

One Identity Manager Data Governance Edition 9.3.1.76

Cumulative Update 1

22 August 2025, 12:23

This cumulative update includes the changes listed in the following sections. One Identity may generate additional cumulative updates for future releases of the product.

Topics:

- [About this cumulative update](#)
- [Resolved issues](#)
- [Applicability of this cumulative update](#)
- [Installing this cumulative update](#)
- [About us](#)

About this cumulative update

This cumulative update addresses multiple known issues in the product. The minimum version required for installing this cumulative update is One Identity Manager Data Governance Edition 9.2.x .

This cumulative update contains all resolved issues since the general release of One Identity Manager Data Governance Edition 9.3.1.

Determining if this cumulative update is needed

This cumulative update for One Identity Manager Data Governance Edition may receive additional testing. If you are not severely affected by the issues addressed by this

cumulative update, it is recommended that you wait for the next release of One Identity Manager Data Governance Edition as it will include this cumulative update.

Resolved issues

The following is a list of issues resolved in this cumulative update.

Table 1: Resolved issues

Resolved issue	Issue ID
Data Governance Administrator cannot assign the same owner to multiple resources at once.	496454
Missing support for using Data Governance PowerShell client. Consequently, unable to perform manual installation of Data Governance service.	494855
<p>NOTE:</p> <ul style="list-style-type: none"> The import path needs to be changed from C:\ProgramFiles\One Identity\One Identity Manager\QAM.Client.PowerShell.dll to C:\ProgramFiles\One Identity\One Identity Manager Data Governance Edition\Powershell\QAM.Client.PowerShellUtility.dll The new Windows PowerShell snap works with PowerShell 7 (x64). 	
Unable to send some reports from web portal as the corresponding job chains fail: Resource activity, Resource access, Account activity and Account access.	493047
Missing support for managing cloud managed hosts : SharePoint Online and OneDrive for Business using Data Governance agent.	484236
"Policy Violation" tab missing from Governed Data tab.	490974
Duplicate group names due to same random numbers generated for New File System Share request.	496278
Error when navigating to "History" tab in Governed Data Overview.	496458
Issues in DFS share's permissions and access visibility.	492420

Applicability of this cumulative update

Table 2: Products affected by this cumulative update

Product name	Version
One Identity Manager Data Governance Edition	9.3.1

Installing this cumulative update

To install the cumulative update

NOTE: These are simplified steps. Refer to the [One Identity Manager Installation Guide](#) for full upgrade information for One Identity Manager and [One Identity Manager Data Governance Edition Deployment Guide](#) for more information regarding the Data Governance Configuration wizard.

1. Perform a backup of your One Identity Manager database and Data Governance Resource Activity database before performing a version upgrade.
2. Replace your existing local <OneIM Build>\Modules\QAM folder with the QAM folder provided in this cumulative update release package.
3. Run the JobQueueInfo.exe and wait for the queue to clear.
4. Once the job queue is empty, stop the One Identity Manager job service on the server handling queries from the Master SQL Server.
5. Stop the Data Governance service.
6. For SQL server deployments, ensure the SQL Server agent is running.
7. Perform a One Identity Manager and Data Governance Edition upgrade:
 - a. Log in to the server hosting the One Identity Manager workstation tools and run the One Identity Manager autorun to install the new local Data Governance files. From the autorun, open the installation page and install the **One Identity Data Governance Edition**.
 - b. Run the Configuration Wizard (ConfigWizard.exe) to upgrade and configure the One Identity Manager database.

NOTE: You will be blocked from continuing if the job queue is not empty. You will be asked to stop the job service and close all open connections to the One Identity Manager database.
 - c. Start the One Identity Manager job service.
 - d. Run the Data Governance Wizard (Data Governance Configuration Wizard.exe) to upgrade the Data Governance service and connect to an existing (or install a new) resource activity database.
8. Open the Manager to upgrade the Data Governance agents. If prompted to perform updates, click **Yes**.

NOTE: Support for Data Governance functionality in the new web portal is already included in the One Identity Manager 9.3.1 release. This service pack provides additional fixes and improvements delivered via a transport package.

9. Import the transport package(s) provided with this service pack using the **Database Transporter**.
10. For more information, refer to [Importing transport packages with the Database Transporter](#).

Removing this cumulative update

To remove this cumulative update

1. Use Add/Remove Programs to remove One Identity Manager Data Governance Server 9.3.1.76..
2. Redeploy an older version of Data Governance Edition if required.

About us

One Identity solutions eliminate the complexities and time-consuming processes often required to govern identities, manage privileged accounts and control access. Our solutions enhance business agility while addressing your IAM challenges with on-premises, cloud and hybrid environments.
