Topics:

- About this release
- Enhancements
- Previous Updates
- System requirements
- Product licensing
- More resources
- Globalization
- About us

About this release

Archive Migrator for Notes is a companion solution for Migrator for Notes which allows your end-user community to find, select, and replicate their local Notes mail archives in preparation for migration.

After configuration, the administrator can send a message with a button to launch the Local Archive Discovery application to each user. The Local Archive Discovery application steps the user through the discovery and selection of their mail archives. Once selected, the archives are replicated and prepared for migration. Archives can then be automatically migrated or the administrator can manually migrate them depending on how the process is configured.

Archive Migrator for Notes 20.14.1 is a minor release, with enhanced features.

Enhancements
