- Getting Started
- · System requirements
- Supported platforms
- Product licensing
- Release History
- About us

About ApexSQL Search

ApexSQL Search is a SQL Server Management Studio and Visual Studio add-in, for SQL object and data text search, managing extend properties, rename objects without breaking dependencies.

New Features

This version of ApexSQL Search introduces the following new features, enhancements or deprecations:

Fixes:

 The "Failed to login. Internet connection is required to continue. Click Retry to try again" error is encountered on application start

Changes:

• Multi-select option to select all databases has been added in the Text Search database drop-down menu

Known issues:

 "The 'ApexSOLSearchJnstPackage' package did not load correctly" error is encountered when the Visual Studio 2019 16.7 version is started

Getting Started

 For further information about installation and getting started, please check the Quest Knowledge Base or ApexSQL Getting Started.

System requirements

Before installing or upgrading Short Product Name Version, ensure that your system meets the following minimum hardware and software requirements.

Hardware	Dual Core 2.0 GHz CPU 4 GB memory 95 MB disk space
SQL Server	SQL Server 2005 and higher [1] Azure SQL Database [1] Amazon RDS for SQL Server [1]
Add-in integration	SQL Server Management Studio 2012 and higher Visual Studio 2010 and higher
os	Windows 7 SP1/Windows Server 2008 R2 SP1 and higher [1]
Software	.NET Framework 4.7.2 or higher

Permissions and additional requirements	Windows user account with administrative privileges
additional requirements	See Minimum permissions required to install and use ApexSQL products
	See Minimum SQL Server permissions for ApexSQL Developer tools
	See Remote access for SQL Server instance

^[1] See Supported systems for exact version support

Supported platforms

Windows version						
Windows 7 SP1 & Windows Server 2008 R2 SP1	Windows Server 2012	Windows 8.1 & Windows Server 2012 R2	Windows 10 & Windows Server 2016	Windows Server 2019		
~	~	~	~	~		

SQL Server version									
	2005 2	2008	2008 2012	2014 2016	2016	2017		2019 CTP 3	
					Windows	Linux [3]	Windows	Linux 🙉	
ApexSQL Search	~	~	~	~	~	~	~	~	~

^[2] You can use the latest full-featured backwards compatible SQL Server Management Studio for free. Click here

SQL Server edition							
				Azure SQL Database		Amazon RDS	
	Express	Standard	Enterprise	Single Database, Elastic Pool	Managed Instance	for SQL Server	
ApexSQL Search	~	~	~	~	~	~	

Visual Studio add-in integration								
	2010 2012 2013 2015 2017 2019							
ApexSQL Search	~	~	~	~	~	~		

SQL Server Management Studio add-in integration							
	2012	2014	2016	17	18		
ApexSQL Search	~	~	~	~	~		

^[3] Tested on Ubuntu 16.04

^[4] Including Amazon EC2, Google Compute Engine, and Azure Virtual Machine cloud computing SQL Server instances.

Release History (release notes)

Release: 2022.02.0189 Date: Jun 10, 2024

Fixes:

 The "Failed to login. Internet connection is required to continue. Click Retry to try again" error is encountered on application start

Changes:

Multi-select option to select all databases has been added in the Text Search database drop-down menu

Release: 2022.01.0182 Date: May 12, 2022

Fixes:

- 162811: A selected database from Object Explorer is not automatically targeted within Object search controls
 when a search is initiated from the toolbar
- 165044: Application default shortcuts under the Options dialog cannot be modified and saved
- 165047: SQL Server Management Studio stops working when the ellipsis button is clicked from the result grid
 under the Column value of the Text search pane and the user is connected to a remote server using Azure
 Active Directory Integrated authentication
- 165725: "Unsaved documents cannot be cut or copied to the clipboard from the miscellaneous files project.
 You must save the unsaved document(s) before cutting or copying them." error message appears when either
 Ctrl+C or Ctrl+X command is used from the Search text box of the Text search panel
- 165732: The Text search feature does not find any results when the search string has either leading or trailing whitespace characters in the search phrase
- 165734: Initiated text search is not cancelled when the Text search pane is closed
- 172022: Text search feature does not work when invoked against an Azure SQL database and the user does not have access to the master database
- 186418: Unable to determine which connection is being used to perform either an object or data search from the drop-down list of distinct server names under the Database section
- 194476: Objects search and Text search features do not work when clicked from the toolbar if no server is previously selected from either SQL Server Object Explorer or Server Explorer in Visual Studio
- 199489: "Insufficient permissions to access master database" info message is shown when either Object search or Text search is initiated and the user is connected to a remote server using Azure Active Directory -Integrated authentication
- 200245: Text search feature does not return any results if the search scope has a table with a column of either money or smallmoney data types

Changes:

- The activation model is switched to Subscription
- The application does not support integration into SQL Server Management Studio 2012, 2014, and 2016 versions
- The application does not support integration into Visual Studio 2010, 2012, 2013, and 2015 versions
- Ignore whitespaces option is added for the Text search feature for easier control of the search scope

Known issues:

 "The 'ApexSOLSearchJnstPackage' package did not load correctly" error is encountered when the Visual Studio 2019 16.7 version is started

Release: 2021.01.0188

Date: November 02, 2020

Changes:

 The application is now part of the ApexSQL Fundamentals Toolkit for SQL Server bundle and requires activation

Release: 2020.03.0178

Date: October 08, 2020

Fixes:

 188714: SQL Server Management Studio stops working when the Data search is initiated and then canceled by closing the Text search tab

Release: 2020.02.0173

Date: July 30, 2020

Fixes:

 "Insufficient permissions to access master database" error is encountered when a connection to an Azure SQL Database is established with the Azure Active Directory - Universal with MFA authentication method and the Object search or Text search feature is used

Changes:

• Error handling and send logs functionality has been modified

About us

Quest creates software solutions that make the benefits of new technology real in an increasingly complex IT landscape. From database and systems management, to Active Directory and Office 365 management, and cyber security resilience, Quest helps customers solve their next IT challenge now. Around the globe, more than 130,000 companies and 95% of the Fortune 500 count on Quest to deliver proactive management and monitoring for the next enterprise initiative, find the next solution for complex Microsoft challenges and stay ahead of the next threat. Quest Software. Where next meets now. For more information, visit www.quest.com.

Technical Support Resources

Technical support is available to Quest customers with a valid maintenance contract and customers who have trial versions. You can access the Quest Support Portal at https://support.quest.com.

The Support Portal provides self-help tools you can use to solve problems quickly and independently, 24 hours a day, 365 days a year. The Support Portal enables you to:

- · Submit and manage a Service Request
- View Knowledge Base articles
- Sign up for product notifications
- · Download software and technical documentation
- View how-to-videos
- Engage in community discussions
- Chat with support engineers online
- View services to assist you with your product.
