

Password Manager

Release Notes

Version 5.15

15 January 2026, 12:23

These release notes provide information about the Password Manager 5.15 release. For the most recent documents and product information, see [Password Manager Technical Documents](#) on the One Identity Support Portal.

Password Manager 5.15 is a minor release with new features and functionality.

- For the list of new features, see [New features](#).
- For the list of enhancements, see [Enhancements](#).
- For the list of deprecated features, see [Deprecated features](#).
- For the list of resolved issues, see [Resolved issues](#).
- For the list of known issues, see [Known issues](#).

New features

Password Manager 5.15 contains the following new features.

Password Manager Workflow Service

Starting from version 5.15, Password Manager utilizes a dedicated Password Manager Workflow Service to:

- Run and handle Password Manager workflows.
- Improve workflow performance, especially when managing large user groups with automated workflows.
- Communicate with the Password Manager Self-Service Site and Helpdesk Site.

The Password Manager Workflow Service uses port 20002 inbound to the Password Manager Server. If needed, you can set it to the desired value as described in [Initializing a Password Manager instance](#) in the *Password Manager Administration Guide*.

For more information about the Password Manager Workflow Service, see [Password Manager Service, Workflow Service and Administration Site](#) in the *Password Manager Administration Guide* or the [Password Manager for AD LDS Administration Guide](#).

For more information on how to configure the Password Manager Workflow Service, see:

- [Initializing a Password Manager instance](#) in the *Password Manager Administration Guide*.
- [Initializing a Password Manager for AD LDS instance](#) in the *Password Manager for AD LDS Administration Guide*.

Restart activity on failure

Added a new **Restart activity on failure** option to the settings dialog of every available workflow activity, allowing Password Manager administrators to configure workflow activities so that they automatically restart if they fail for any reason.

Related topics

- [Enhancements](#) on page 3
- [Resolved issues](#) on page 6
- [Known issues](#)

Deprecated features

The following is a list of features that are no longer supported starting from Password Manager 5.15.

Quick Connect

Quick Connect integration has been deprecated.

Web Services Endpoints

Starting from Password Manager 5.15, the Password Manager API is fully exposed and no longer configurable on a workflow level, resulting in the following changes:

- In the Password Manager Administration Site, the **Web Services** page and its **Web Services Endpoints** sub-page (used to expose workflows via API as an extensibility feature) are deprecated.
- The **Built-in Web Service** extensibility feature is deprecated.

- The **Web Services > Custom Web Services** page now appears in the main settings list of the Password Manager Administration Site, if the extensibility settings are enabled.

32-bit installers, components and redistributable packages

All 32-bit Password Manager installers, components and redistributable packages have been deprecated and removed from the Password Manager installation media.

Migration Wizard

The Password Manager Migration Wizard tool has been deprecated and removed from the Password Manager installation media.

Customization Tool

The Password Manager Customization Tool has been deprecated and removed from the Password Manager installation media.

Enhancements

The following is a list of enhancements implemented in Password Manager 5.15.

Table 1: Enhancements

Enhancement	Issue ID
<p>Added a new Allowed redirect domains option on the Component Settings > Secure Token Server > Server settings page.</p> <p>If specified, STS validates the requested redirect URL to ensure that the domains match.</p>	502460
<p>Updated the Password Manager installer with the following changes:</p> <ul style="list-style-type: none"> • Moved the Password Manager for AD LDS installer from the Additional Components list to the One Identity Password Manager list. • Added the .NET 6 runtime installer to the list of redistributables. At the same time, removed the .NET Framework 4.7.1 redistributables. • Removed all deprecated 32-bit installers and Password Manager components. For more information, see Deprecated features. 	479710, 448965
<p>Reworked the Licensing page of the Password Manager Administration Site to provide a more transparent overview of:</p> <ul style="list-style-type: none"> • The licenses and types of licenses used. 	471968

- The total number of purchased licenses.
- The total number of required licenses.
- Any compliance issues that Password Manager detected.

For more information, see:

- [Licensing](#) in the *Password Manager Administration Guide*.
- [Licensing](#) in the *Password Manager for AD LDS Administration Guide* version.

IMPORTANT: Password Manager for AD LDS version 5.15 requires a new license key. If you are upgrading to 5.15 from 5.14.x or earlier, make sure to obtain the new key before installing the release. To obtain a new key, see the [Licensing Key Upgrade](#) page. For more information, see the following topics:

- [Installing the license](#) and [Updating the license](#) in *Password Manager Administration Guide*
- [Installing the license for Password Manager for AD LDS and Updating the license](#) in *Password Manager Administration Guide (AD LDS Edition)*

For assistance with your license upgrade, submit a request using the licensing assistance from the [One Identity Support Portal](#).

The Password Manager Helpdesk Site received the following enhancements:

470387

- Removed certificate selection from the **Initialization** page, as the required certificate is now provided automatically via HTTPS protocol.
- Updated the list of authentication methods to specifically indicate the available authentication types.
- The site now correctly indicates if any problems occur during the selected authentication attempt.
- If any errors occur during a Helpdesk Site workflow, the error message now indicates the action steps in chronological order, with the earliest action listed first in the list.

For more information, see [Authentication methods](#) in the *Password Manager Administration Guide* or the *Password Manager for AD LDS Administration Guide*.

The Password Manager Self-Service Site received the following enhancements:

470384

Enhancement**Issue ID**

- Removed certificate selection from the **Initialization** page, as the required certificate is now provided automatically via HTTPS protocol.
- Updated the **Find User** page to utilize the CAPTCHA changes of enhancement 456222.
- Updated and clarified several Self-Service Site error messages to improve usability.
- Enhanced the Self-Service Site workflow completion messages of **Troubleshooting Mode**, providing more details about workflow steps and potential errors.

For more information, see the following resources:

- For the steps of initializing the Self-Service Site, see [Installing the Password Manager Self-Service Site and Helpdesk Site on a standalone server](#) in the *Password Manager Administration Guide* or the *Password Manager for AD LDS Administration Guide*.
- For more information on the troubleshooting mode, see [About Password Manager extensibility features](#) in the *Password Manager Administration Guide* or the *Password Manager for AD LDS Administration Guide*.

Reworked the **General Settings > Phone Authentication** configuration page of the Password Manager Administration Site. 465129

Starting from Password Manager 5.15, phone-based authentication is no longer tied to a license, but can be configured separately, as long as the configuration prerequisites are met.

For more information, see:

- [Configuring phone-based authentication](#) in the Password Manager Administration Guide.
- [Configuring phone-based authentication for Password Manager for AD LDS](#) in the *Password Manager for AD LDS Administration Guide*.

Enhanced the **CAPTCHA Settings** page with a preview image and additional CAPTCHA generation options, allowing you to enable: 456222

- Random scaling
- Random rotation
- Random skewing
- Generating a new CAPTCHA image if the previous one was solved incorrectly.

For more information, see:

- [Display CAPTCHA](#) in the *Password Manager Administration Guide* or

the [Password Manager for AD LDS Administration Guide](#).

- [Configuring CAPTCHA security images](#) in the *Password Manager Administration Guide* or the [Password Manager for AD LDS Administration Guide](#).
- [Configuring CAPTCHA or reCAPTCHA for the Find Your Account page](#) in the *Password Manager for AD LDS Administration Guide*.

Resolved issues

The following is a list of issues addressed in Password Manager 5.15.

Table 2: Resolved issues – General Password Manager issues

Resolved issue	Issue ID
<p>Previously, if the Restart workflow if error occurs workflow step has been triggered, it restarted only the activity that had failed the workflow instead of restarting the entire workflow, as its name suggested.</p> <p>This issue has been fixed so that the Restart workflow if error occurs workflow step now restarts the entire workflow if triggered.</p> <p>TIP: To restart a workflow only from the failing activity, enable the Restart activity on failure setting for the specific activity. For more information, see Enhancements.</p>	462108

Table 3: Resolved issues – Password Manager Self-Service Site

Resolved issue	Issue ID
<p>Previously, selecting a language with any kind of errors might result in the Self-Service Site getting into an unstable state.</p> <p>This issue is now fixed so that the Self-Service Site falls back to the default language (en-US) if any errors occur with the selected language.</p>	478726

Known issues

The following is a list of issues, including those attributed to third-party products, known to exist at the time of release.

Table 4: Known issues

Known issue	Issue ID
<p>Following a Password Manager upgrade, the General > Settings > Scheduled Tasks > Active Directory Sites task is disabled.</p> <p>Workaround</p> <p>After upgrading Password Manager to a newer version, enable the Active Directory Sites task manually.</p>	246147
<p>When scheduled from the secondary instance of the Password Manager server, the General Settings > Unregister Users task does not run.</p> <p>Workaround</p> <p>Schedule the Unregister Users task on the primary instance of Password Manager.</p>	233679
<p>If the application pool identity is a domain user with minimal permissions, then Web interface customization changes are not applied to the Self-Service and Helpdesk Sites.</p>	233658
<p>In the General Settings > Instance Reinitialization page, the Corporate phone attribute is not imported from the primary instance to the secondary instance.</p> <p>Workaround</p> <p>Update the Corporate phone attribute manually on the secondary instance to have the same value as on the primary Password Manager instance.</p>	229200
<p>If the Password Manager Self-Service Site contains an IPv6 address, the location-sensitive authentication (LSA) feature does not work.</p> <p>Workaround</p> <p>LSA currently supports IPv4 addresses only. Therefore, do not access the Password Manager Self-Service Site from an external network where the request contains an IPV6 address.</p>	221571
<p>When configuring a dictionary rule in the Password Manager Administration Site, the Policy Rules > Dictionary Rule > Enable dictionary lookup to reject passwords that contain > Beginning characters of a dictionary word setting does not work correctly if you specify only 2 beginning characters.</p> <p>Workaround</p> <p>One Identity recommends using the A complete word from the dictionary (QPMDictionary.txt) setting when configuring a dictionary rule.</p>	221468
<p>If no appropriate authentication methods are configured for it, the Forgot My Password screen may appear blank in the Password Manager Self-</p>	221389

Known issue	Issue ID
Service Site or Helpdesk Site.	
Workaround	
In the Password Manager Administration Site, One Identity recommends configuring the Register workflow with Security Questions as one of its registration modes.	
When a symmetry rule is configured with the Policy Rules > Symmetry Rule setting of the Password Manager Administration Site, it may fail to validate passwords containing non-consecutive characters.	220177
Workaround	
Do not use the Policy Rules > Symmetry Rule > Maximum number of consecutive characters within a password, that read the same in both directions (pass4554word) setting.	
In a Password Manager for AD LDS environment, if the User Scope is configured with an AD LDS account, the Forgot My Password and Manage My Passwords workflows will fail.	220171
Workaround	
When configuring a User Scope, do not use The following AD LDS account setting of the Access account > Edit AD LDS Instance Connection dialog.	
When a Questions and Answers Policy is updated with any language other than English, users may receive both the default and the custom email notifications on the Password Manager Self-Service Site.	219401
Workaround	
For the Email user if workflow succeeds workflow, change the value of the Select email template to use setting to Customize .	
Upgrading Password Manager from version 5.6.3 to 5.9.x keeps the previous My Questions and Answers profile workflow.	215892
Workaround	
To solve the problem:	
<ol style="list-style-type: none"> 1. In the Password Manager Administration Site, navigate to the My Questions and Answers profile workflow. 2. Open Workflow Settings > Availability. 3. Set Enable the workflow to Never. 4. Select Show the workflow on the Self-Service Site. 5. To apply your changes, click OK. 	
The User Status Statistics scheduled task may fail intermittently.	171590

Known issue	Issue ID
<p>When using Password Manager for AD LDS, the Password Policies page of the Administration Site is not updated when a password policy is created.</p> <p>Workaround</p> <p>After a new Password Policy is created, click Save, and immediately cancel the Add New Policy wizard. The page will refresh and list the new policy.</p>	170587
<p>After upgrading to Password Manager for AD LDS 5.9.x, the General Settings > Search and Logon Options menu may display an error when its settings are modified.</p> <p>Workaround</p> <p>To solve this problem:</p> <ol style="list-style-type: none"> 1. In the Password Manager for AD LDS Helpdesk Site, navigate to General Settings > Search and Logon Options. 2. In the Users must enter the following user account attribute for identification setting, change the value from <code>sAMAccountName</code> to <code>cn</code>. 	170560
<p>In Password Manager for AD LDS, certain column data required for custom activities are not available in generated reports.</p>	170355
<p>After upgrading Password Manager from an earlier version to 5.9.x, the upgrade process may create duplicate URL references for the Password Manager User Site.</p> <p>Workaround</p> <p>Manually delete URL shortcuts that are not required.</p>	169921
<p>When a Password Manager for AD LDS instance and the Password Manager for AD LDS server instance are not configured on the same machine, Password Policy Rules are not displayed in the Password Manager for AD LDS Self-Service Site.</p> <p>Workaround</p> <p>Configure the Password Manager for AD LDS instance and the Password Manager for AD LDS server instance on the same machine.</p>	169763
<p>The user search settings of the Password Manager for AD LDS Helpdesk Site may work incorrectly.</p> <p>Workaround</p> <p>To solve the problem:</p> <ol style="list-style-type: none"> 1. In the Password Manager for AD LDS Helpdesk Site, navigate to General Settings > Search and Logon Options. 2. Use the <code>cn</code> attribute instead of <code>mail</code> to search for users. 	169384

Known issue	Issue ID
In Password Manager versions 5.8.2 and 5.9.x, you can only reconnect to a domain on the second attempt.	166950
Workaround	
To solve the problem:	
<ol style="list-style-type: none"> 1. In the Password Manager Administration Site, select the User Scope, Helpdesk Scope or Password Policy you want to configure. 2. Click Add domain connection twice to add a new domain connection. 	
In email notifications, the #OPERATOR_ACCOUNT_NAME#, #OPERATOR_IP#, #WORKFLOW_RESULT#, and #WORKFLOW_SUMMARY# parameters are not populated.	141728
On Windows Server 2019, the Password Manager Service and One Identity rSMS Service may stop.	127587
Workaround	
To solve the problem, make sure that the domain controller machine and the clients are at two separate entities.	
When editing a dictionary file between the size of 10–20 MB from a Password Policy, the web browser session may crash, and an error may appear in the Windows Event Viewer.	115957
Workaround	
If you must modify a dictionary file larger than 10 MB, edit it from the domain machine where Password Policy Manager (PPM) is installed.	
When performing a password reset with the Password Manager Helpdesk Site, the site also accepts the previous/old password.	114822
Workaround	
Manually enter a different password during the short duration of the password reset.	

System requirements

Before installing Password Manager 5.15, ensure that your system meets the following minimum hardware and software requirements.

NOTE: When setting up a virtual environment, carefully consider the configuration aspects such as CPU, memory availability, I/O subsystem, and network infrastructure to ensure the virtual layer has the necessary resources available. For more information about environment virtualization, see [One Identity's Product Support Policies](#).

Password Manager Service, Workflow Service and Administration Site requirements

Before installing Password Manager, make sure that your system meets the following minimum hardware and software requirements. These requirements are applicable both to full installation and distributed installation (that is, when the Self-Service Site and the Helpdesk Site are installed on separate machines).

Table 5: Password Manager Service, Workflow Service and Administration Site requirements

Requirement	Details
Platform	1.6 GHz or higher.
Memory	At least 4 GB RAM.
Hard disk space	2.7 GB of free disk space. NOTE: If .NET 6 is already installed, then installation might require less disk space.
Operating system	Password Manager supports the following operating systems: <ul style="list-style-type: none">• Microsoft Windows Server 2016• Microsoft Windows Server 2019• Microsoft Windows Server 2022 NOTE: Consider the following operating system and machine restrictions: <ul style="list-style-type: none">• Password Manager does not support Windows Server Core mode setup.• One Identity does not recommend installing Password Manager on the machine where the Domain Controller (DC) server is installed.• Password Manager supports Windows Server 2016 and later versions in domain and forest functional levels, including domains operating in a mixed mode.
Internet Information Services	Password Manager requires Microsoft Internet Information Services (IIS) 10.0 on the web server of your environment. TIP: To ensure best practice security, configure Password Manager to use HTTPS. For more information, see Enabling HTTPS in <i>Password Manager 5.15 Administration Guide</i> or <i>Password</i>

Requirement	Details
	<i>Manager 5.15 Administration Guide (AD LDS Edition).</i>
Web browser	Password Manager supports the following web browsers: <ul style="list-style-type: none"> • Microsoft Edge • Mozilla Firefox • Apple Safari • Google Chrome
Microsoft .NET platform	Microsoft .NET 6 <p>TIP: If Microsoft .NET 6 is not installed on the machine, the Password Manager installer will install it automatically.</p>
Visual C++ Runtime Libraries	Password Manager supports the following Visual C++ Runtime Libraries: <ul style="list-style-type: none"> • Visual C++ Runtime Libraries 2017 • Visual C++ Runtime Libraries 2010 <p>TIP: If the required runtime libraries are not installed on the machine, the Password Manager installer will install them automatically.</p>
Minimum screen resolution	1280x1024 pixels

Password Manager Self-Service Site requirements

Make sure that every client computer meets the following minimum software requirements:

Table 6: Password Manager Self-Service Site requirements

Requirement	Details
Web browser	The Password Manager Self-Service Site supports the following browsers: <ul style="list-style-type: none"> • Microsoft Edge • Mozilla Firefox • Apple Safari • Google Chrome

Requirement	Details
Mobile web browser	<p>The Password Manager Self-Service Site supports the following mobile browsers:</p> <ul style="list-style-type: none"> • Microsoft Edge • Mozilla Firefox • Apple Safari • Google Chrome • DuckDuckGo • Samsung Internet
Minimum screen resolution	1280x1024 pixels

Password Manager Helpdesk requirements

Make sure that every client computer meets the following minimum software requirements:

Table 7: Password Manager Helpdesk Site requirements

Requirement	Details
Web browser	<p>The Password Manager Helpdesk Site supports the following browsers:</p> <ul style="list-style-type: none"> • Microsoft Edge • Mozilla Firefox • Apple Safari • Google Chrome
Minimum screen resolution	1280x1024 pixels

Password Policy Manager requirements

To implement password policies in an Active Directory (AD) domain managed by Password Manager, deploy the Password Policy Manager component on all domain controllers of the managed domain.

The domain controllers where you plan to install the Password Policy Manager component must meet the following requirements:

Table 8: Password Policy Manager requirements

Requirement	Details
Hard disk space	30 MB of free hard disk space.
Operating system	Password Policy Manager supports the following operating systems: <ul style="list-style-type: none">• Microsoft Windows Server 2016• Microsoft Windows Server 2019• Microsoft Windows Server 2022

NOTE: Password Manager does not support Windows Server Core mode setup.

Secure Password Extension requirements

To support password resets from the Windows login screen, you must deploy Secure Password Extension on all target computers in the managed domain. The target computers must meet the following minimum software requirements:

Table 9: Secure Password Extension requirements

Requirement	Details
Operating system	Secure Password Extension supports the following operating systems: <ul style="list-style-type: none">• Microsoft Windows 10• Microsoft Windows 11

Offline Password Reset requirements

To allow users to reset their forgotten passwords when they are not connected to the corporate network (making their domain unavailable), deploy the Offline Password Reset component on all target computers in the managed domain.

NOTE: Users can reset their passwords offline only if the Offline Password Reset component has already been installed before their scheduled password reset time.

The target computers must meet the following minimum software requirements:

Table 10: Offline Password Reset requirements

Requirement	Details
Operating system	The Offline Password Reset component supports the following operating systems:

Requirement	Details
-------------	---------

- Microsoft Windows 10
- Microsoft Windows 11

NOTE: Password Manager does not support Windows Server Core mode setup.

Password Manager Reports requirements

To configure and use Password Manager reports, you must:

1. Install an SQL Server in your environment.
2. Configure reporting settings on the Password Manager Administration Site. For more information, see [Reporting](#) in *Password Manager 5.15 Administration Guide* or *Password Manager 5.15 Administration Guide (AD LDS Edition)*.

The report definitions included with Password Manager support all features of the SQL Server versions listed in this section. All supported Microsoft SQL Server Reporting Services in Password Manager support SSL connection.

Table 11: Password Manager Reports requirements

Requirement	Details
SQL Server	The following SQL Server versions are supported: <ul style="list-style-type: none">• Microsoft SQL Server 2016• Microsoft SQL Server 2017• Microsoft SQL Server 2019• Microsoft SQL Server 2022

Accessing External URLs

To enable Password Manager to download images, make sure that the machine where Password Manager is installed has an active Internet connection.

Product licensing

Password Manager requires a license key for operation. For more information on license management, see [Licensing](#) in the *Password Manager 5.15 Administration Guide* or the *Password Manager 5.15 Administration Guide (AD LDS Edition)* documents.

IMPORTANT: Password Manager for AD LDS version 5.15 requires a new license key. If you are upgrading to 5.15 from 5.14.x or earlier, make sure to obtain the new key before installing the release. To obtain a new key, see the [Licensing Key Upgrade](#) page. For more information, see the following topics:

- [Installing the license and Updating the license in Password Manager Administration Guide](#)
- [Installing the license for Password Manager for AD LDS and Updating the license in Password Manager Administration Guide \(AD LDS Edition\)](#)

For assistance with your license upgrade, submit a request using the licensing assistance from the [One Identity Support Portal](#).

Upgrade and installation instructions

Consider the following before you start the installation or upgrade of Password Manager.

- For more information on the upgrade procedure, see [Upgrading Password Manager](#) in the *Password Manager 5.15 Administration Guide* or the *Password Manager 5.15 Administration Guide (AD LDS Edition)* documents.
- For more information on how to install and configure Password Manager, see [Installing Password Manager](#) in the *Password Manager 5.15 Administration Guide* or the *Password Manager 5.15 Administration Guide (AD LDS Edition)* documents.

Supported upgrade paths

You can upgrade to Password Manager 5.15 from version 5.9 or newer.

Backing up STS configuration

If you upgrade Password Manager from a version older than 5.11.3 with Secure Token Server configured, then create a backup of **Rsts.exe.config** in the following folder before performing the upgrade:

```
<password-manager-install-folder>\Service\SecureTokenServer
```

After the upgrade is finished, restore the **Rsts.exe.config** file.

NOTE: This procedure is not required if you upgrade from version 5.11.3 or newer.

Reconfiguring passcode authentication via email

If you use the **Authentication Methods** activity in any of your workflows with the **Personal Email: Authenticate with Passcode** method, you must reconfigure this activity after performing the upgrade.

Web Service Endpoint deprecation

As described in [Deprecated features](#), the **Web Services** page and its **Web Services Endpoints** sub-page (used to expose workflows via API as an extensibility feature) are deprecated starting from Password Manager 5.15. The feature is superseded by the Self-Service Site API.

Updating custom activities

If you use any custom scripts in your Password Manager activities, verify that your custom scripts still work, as the new Password Manager release might change certain types and namespaces used in the scripts.

For the list of available types and namespaces, see the Password Manager SDK documentation in the following location of the Password Manager installation media:

```
\\Password Manager\SDK\One Identity Password Manager SDK.chm
```

Self-Service API changes in workflows and Password Manager functions

Starting from Password Manager 5.15, the control of workflows and the usage of Password Manager-specific functions have changed. For the exact changes, see the Swagger UI of the Self-Service API by navigating to **Start > One Identity > Self-Service API**.

HSTS certificate requirements

In Password Manager, HSTS (Strict HTTP) is enabled by default. You must install a certificate on the Password Manager servers, and configure it in IIS before proceeding with installation or upgrade.

The certificate must meet the following requirements:

- The **Key Usage** option must be set to **Digital Signatory** and **Server Authentication**.
- The realm instance must contain all possible names for all servers. For example, the host name, the FQDN, and the wildcard of the domain (that is, *.mydomain.local).
- The certificate must be created by a trusted Certificate Authority.

NOTE: A self-signed certificate from IIS is not suitable, as it does not contain the required settings.

For more information on the HSTS certificate requirements, see [Knowledge Base Article 4381287 HSTS Certificate requirement for Password Manager 5.15](#) on the One Identity support portal.

Globalization

This section contains information about installing and operating this product in non-English configurations, such as those needed by customers outside of North America. This section does not replace the materials about supported platforms and configurations found elsewhere in the product documentation.

This release is Unicode-enabled and supports any character set. It supports simultaneous operation with multilingual data. This release is targeted to support operations in the following regions: North America, Western Europe and Latin America, Central and Eastern Europe, Far-East Asia, Japan.

The release is localized to the following languages: Chinese (Simplified), Chinese (Traditional), Czech, Danish, Dutch, French, German, Italian, Japanese, Korean, Polish, Portuguese (Brazil), Portuguese (Portugal), Russian, Spanish, Swedish.

The Password Manager Self-Service Site is not localized in any language other than English.

About us

One Identity solutions eliminate the complexities and time-consuming processes often required to govern identities, manage privileged accounts and control access. Our solutions enhance business agility while addressing your IAM challenges with on-premises, cloud and hybrid environments.

Contacting us

For sales and other inquiries, such as licensing, support, and renewals, visit <https://www.oneidentity.com/company/contact-us.aspx>.

Technical support resources

Technical support is available to One Identity customers with a valid maintenance contract and customers who have trial versions. You can access the Support Portal at <https://support.oneidentity.com/>.

The Support Portal provides self-help tools you can use to solve problems quickly and independently, 24 hours a day, 365 days a year. The Support Portal enables you to:

- Submit and manage a Service Request
- View Knowledge Base articles
- Sign up for product notifications
- Download software and technical documentation
- View how-to videos at www.YouTube.com/OneIdentity
- Engage in community discussions
- Chat with support engineers online
- View services to assist you with your product

Third-party contributions

This product contains some third-party components (listed below). Copies of their licenses may be found at referencing <https://www.oneidentity.com/legal/license-agreements.aspx>. Source code for components marked with an asterisk (*) is available at <http://opensource.quest.com>.
