New Features and Enhancements in erwin Mart Portal

Following new features and enhancements are available in erwin Mart Portal 12.5..

Enterprise Modeling Compliance

Enterprise modeling Compliance (EMC) provides a mechanism for mart-privileged, non-administrator users to apply metadata standards across mart catalogs in order to maintain quality of data models at the enterprise level. Using EMC, you can create customized data compliance policies and rules for data models saved to Mart. You can also create user-defined jobs to apply these policies to the models and generate comprehensive reports with pass, error, and warning statistics.

For more information, refer to the [Enterprise Modeling Compliance](#) topic.

Enterprise Glossary

Enterprise Glossary provides a mechanism to employ your business terms, vocabularies, ontologies, and standards weaved together to build and govern an enterprise-level standard for your mart-catalog assets.

For more information, refer to the [Enterprise Glossary](#) topic.

Git Support

You can now view the DDL of a model version and compare it with another version of the model from the Catalogs pane.

DM Connect for DI Support

The DM Connect for DI feature has been upgraded to support:

- Importing one or more erwin Data Intelligence (erwin DI) environments to erwin Data Modeler (erwin DM)
- Multiple erwin DI configurations
- erwin DI v13.0

Enhancements

erwin Mart Portal has undergone several enhancements as follows:

- Email addresses or user name, individually as well as together are supported as your default selector instead of only username. You can configure this under settings to be displayed across erwin Mart Portal and erwin ER360.
- The catalog tree displays a Sensitive Data Indicator, SDI tag for models that contain sensitive data.
- Ability to control the level of permission and assign a user or a group to a profile, library, or model has been added.
- View as a permission at library level has been added.
- Using the Project Explorer in erwin DM, you can save projects and their models to mart under catalogs.
- You can generate Personal Access Tokens for REST API via Settings.
- User device tracking for logs is supported.

Third Party Tools

Support for third-party tools has been upgraded as follows:

- Apache Server v2.4.57
- AdoptOpenJDK has been upgraded from Build 16.0.1+9 to 17.0.7.
- OpenSSL has been upgraded to version 3.1.0.0.

erwin ER360

erwin ER360 provides unified and central visuals of your erwin data models to help you manage, review, and govern your on-premise or SaaS 'On Cloud Mart' data models. It provides self-service access to visualization and detailed metadata classification to encourage business teams, governance teams, and other stakeholders to collaborate and increase data literacy. For more information, refer to [erwin ER360 Online Help](#).

Known Issues

Following is a list of known issues in erwin Mart Portal and erwin ER360:

erwin Mart Portal

Issue	Description
Error msg is displayed when the DI model is opened in erwin DM - Checkout Enabled	When you open a model imported from erwin Data Intelligence (erwin DI) via DM Connect for DI, an error is displayed even though the model is imported correctly. Click OK on the error message to proceed.
erwin Mart - Cassandra: Exporting	The export of a Cassandra model into erwin DI Suite using DM connect for DI is displaying unwanted values in erwin DI Suite. After the export, the Column Definition value is displayed in the Column Comments.

What's New-erwin Mart Portal

Issue	Description
Cassandra model into DI Suite displays the Column Definition value in Column Comments	
erwin Mart - Azure SQL: The Settings	The Settings and DI Configuration tabs do not display user password in the erwin Mart that is configured with Azure SQL.

What's New-erwin Mart Portal

Issue	Description
and DI Configuration tabs do not display password	
erwin Data Modeler cannot connect to erwin Mart Portal on Host Machine	<p>erwin Data Modeler (DM) cannot connect to the erwin Mart Portal (MS) on an erwin Mart Portal host machine. This happens because the client application version is different from the erwin MS version. To counter this issue, do the following:</p> <ol style="list-style-type: none"> 1. Open Internet Explorer. 2. Click Internet options. 3. Go to the Security tab. 4. Set security level to low. 5. Click Sites. 6. Add <code>http://machine-name:18170/MartAdmin/</code> or <code>http://ip address:18170/MartAdmin/</code> 7. Try to connect the Mart from erwin DM with IP address or machine name.
Mart	Suppose that you provide the Mart Portal machine name in the Korean language

What's New-erwin Mart Portal

Issue	Description
Portal Name in Korean	<p>(Korean characters) and configure the Mart Portal. If you try to connect to the Mart from erwin DM and you provide the Korean language name for Server Name, the following message appears:</p> <p>The client application version is different from the Mart Portal version. Install the same version of the application and the Mart Portal and then try.</p> <p>If you try to log in to erwin Mart Portal by using the Korean language name, it does not display.</p>
Error While Creating a Profile Using Special Characters in Mart Portal	<p>When you create a profile in Mart Portal using special characters such as !@#%&*()_+={}:"-<>? /.,;'\[], and space, you will get one of the following error messages repeatedly and the Mart Portal hangs.</p> <p>Illegal Group</p> <p>or</p> <p>500 The call failed on the server; see server log for details</p> <p>or</p> <p>String index out of Range:1</p> <p>To avoid this error, create a profile without using the special characters. When the Mart Portal hangs, refresh the Mart Portal.</p>
Generating Reports with Korean	<p>Suppose that you have initialized a Mart with a user name that has Korean characters. You connect to the Mart with this user name and generate a report on Mart users (click Tools, Mart Reports, Global Reports, Users). The report is not generated and the message, You can not connect. Incorrect log on parameters is displayed. (The actual message is displayed in the Korean language. The message provided here is the translated message.)</p>

What's New-erwin Mart Portal

Issue	Description
Character- s in User Nam- e	
DM Con- nect for DI: Valid val- ues are not expor- ted, if the name excee- ds 255 char- acter- s	When you use the validation rules, valid values are not exported to DI if the names exceed 200 characters.
Vari- ance in NSM	Edit NSM option and few variances are noticed after running the report

What's New-erwin Mart Portal

Issue	Description
Reports in erwin DM	
DM-DI Connect: Validation Rule Valid Value properties are not displaying in an order	Validation Rule of Valid Value property values are not displaying in a sequence order for each valid Value .Currently its displaying the order based on the value its created first.

erwin ER360

Issue	Description
Metadata Browser-Representation of Neo4j nodes on physical side of ER360's ER diagram differs from the one represented in DM.	Representation of Neo4j nodes on physical side of ER360's ER diagram differs from the one represented in DM.

What's New-erwin Mart Portal

Issue	Description
Metadata-The Subtype symbols doesn't match in ER 360 when compared to Erwin DM. Subtype allign issue	The subtype relationship display of ER360 is not matching with erwin DM. Instead of subtype symbol the clear line is shown in ER 360. The path of subtype is also different
Metadata browser- Data types are not getting changed after applying the DSM in Dataflow impact analysis	After applying the DSM the data types are not getting changed from logical to physical
