PST Flight Deck 9.3.1

Release Notes

March 2025

These release notes provide information about the latest PST Flight Deck release.

- New Features
- Release History
- System Requirements
- Product Licensing
- Third Party Contributions

New features

No new features have been introduced in this version.

Resolved Issues

Resolved issue	ID (ADO)
One Drive scan problem when SMTP and UPN are different	118103

Release History

This page contains previous released versions of PST Flight Deck.

PST Flight Deck 9.3.1

Jun 22, 2026

Resolved Issues

Resolved issue	ID (ADO)
One Drive scan problem when SMTP and UPN are different	118103

PST Flight Deck 9.3

March 27, 2026

Resolved Issues

Resolved issue	ID (ADO)
Assembly strong name	116847
EWS retirement	117879
Quest Ahead Rebranding	117941

PST Flight Deck 9.2

March 12, 2023

New features

New mail rule

New mail rule 'MaxAdvancedClientMigrationPolicy' has been created. Mail will not be sent if the user has a priority number greater than the value specified. (114552)

.NET Framework

The .NET Framework version has been upgraded to version 4.6.2. (114958)

SQL 2022

SQL 2022 is now compatible with PST Flight Deck. (113609)

Microsoft.IdentityModel and Microsoft.Identity.Web

Nuget packages have been updated for Microsoft.IdentityModel and Microsoft.Identity.Web. (113918)

Resolved Issues

Resolved issue	ID (ADO)
Migration Agent sending popup for completed files	113919
'Show Progress' bar not displaying movement during migration	114673
Exception for User AD Sync for Office 365 archive	114727
Completion popup not displaying for some completed PSTs	114978

PST Flight Deck 9.1.4

June 23, 2023

New features

Update to ADAL

Due to ADAL support being discontinued, PST Flight Deck authentication has been updated to use MSAL (113261)

Click to run version update

The repair module has been updated to support Click to run versions of Office 2016 and higher (98387)

Resolved Issues

Resolved issue	ID (ADO)
Clean Up module data content not present	113001
Range issue when downloading file from OneDrive	113281

Resolved issue	ID (ADO)
Address Whitesource vulnerabilities	113384

PST Flight Deck 9.1.3

March 23, 2023

Resolved Issues

Resolved issue	ID (ADO)
Deprecation of Azure Active Directory and Microsoft Online PowerShell cmdlets	111475
OneDrive - duplicate scanning forsame filename/path, but different user	111776
Central Upload Agent does not recieve work items when there is lot of manual work items	111824
Agent does not receive work items if it has a large amount of files	111825
Issues with OneDrive scanning and uploading	112404

PST Flight Deck 9.1.2

August 31, 2022

Resolved Issues

Resolved issue	ID (ADO)
OneDrive scan is scanning OneSingleBatch of only 100 users.	110767
Result and FileName in complete display result missing multilanguage option.	110845
Using a custom database name will fail on exception for 9.1 update script.	110859
Mac OS agent sends an invalid .xml descriptor file.	111263
OneDrive scan failing because some search items are not found.	111357

Resolved issue	ID (ADO)
GCCHigh tenants: OneDrive scan problem with ResourceURL Override.	111375

PST Flight Deck 9.1.1

May 19, 2022

Resolved Issues

Resolved issue	ID (ADO)
Could not ingest multiple files with the same name into Exchange	110485
all_local PATH setting: the File Scanner was resolving all the files discovered in the path as 'Junction/symlink'	110486
Failure when installing server with custom database name as a script was using 'insert' into default datebase name	110386
File Scanner could not connect with TLS 1.2	110188
Ingest - Exchange (archive): all files were processed with the status 'Suspended'	109823
Snapshot crashing issue	109776
Could not match with user in database when there is a shared mailbox in use and attached to Outlook	109748
'Postpone' option restarted Outlook every minute despite inserting different times	110526
Issue when double clicking Agent icon in system tray bar	110592

PST Flight Deck 9.1

February 4, 2022

New features

OneDrive modules (Sync and Upload services)

Ability to collect and process PST files from OneDrive location

SQL optimization

Some SQL queries have been optimized and updated to more efficient variants.

PST Flight Deck 9.0

December 10, 2021

New features

Increase Security Options in IIS (WebService, BITS, Certs)

Ability to add certificate-based client authentication into IIS to support Azure Native Deployed Servers.

Azure AD sync module

Ability to scan Azure AD instead of on-prem AD.

Sync Azure AD User Custom Fields

Ability to synchronize custom fields.

Enhanced PowerShell module

Enhancements to support more custom PowerShell scenarios.

Abort Ingest when Error Quota Exceeded

Enhanced error detection and retry for full archives.

PST Flight Deck 8.1

November 24, 2020

New features

Override path in CUA

Added the option to override map network path in CUA.

Column Status

Column status will now show Status instead of ID.

Request Reset Agent

Request Reset Agent button added, allowing users to reset agent to multiple users.

Location Mismatch

The ability to change owner when it is located in a different location has been added.

User Deleted Status For Files That Can't Be Accessed

If the CUA does not have access to 'SHARE', you will get a failure within the console. Select 'RESET UPLOAD' to access these files.

New Report

A new user report screen for user mailbox statistics has been implemented under Reports.

Credentials Editor

The Credential Editor now has two sections: 'Service Credentials' and 'OAuth Credentials'.

Detach When Finished

When a file is ingested, the agent can be queued to be detached. This value is set to FALSE by default.

Marked Migrate

A new setting under Ownership.

System Requirements

System requirements for PST Flight Deck can be found in the Requirements Guide.

Product Licensing

Summary

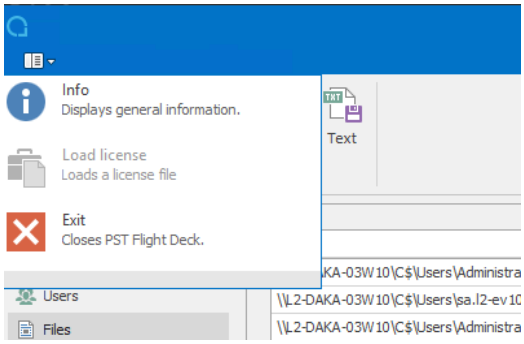
Sometime in PST migration projects, there is a need to update the license key within the product. This could be due to a transition from a demo setup into a full production migration, due to the project duration or scope superseding the time or features stipulated within the file, or for several other reasons.

Should an updated license file be required, please contact your Quest representative to acquire the updated file. If you do not have a proper contact, please contact Licensing to begin discussions on how to acquire an updated license key.

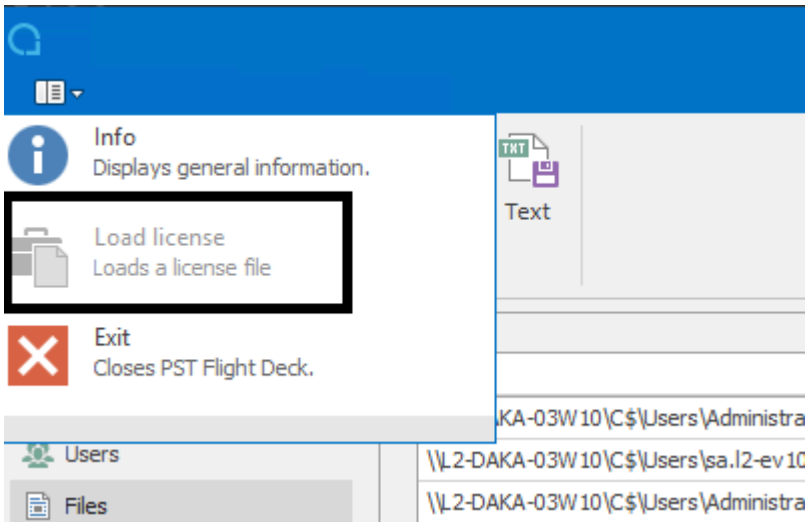
Once an updated license has been acquired, please follow the instructions below to ensure PST Flight Deck is utilizing the new file.

Steps to install the new license for PST Flight Deck (FD) by Quest:

1. Close all active FD consoles
2. Stop FD Core service
3. Copy the updated license file to the FD server
4. Rename file to “license.lic”
5. Browse to the FD install directory; default location C:\Program Files\QUADROtech\PST FlightDeck
6. Copy “license.lic” file to the following locations under the install directory:
   - Core Service
   - Core WebService\Bin
   - UI
7. Start FD Core service
8. Launch FD console and launch the “Info” menu in the upper left corner of the FD Admin Console as shown below:



9. Review product license information to ensure license file is properly recognized as shown below:



Info
Displays general information.
Load license
Loads a license file
Exit
Closes PST Flight Deck.
