Known issues

For more information about the known issues in One Identity Manager version 9.2, visit the Known issues page on the Support Portal.

System requirements

Before using the November 30, 2023 One Identity Manager On Demand (Starling Edition) release, ensure that your system meets the following minimum software requirements.

Supported browsers

You can use any browser to access One Identity Manager On Demand cloud components if it is supported by One Identity Starling. For more information about this, see the *One Identity Starling User Guide*.

System requirements for One Identity Manager On Demand on-premises components

The following system requirements represent the minimum requirements for installing and unlimited operation of One Identity Manager On Demand on-premises components. For more information about the system requirements, see the
One Identity Manager On Demand (Starling Edition) Quick Start Guide.

Every installation can be virtualized. Ensure that performance and resources are available to the respective One Identity Manager On Demand on-premises components according to system requirements. Virtualization of an installation should only be attempted by experts with strong knowledge of virtualization techniques.

NOTE: When setting up a virtual environment, carefully consider the configuration aspects such as CPU, memory availability, I/O subsystem, and network infrastructure to ensure the virtual layer has the necessary resources available. For more information about environment virtualization, see One Identity's Product Support Policies.

Table 1: Minimum system requirements - Job server

Processor	8 physical cores 2.5 GHz+
Memory	16 GB RAM
Hard drive storage	40 GB
Operating system	Windows operating systems Following versions are supported: • Windows Server 2022 • Windows Server 2019 • Windows Server 2016 • Windows Server 2012 R2 • Windows Server 2012
Additional software	• Microsoft .NET Framework version 4.8 or later NOTE: Take the target system manufacturer's recommendations for connecting the target system into account.

Table 2: Minimum system requirements - administrative workstations

Processor	4 physical cores 2.5 GHz+
Memory	4 GB+ RAM
Hard drive storage	1 GB

Operating system	Windows operating systems
	Following versions are supported:
	• Windows 11 (x64)
	• Windows 10 (32-bit or 64-bit) with version 1511 or later
Additional software	• Microsoft .NET Framework version 4.8 or later
	• Microsoft Edge WebView2
Supported browsers	• Firefox (Release Channel)
	• Chrome (Release Channel)
	• Microsoft Edge (Release Channel)

Product licensing

Use of this software is governed by the Software Transaction Agreement found at
https://www.oneidentity.com/legal/sta.aspx. This software does not require an activation
or license key to operate.

Globalization

This section contains information about installing and operating this product in non-English configurations, such as those needed by customers outside of North America. This section does not replace the materials about supported platforms and configurations found elsewhere in the product documentation.

This version supports any single-byte character set. Double-byte or multi-byte character sets are not supported. In this release, all product components should be configured to use the same or compatible character encodings and should be installed to use the same locale and regional options. This release is targeted to support operations in the following regions: North America, Central and Eastern Europe.
