suit your requirements.

  Configuration parameters are defined in the One Identity Manager modules. Each One Identity Manager module can also install configuration parameters. In the Designer, you can find an overview of all configuration parameters in the Base data > General > Configuration parameters category.
For more information, see Configuration parameters for subscribable reports on page 42.

- Schedules
  Each user specifies their personalized schedule for sending subscribed reports in the Web Portal. One Identity Manager supplies some default schedules. For more information, see Report subscription schedules on page 12.

- Mail templates
  Mail templates are used to send reports subscribed in the Web Portal, to the subscribers. There are some mail templates available in the default installation that can be used for sending report. For more information, see Mail templates for notifications about report subscriptions on page 16.

Report subscription schedules

| IMPORTANT: | Do not change any schedules set up by users using the Web Portal. |

Each user specifies their personalized schedule for sending subscribed reports in the Web Portal. Furthermore, One Identity Manager supplies the following schedules for report subscriptions by default.

- Daily report subscriptions
- Weekly report subscriptions
- Monthly report subscriptions
- Quarterly report subscriptions
- Bi-annual report subscriptions
- Annual report subscriptions

If needed, you can change the default report subscription schedules or create new schedules.

For more information about schedules, see the One Identity Manager Operational Guide.

- Starting schedules immediately on page 15
- Displaying report subscriptions on page 16

Creating and editing schedules for report subscriptions

| IMPORTANT: | Do not change any schedules set up by users using the Web Portal. |
If needed, you can change the default report subscription schedules or create new schedules.

**To edit a schedule**

1. In the Manager, select the Report Subscriptions > Basic configuration data > Schedules category.
   The result list shows exactly those schedules configured for report subscriptions.
2. Select a schedule in the result list and run the Change main data task.
3. Edit the schedule’s main data.
4. Save the changes.

**To create a schedule**

1. In the Manager, select the Report Subscriptions > Basic configuration data > Schedules category.
2. Click 📊 in the result list.
3. Edit the schedule’s main data.
4. Save the changes.

Edit the following schedule properties.

**Table 2: Schedule properties**

<table>

<tr>
<td></td>
<td>To set a validity period, select the <strong>Limited duration</strong> option and enter the day the schedule will be run for the last time in <strong>End (date)</strong>.</td>
</tr>
<tr>
<td>Occurs</td>
<td>Interval in which the task is run. Other settings may be required depending on the settings.</td>
</tr>
<tr>
<td></td>
<td><strong>Every minute</strong>: The schedule is run once a minute. The starting point is calculated from the rate of occurrence and the interval type.</td>
</tr>
<tr>
<td></td>
<td><strong>Hourly</strong>: The schedule is run at defined intervals of a multiple of hours such as every two hours.</td>
</tr>
<tr>
<td></td>
<td>• Under <strong>Repeat every</strong>, specify after how many hours the schedule is run again.</td>
</tr>
<tr>
<td></td>
<td>• The starting point is calculated from the rate of occurrence and the interval type.</td>
</tr>
<tr>
<td></td>
<td><strong>Daily</strong>: The schedule is run at specified times in a defined interval of days such as every second day at 6am and 6pm.</td>
</tr>
<tr>
<td></td>
<td>• Under <strong>Start time</strong>, specify the times to run the schedule.</td>
</tr>
<tr>
<td></td>
<td>• Under <strong>Repeat every</strong>, specify after how many days the schedule is run again.</td>
</tr>
<tr>
<td></td>
<td><strong>Weekly</strong>: The schedule is run at a defined interval of weeks, on a specific day, at a specified time such as every second week on Monday at 6am and 6pm.</td>
</tr>
<tr>
<td></td>
<td>• Under <strong>Start time</strong>, specify the times to run the schedule.</td>
</tr>
<tr>
<td></td>
<td>• Under <strong>Repeat every</strong>, specify after how many weeks the schedule is run again.</td>
</tr>
<tr>
<td></td>
<td>• Specify the set day of the week for running the schedule.</td>
</tr>
<tr>
<td></td>
<td><strong>Weekly</strong>: The schedule is run at a defined interval of months, on a specific day, at a specified time such as every second month on the 1st and the 15th at 6am and 6pm.</td>
</tr>
<tr>
<td></td>
<td>• Under <strong>Start time</strong>, specify the times to run the schedule.</td>
</tr>
<tr>
<td></td>
<td>• Under <strong>Repeat every</strong>, specify after how many months the schedule is run again.</td>
</tr>
<tr>
<td></td>
<td>• Specify the days of the month (1st - 31st of the month).</td>
</tr>
</tbody>
</table>

**NOTE:** If the **Monthly** interval type with the sub interval **29, 30** or **31** does not exist in this month, the last day of the month is used.

**Example:**
A schedule that is run on the 31st day of each month is run on April 30th. In February, the schedule is run on the 28th (or 29th in leap year).
Yearly: The schedule is run at a defined interval of years, on a specific day, at a specified time such as every year on the 1st, the 100th, and the 200th day at 6am and 6pm.

- Under Start time, specify the times to run the schedule.
- Under Repeat every, specify after how many years the schedule is run again.
- Specify the days of the year (1st - 366th day of the year).

NOTE: If you select the 366th day of the year, the schedule is only run in leap years.

Monday, Tuesday, Wednesday, Thursday, Friday, Saturday, Sunday: The schedule is run on a defined day of the week, in specified months, at specified times such as every second Saturday in January and June at 10am.

- Under Start time, specify the times to run the schedule.
- Under Repeat every, specify after how many days of the month the schedule is run again. The values 1 to 4, -1 (last day of the week), and -2 (last day but one of the week) are permitted.
- Specify in which month to run the schedule. The values 1 to 12 are permitted. If the value is empty, the schedule is run each month.
To start a schedule immediately

1. In the Manager, select the Report Subscriptions > Basic configuration data > Schedules category.
2. Select the schedule in the result list.
3. Select the Start immediately task.
   A message appears confirming that the schedule was started.
4. Click OK.

Displaying report subscriptions

Every user sets up their personalized report subscriptions through the Web Portal. For more information, see the One Identity Manager Web Designer Web Portal User Guide.

**IMPORTANT:** Do not remove any assignments. Assignment of schedules for report subscriptions is compulsory and carried out by through the Web Portal.

To display report subscriptions assigned to a schedule

1. In the Manager, select the Report Subscriptions > Basic configuration data > Schedules category.
2. Select the schedule in the result list.
3. Select the Assign report subscriptions task.

Mail templates for notifications about report subscriptions

**Table 3: Configuration parameters for mail templates**

<table>
<thead>
<tr>
<th>Configuration parameter</th>
<th>Meaning</th>
</tr>
</thead>
<tbody>
<tr>
<td>QER</td>
<td>RPS</td>
</tr>
</tbody>
</table>

Mail templates are used to send reports subscribed in the Web Portal, to the subscribers. The reports are attached to the notification generated from the mail template. The mail text in a mail template is defined in several languages. This ensures that the language of the recipient is taken into account when the email is generated. The report parameters are determined dynamically when the email is generated, replacing the values stored with the subscription.

One Identity Manager supplies mail templates by default. These mail templates are available in English and German. If you require the mail body in other languages, you can add mail definitions for these languages to the default mail template.
To edit a default mail template

- In the Manager, select the Report Subscriptions > Basic configuration data > Mail templates > Predefined category.

In the default installation, mail templates for sending reports are entered in configuration parameters.

To use custom templates

- In the Designer, enter the mail template into configuration parameter.

Table 4: Default templates

<table>
<thead>
<tr>
<th>Mail template</th>
<th>Description</th>
<th>Usage in Configuration Parameter</th>
</tr>
</thead>
<tbody>
<tr>
<td>Report subscription - delivery</td>

Creating and editing mail definitions for report subscriptions

For more detailed information about creating and editing mail template, see the *One Identity Manager Operational Guide*.

Mail texts can be defined in these different languages in a mail template. This ensures that the language of the recipient is taken into account when the email is generated.

**To create a new mail definition**

1. In the Manager, select the Report Subscriptions > Basic configuration data > Mail templates category.
   Mail templates that can be used for subscribable reports are displayed in the result list.
2. Select a mail template in the result list and run the Change main data task.
3. In the result list, select the language for the mail definition in the Language menu.
   All active languages are shown. To use another language, in the Designer, enable the corresponding countries. For more information, see the *One Identity Manager Configuration Guide*.
4. Enter the subject in Subject.
5. Edit the mail text in the Mail definition view with the help of the Mail Text Editor.
6. Save the changes.

**To edit an existing mail definition**

1. In the Manager, select the Report Subscriptions > Basic configuration data > Mail templates category.
   Mail templates that can be used for subscribable reports are displayed in the result list.
1. Select a mail template in the result list and run the Change main data task.
2. In the Mail definition menu, select the language for the mail definition.
   
   **NOTE:** If the Common | MailNotification | DefaultCulture configuration parameter is set, the mail definition is loaded in the default language for email notifications when the template is opened.
3. Edit the mail subject line and the body text.
4. Save the changes.

**Related topics**

- Base objects for report subscription templates on page 19
Base objects for report subscription templates

NOTE: In subscribable report templates, use the RPSSubscription or the RPSSubscriptionCC base object.

In the subject line and body text of a mail definition, you can use all properties of the object entered under Base object. You can also use the object properties that are referenced by foreign key relation.

To access properties use dollar notation. For more information, see the One Identity Manager Configuration Guide.

Editing mail templates for report subscriptions

For more information about creating and editing mail template, see the One Identity Manager Operational Guide.

A mail template consists of general main data such as target format, importance, or mail notification confidentiality, and one or more mail definitions. Mail text is defined in several languages in the mail template. This ensures that the language of the recipient is taken into account when the email is generated.

To create and edit mail templates

1. In the Manager, select the Report Subscriptions > Basic configuration data > Mail templates category.
   Mail templates that can be used for subscribable reports are displayed in the result list.
2. Select a mail template in the result list and run the Change main data task.
   - OR -
   Click in the result list.
   This opens the mail template editor.
3. Edit the mail template.
4. Save the changes.

To copy a mail template

1. In the Manager, select the Report Subscriptions > Basic configuration data > Mail templates category.
Mail templates that can be used for subscribable reports are displayed in the result list.

2. Select the mail template that you want to copy in the result list and run the **Change main data** task.
3. Select the **Copy mail template** task.
4. Enter the name of the new mail template in the **Name of copy** field.
5. Click **OK**.

**To display a mail template preview**

1. In the Manager, select the **Report Subscriptions > Basic configuration data > Mail templates** category.
   Mail templates that can be used for subscribable reports are displayed in the result list.
2. Select a mail template in the result list and run the **Change main data** task.
3. Select the **Preview** task.
4. Select the base object.
5. Click **OK**.

**To delete a mail template**

1. In the Manager, select the **Report Subscriptions > Basic configuration data > Mail templates** category.
   Mail templates that can be used for subscribable reports are displayed in the result list.
2. Select the template in the result list.
3. Click ☑️ in the result list.
4. Confirm the security prompt with **Yes**.

**Detailed information about this topic**

- Creating and editing mail definitions for report subscriptions [on page 18](#)
- Base objects for report subscription templates [on page 19](#)
- Custom processes for report subscriber notifications [on page 20](#)

**Custom processes for report subscriber notifications**

Set up customized processes to send email notifications. For more information, see the **One Identity Manager Configuration Guide**.
You can use following events for generating processes.

**Table 5: Events for "RPSSubscription" and "RPSSubscriptionCC"

<table>
<thead>
<tr>
<th>Event</th>
<th>Triggered by</th>
</tr>
</thead>
<tbody>
<tr>
<td>GenerateMail</td>
<td>Creates a report subscription notification according to a defined schedule.</td>
</tr>
</tbody>
</table>

### Creating and editing subscribable reports

**To create or edit a subscribable report**

1. In the Manager, select the Report Subscriptions > Subscribable reports category.
2. Select the report in the result list and run the Change main data task.
   - OR -
   Click in the result list.
3. Enter the required data for a subscribable report on the main data form.
4. Edit report parameters (optional).
5. Save the changes.

**To copy an existing subscribable report**

1. In the Manager, select the Report Subscriptions > Subscribable reports category.
2. Select the report in the result list.
3. Select the Create copy task.
4. Confirm the prompt with Yes.
5. Confirm the prompt with Yes if you want to deactivate the original report.
   The original report can no longer be assigned, however, existing assignments remain intact.
   - OR -
   Confirm the prompt with No if you want the original report to remain active.
6. Edit the data for a subscribable report on the main data form.
7. Save the changes.

**Creating simple reports**

To create a simple report in CSV format, you can create a data export in the Manager and save the export definition in the form of a subscribable report. This report can be displayed and subscribed to in the Web Portal. You make this report available to Web Portal users.

**NOTE:**

- To create a simple report with export definitions, enable the Data export as report plugin in the program settings in the Manager.
Simple reports that you create in the Manager can be displayed as statistics in the Manager's info system. To do this, you must alter the Manager's user interface in the Designer. In the Manager’s info system, the report opens when you double-click on the statistic's header.

For more information about how to implement statistics in the user interface for using in simple reports, see the One Identity Manager Configuration Guide.

To create a simple report with the export definition

1. In the Manager, select the Database > Export data menu item to open the export form.
2. Create the export.
3. Click in the title bar of the export form.
4. Enable Simple list report.
5. Click the button next to the report definition menu and enter the following information:
   - Name: Name of the report.
   - Description: Additional information about the report.
6. Click OK.
7. Click Save.

A subscribable report (RPSReport table) with the following properties is generated internally for the simple report.

Table 7: Properties for the subscribable report

<table>
<thead>
<tr>
<th>Property</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Name</td>
<td>Identifier for the subscribable report.</td>
</tr>
<tr>
<td>report</td>
<td>Report for which the subscribable report is generated. The VI_Report_DefaultTemplate report is used as the underlying report.</td>
</tr>
<tr>
<td></td>
<td>NOTE: The report is defined in the QER</td>
</tr>
<tr>
<td>Simple List Report</td>
<td>Specifies whether this is a report in CSV format.</td>
</tr>
<tr>
<td>Report definition</td>
<td>Definition of the simple list report in XML syntax.</td>
</tr>
</tbody>
</table>

To make the report available to Web Portal users, assign the report to the employees.
Report parameters

A report can contain several parameters that are determined when the report is created or when an email notification is generated and passed to the report. The generated report is then displayed or send by email to the subscriber corresponding to the report subscription set up. The user can query the report parameters before the report is displayed. This means, you can, for example, limit the time period or pass specific departments for displaying the report.

Report parameters are grouped internally into parameter sets. A separate parameter set is automatically created for very report, every subscribable report, and every report subscription. The parameters and their settings are passed down in the sequence report- >subscribable report- >report subscriptions.
You can configure report parameters at several places.

Parameters for reports

Define the report parameters to use when you create the report in the Report Editor. This is where you specify which report parameters are viewable or writable and which are already predefined in a subscribable report.

Parameters for subscribable reports

When you add a subscribable report viewable parameters are displayed in the Manager. You can make further changes to these report parameters assuming they can be overwritten. That means, you specify which report parameters can be viewed or overwritten by Web Portal users and define parameter values.

Parameters for report subscriptions

Report parameters labeled as viewable and editable in subscribable reports, are shown to Web Portal users when they are setting up their personal report subscriptions. If the report
parameters are editable, Web Portal users can modify the values in them.

Related topics

Editing report parameters for subscribable reports

Report parameters are displayed in the Manager when a subscribable report is added. You can make further changes to these report parameters assuming they can be overwritten. That means, you specify which report parameters can be viewed or overwritten by Web Portal users and define parameter values.

Use the following settings when editing subscribable reports to inherit parameter properties:

- **Value inherited**
  This value is provided by a simple menu on the form for various parameter properties.
- **Empty**
  Leave the input field for menu item empty. This ensures that the parameter property settings are inherited from the report.

**IMPORTANT:** If a preprocessor condition is given in a subscribable report, you must ensure that all report parameters depending on this preprocessor condition have a default value in the underlying report in the Report Editor. If the value query is used for a report parameter type, this must be overwritten with the value fixed in the subscribable report. Otherwise, errors may occur when the report is generated.

To edit report parameters

1. In Manager, in the **Report Subscriptions > Subscribable Reports** category, select the subscribable report.
2. Select the **Change main data** task.
3. To load the parameter's main data, on the **Parameters** tab, select the report parameter in the upper section of the main data form.
4. Edit the report parameters.
   | **TIP:** The actual parameter values are shown next to the fields and menus.
5. Click **Save.**

Adding or removing simple report parameters

| NOTE: You can only perform these tasks for simple reports. |

When you create a simple report in Manager, you use the **VI_Report_DefaultTemplate** report is used as a template. This report does not contain any report parameters itself. To use report parameters in the report definition of simple reports, you can add the report parameters in the Manager. You can remove report parameters that are no longer needed.

**To add a report parameter**

1. In Manager, in the **Report Subscriptions > Subscribable Reports** category, select the subscribable report.
2. Select the **Change main data** task.
3. On the **Parameters** tab, select the **Add** button.
4. Enter the report parameter's main data.
5. Click **Save**.

**To remove a report parameter**

1. In Manager, in the **Report Subscriptions > Subscribable Reports** category, select the subscribable report.
2. Select the **Change main data** task.
3. Select the report parameter on the **Parameters** tab in the upper section of the main data form.
4. Click the **Remove** button.
5. Click **Save**.

</tr>
<tr>
<td></td>
<td>report is created. On the <strong>Value calculation</strong> tab, enter the table</td>
</tr>
<tr>
<td></td>
<td>column and the condition for calculating the value.</td>
</tr>
</tbody>
</table>

Other settings are shown or hidden depending on the type.

| Display name       | User friendly name for the parameter. To display language dependent         |
|--------------------| display names, translate the given text with the button.                   |
| Description        | Text field for additional explanation. Translate the given text with the   |
| Sort order         | button.                                                                     |
| Mandatory parameter| Specifies whether this is a mandatory parameter. You must give a value for  |
| Viewable           | a mandatory parameter.                                                      |
| Can be overwritten  | Specifies whether the parameter can be overwritten by Web Portal users      |
|                    | when a report subscription is created.                                      |

Value definition for report parameters

Use the value definition to specify the parameter value and define the characteristics of the parameter value. Other input is shown or hidden depending on the parameter definition values.

**NOTE:** **Parameter value** and **Default value** are heavily influenced by the parameter value definition. This is shown, on one hand, by dynamic customizing of the controls.
available for the parameter value and default value, and on the other hand, by dynamic customizing of the values available themselves.

That is why it is recommended to edit the parameter definition first assuming this is necessary.

Enter the following data for a parameter definition:

**Table 9: Value definition**

<table>
<thead>
<tr>
<th>Property</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Data type</td>
<td>Parameter data type.</td>
</tr>
<tr>
<td>Date add-on</td>
<td>Additional information about calculating date and time data for displaying in the user interface. The value can be edited if the Date data type is selected.</td>
</tr>
<tr>
<td>Value range</td>
<td>Specifies whether the report parameter value has to be within a given range. If Yes, additional fields appear.</td>
</tr>
<tr>
<td>Multivalue</td>
<td>Specifies whether the parameter accepts multiple values. If Yes, users can select multiple value from a list.</td>
</tr>
<tr>
<td>Multiline</td>
<td>Specifies whether the parameter contents can have multiple lines. If Yes, line breaks are permitted.</td>
</tr>
<tr>
<td>Data source</td>
<td>Type of data source. Permitted values are:</td>
</tr>
<tr>
<td></td>
<td>* None: The user can give any value.</td>
</tr>
<tr>
<td></td>
<td>* Table: The user selects a value from a specified table column.</td>
</tr>
<tr>
<td></td>
<td>* List of permitted values: The user selects a value from a predefined list.</td>
</tr>
</tbody>
</table>

You may require additional data depending on the data source.

<table>
<thead>
<tr>
<th>Table column (query)</th>
<th>Additional data for the data source Table.</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Table column for selecting the parameter value. The user can select a value from this table column. If the parameter is multi-value, you can select several values from this column as well.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Display pattern</th>
<th>Additional data for the data source Table.</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Display pattern for table elements in lists in %column% notation. The ?? operator is permitted. This means, when one column's value is empty, another column's value is displayed.</td>
</tr>
<tr>
<td></td>
<td>Example: %column1??column2??column3%</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Condition (query)</th>
<th>Additional data for the data source Table.</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Limiting condition (Where clause) for selecting the parameter value using a table column. The user can select a value from the result set. If the parameter is multi-value, you can select several values from this result set as well.</td>
</tr>
</tbody>
</table>

You can reference other parameters in the condition using the following
**Property** | **Description** 
---|---
Syntax:  
$PC(<Parametername>)$  
Example:  
UID_Database = $PC(UID)$  
where UID is the name of the referenced report parameter.

List of permitted values  
Additional data for the data source **List of permitted values**. 
List of values permitted in this parameter in the `value=display name` notation. If an `=` is no given, the entry counts as both value and display name. 
Example: 1=internal 2=external  
To display language dependent display names, translate each display name using the button.

Overwrite empty value  
Specifies whether an empty parameter value overwrites the default value. 
If this option is disabled, the default value is overwritten if a parameter value is not given.

Parameter value  
Parameter value If a value range is given, the **Parameter value (from)** and the **Parameter value (to)** are displayed.

Example value  
Example of the parameter. The example value is used to create a report preview. 
If a value range is given, the **Example value (from)** and the **Example value (to)** are displayed.

Default value  
Default value of the parameter. This is used if the user does not specify a parameter value and the **Overwrite empty value** option is not set. 
If a value range is given, the **Default value (from)** and the **Default value (to)** are displayed.

**Value calculation for report parameters**

Enter the following data if the report parameter is calculated:

**Table 10: Scripts for calculating values**

<table>
<thead>
<tr>
<th>Property</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Table column (calc.)</td>
<td>Additional input for <strong>Calculated</strong> parameter type.</td>
</tr>
<tr>
<td></td>
<td>Table column for selecting the parameter value. The parameter value is determined at runtime when the report is created.</td>
</tr>
<tr>
<td>Property</td>
<td>Description</td>
</tr>
<tr>
<td>----------</td>
<td>-------------</td>
</tr>
<tr>
<td>Condition (calc.)</td>
<td>Additional input for Calculated parameter type. Limiting condition (where clause) for selecting the value through a table column. The parameter value is determined at runtime when the report is created. If the parameter is multivalue as well, several values may be found. If a condition is not given and the parameter is not multivalue, the first value is used that is determined by the table column. If the parameter is multivalue and a condition is not given, all determined values are used.</td>
</tr>
<tr>
<td>Valuation script</td>
<td>Script in VB.Net syntax for modifying the parameter value. The script can be used as a formatting script and the existing parameter value modified or reset the parameter value.</td>
</tr>
<tr>
<td>Validation script</td>
<td>Script in VB.Net syntax for checking permitted values of parameters. Create a script that checks the user input.</td>
</tr>
</tbody>
</table>

## Displaying report previews

Use this task to display subscribable report while you are editing it. Enter any report parameters required in the dialog box.

**To display a report preview**

1. In the Manager, select the Report Subscriptions > Subscribable reports category.
2. Select the report in the result list.
3. Select the Change main data task.
4. Select the Report preview task.
5. Enter the report parameter value in the dialog box and confirm with OK.

**NOTE:** The dialog window is only shown if required for displaying report parameters for this report.

## Assigning subscribable reports to employees

Subscribable reports can be assigned to employees directly, indirectly, or through IT Shop requests. In the case of indirect assignment, employees and subscribable reports are arranged in hierarchical roles. The number of subscribable reports assigned to an employee is calculated from the position in the hierarchy and the direction of inheritance.
Add employees to a shop as customers so that subscribable reports can be assigned through IT Shop requests. All subscribable reports assigned to this shop can be requested by the customers. Requested subscribable reports are assigned to the employees after approval is granted.

**Prerequisites for indirect assignment to employees**

- Assignment of employees and subscribable reports is permitted for role classes (departments, cost centers, locations, or business roles).

**To configure assignments to roles of a role class**

1. In the Manager, select role classes in the **Organizations** > **Basic configuration data** > **Role classes** category.
   - OR -
   In the Manager, select role classes in the **Business roles** > **Basic configuration data** > **Role classes** category.
2. Select the **Configure role assignments** task and configure the permitted assignments.
   - To generally allow an assignment, enable the **Assignments allowed** column.
   - To allow direct assignment, enable the **Direct assignments permitted** column.
3. Save the changes.

**NOTE:** There are other configuration settings that play a role when company resources are inherited through departments, cost centers, locations, and business roles. For example, role inheritance might be blocked or inheritance of employees not allowed. For more detailed information about the basic principles for assigning company resources, see the *One Identity Manager Identity Management Base Module Administration Guide*.

**Detailed information about this topic**

- Assigning subscribable reports to departments, cost centers, and locations on page 34
- Assigning subscribable reports to business roles on page 34
- Adding subscribable reports to the IT Shop on page 35
- Assigning subscribable reports to application roles on page 36

- Adding subscribable reports to system roles on page 37
- Technical details for inheriting subscribable reports on page 44
Assigning subscribable reports to departments, cost centers, and locations

Assign the subscribable report to departments, cost centers, and locations for it to be assigned to employees through these organizations.

To assign a subscribable report to departments, cost centers, and locations

1. In the Manager, select the Report Subscriptions > Subscribable reports category.
2. Select the report in the result list.
3. Select the Assign organizations task.
4. In the Add assignments pane, assign the organizations:
   - On the Departments tab, assign departments.
   - On the Locations tab, assign locations.
   - On the Cost centers tab, assign cost centers.

   **TIP:** In the Remove assignments pane, you can remove assigned organizations.

To remove an assignment

- Select the organization and double-click ✖.
5. Save the changes.

Assigning subscribable reports to business roles

**NOTE:** This function is only available if the Business Roles Module is installed.

Assign the subscribable report to business roles for it to be assigned to employees through these business roles.
**To assign a subscribable report to business roles**

1. In the Manager, select the **Report Subscriptions > Subscribable reports** category.
2. Select the report in the result list.
3. Select the **Assign business roles** task.
4. In the **Add assignments** pane, select the role class and assign business roles.
   
   **TIP:** In the **Remove assignments** pane, you can remove assigned business roles.

   **To remove an assignment**
   - Select the business role and double-click ✗.
5. Save the changes.

**Adding subscribable reports to the IT Shop**

Once a subscribable report has been assigned to an IT Shop shelf, it can be requested by the shop customers through the Web Portal. For more information about the IT Shop, see the *One Identity Manager IT Shop Administration Guide*.

There are other prerequisites requirements to make a subscribable report requestable.

- The subscribable report must have the **IT Shop** option set.
- The subscribable report must be assigned a service item.
- The subscribable report must have the **Only use in IT Shop** option set if it can only be assigned to employees using IT Shop requests. This means that the subscribable report may not be directly assigned to roles outside the IT Shop.

**To add a subscribable report to the IT Shop**

1. In the Manager, select the **Report Subscriptions > Subscribable reports** category.
2. Select the report in the result list.
3. Select the **Add to IT Shop** task.
4. In the **Add assignments** pane, assign the report to IT Shop shelves.
5. Save the changes.

### Assigning subscribable reports to application roles

Subscribable reports can be inherited by members of these roles through report assignment to the application roles. For detailed information about implementing and editing application roles, see the *One Identity Manager Authorization and Authentication Guide*.

**NOTE:** Subscribable reports are not inherited by members of **Base roles | Employee Manager**, **Base roles | Everyone (Lookup)** and **Base roles | Everyone (change)**.

**To assign a subscribable report to application roles**

1. In the Manager, select the **Report Subscriptions > Subscribable reports** category.
2. Select the report in the result list.
3. Select the **Assign to application roles** task.
4. In the **Add assignments** pane, assign the application roles.
   
   **TIP:** In the **Remove assignments** pane, you can remove application role assignments.

   **To remove an assignment**
   
   - Select the application role and double-click ✅.
5. Save the changes.

**Related topics**

- [Assigning subscribable reports to departments, cost centers, and locations](#) on page 34
- [Assigning subscribable reports to business roles](#) on page 34
Assigning subscribable reports directly to employees

You can assign subscribable reports directly or indirectly to employees. Indirect assignment is carried out by assigning the employee and subscribable report to company structures, like departments, cost centers, locations, or business roles.

In order to react quickly to special requests, you can also assign subscribable reports directly to employees.

To assign a subscribable report to individual employees

1. In the Manager, select the **Report Subscriptions > Subscribable reports** category.
2. Select the report in the result list.
3. Select the **Assign to employees** task.
4. In the **Add assignments** pane, add employees.
   
   **TIP:** In the **Remove assignments** pane, you can remove assigned employees.

   To remove an assignment
   
   - Select the employee and double-click ✓.

5. Save the changes.

- Assigning subscribable reports to application roles on page 36
- Adding subscribable reports to system roles on page 37

Adding subscribable reports to system roles

| NOTE: This function is only available if the System Roles Module is installed.
Use this task to add the subscribable report to system roles. If you assign a system role to employees, the subscribable reports contained in the system role are inherited by the employees.

**NOTE:** Subscribable reports with the **Only use in IT Shop** option enabled, can only be assigned to system roles that also have this option set. For more information, see the *One Identity Manager System Roles Administration Guide*.

**To assign a subscribable report to system role**

1. In the Manager, select the **Report Subscriptions > Subscribable reports** category.
2. Select the report in the result list.
3. Select the **Assign system roles** task.
4. In the **Add assignments** pane, assign system roles.
   
   **TIP:** In the **Remove assignments** pane, you can remove assigned system roles.

   **To remove an assignment**
   
   - Select the system role and double-click ☑.
5. Save the changes.

**Related topics**

- Assigning subscribable reports to departments, cost centers, and locations on page 34
- Assigning subscribable reports to business roles on page 34

- Assigning subscribable reports to application roles on page 36
- Assigning subscribable reports directly to employees on page 37

**Displaying report subscriptions**

Every user sets up their personalized report subscriptions through the Web Portal. For more information, see the *One Identity Manager Web Designer Web Portal User Guide*.

**To show subscription settings**

- In the Manager, select the **Report Subscriptions > Report subscriptions** category.

  This shows you which employees have subscribed to which reports. If necessary, you can view the subscription settings at this point.

**IMPORTANT:** Do not change any report subscription settings. The settings are generated by the Web Portal user when report subscriptions are set up.
Disabling subscribable reports

Only subscribable reports that are enabled can be assigned within the One Identity Manager. If a subscribable report is disabled you are prevented from assigning it. Existing assignments remain intact.

**IMPORTANT:** If you disable a subscribable report, existing Web Portal user report subscriptions are canceled.

**To disable a report**

1. In the Manager, select the **Report Subscriptions > Subscribable reports** category.
2. Select the report in the result list.
3. Select the **Change main data** task.
4. Set the **Disabled** option.
5. Save the changes.

You can disable subscribable reports using preprocessor conditions. For more information, see [General main data of subscribable reports](#) on page 22.

**To display a disabled report**

- In the Manager, select the **Report Subscriptions > Basic configuration data > Disabled reports** category.
Sending subscribed reports

The following prerequisites are required to send reports by email:

- A Job server is set up for sending mail with the **SMTP Host** server function. For detailed information about setting up a Job server and about configuring the One Identity Manager Service, see the *One Identity Manager Configuration Guide*.

  **NOTE:** To generate and send report subscriptions and reports with data changes by email, information is taken from a One Identity Manager History Database. If the One Identity Manager History Database is linked to the One Identity Manager database’s TimeTrace with an ID, the Job server must operate through an application server that has this ID in its configuration file (web.config). For detailed information about connecting to the One Identity Manager History Database through an application server and the required configuration, see the *One Identity Manager Operational Guide*.

- Ensure that the email notification system is configured in One Identity Manager. For more information, see the *One Identity Manager Installation Guide*.

- In the Designer, set the **QER | RPS | DefaultSenderAddress** configuration parameter and enter the sender address for sending the email notification.

- Ensure that all employees have a default email address. Notifications are sent to this address. For more information, see the *One Identity Manager Identity Management Base Module Administration Guide*.

- Ensure that a language can be determined for all employees. Only then can they receive email notifications in their own language. For more information, see the *One Identity Manager Identity Management Base Module Administration Guide*.

**Saving the subscribed reports in a central repository**

If an error occurs when sending a subscribed report, it can be saved on a drop server. It may also be necessary to always save the subscribed report in a drop box. The subscriber owner then receives an email message with the drop location of the report. The report is deleted from the drop server after a specified period of time.
To save a report on a drop server

1. Configure a default report server. You need to provide a server installed with the One Identity Manager Service and started.

   **NOTE:** To generate and send report subscriptions and reports with data changes by email, information is taken from a One Identity Manager History Database. If the One Identity Manager History Database is linked to the One Identity Manager database’s TimeTrace with an ID, the Job server must operate through an application server that has this ID in its configuration file (web.config). For more information about connecting to the One Identity Manager History Database through an application server and the required configuration, see the *One Identity Manager Operational Guide*.

2. Declare the default report server in One Identity Manager.
   - In the Designer, enter a new Job server in the **Base Data > Installation > Job servers** category or select an existing Job server and mark it with the **Default report server** server mask.

3. Set up a drop box. The default report server One Identity Manager Service requires write access to this directory.

4. Declare the drop box in One Identity Manager.
   - In the Designer, set the **QER | RPS | SubscriptionStorageShare** configuration parameter and enter the repository for the reports as the value using the `\<Server>\<Share>` syntax.

To always save a report in a drop box

- In the Designer, set the **QER | RPS | StoreSubscription** configuration parameter.

   **NOTE:** If the configuration parameter is not set, subscribed reports are only saved in the drop box if an error occurs when the emails are sent.

To delete a report on the drop server

1. Specify a retention period for the report on the drop server, after which the report is deleted.
   - In the Designer, set the **QER | RPS | SubscriptionStorageLifeTime** configuration parameter and enter the number of days as the value.

   Reports are deleted at the end of this period. The default retention time is 7 days.

2. In the Designer, select the **Cleans up report subscription storage** schedule and adjust the settings as required.
Appendix A

Configuration parameters for subscribable reports

The following configuration parameters are additionally available in One Identity Manager after the module has been installed.

### Table 11: Configuration parameter for report subscriptions

Technical details for inheriting subscribable reports

An employee can directly obtain subscribable reports. An employee also inherits all subscribable reports (including those passed on) of all roles in which they are a member (PersonIn<BaseTree> table) and the subscribable reports of all roles referenced through foreign key relations (Person table, UID_<BaseTree> column). Assignments of subscribable reports to roles are saved in the <BaseTree>HasRPSReport table.

Subscribable reports can be inherited by system roles. For more information, see the One Identity Manager System Roles Administration Guide.

Direct and indirect assignments of subscribable reports to employees are mapped in the PersonHasRPSReport table.

Figure 4: Inheritance with direct assignment of subscribable reports to employees
Figure 5: Inheritance with indirect secondary assignment of subscribable reports to employees

Figure 6: Inheritance with indirect primary assignment of subscribable reports to employees
One Identity solutions eliminate the complexities and time-consuming processes often required to govern identities, manage privileged accounts and control access. Our solutions enhance business agility while addressing your IAM challenges with on-premises, cloud and hybrid environments.

Contacting us

For sales and other inquiries, such as licensing, support, and renewals, visit https://www.oneidentity.com/company/contact-us.aspx.

Technical support resources

Technical support is available to One Identity customers with a valid maintenance contract and customers who have trial versions. You can access the Support Portal at https://support.oneidentity.com/.

The Support Portal provides self-help tools you can use to solve problems quickly and independently, 24 hours a day, 365 days a year. The Support Portal enables you to:

- Submit and manage a Service Request
- View Knowledge Base articles
- Sign up for product notifications
- Download software and technical documentation
- View how-to videos at www.YouTube.com/OneIdentity
- Engage in community discussions
- Chat with support engineers online
- View services to assist you with your product
